Course Description: This class is an introduction to paleobiology. There will be an assignment every week. Lab practicals will be every Friday with a brief introduction and the remaining lab time devoted to hands-on work with rocks, earth materials, maps, and models of paleobiological processes. The objective of this course is to familiarize you with basic paleobiological concepts and the methods used to study them. Emphasis will be on observation and description, the building of a "paleobiology toolbox", and application of these skills in interpreting the history of life.

Chapter questions: are to be completed before your lab. These are designed to prepare you for the lab topic so that you can complete the lab efficiently during your scheduled class period.

Labs: are designed so that you should be able to generally complete them and turn them in at the end of class. This is much more likely to occur if you have read through the introductory material and lab activities in advance of your scheduled lab. Labs are due the following Monday.

You are encouraged to work together with a group of students in class, but must hand in your own completed lab, written in your own words. Copying another student’s lab response is considered a form of academic dishonesty, and will not be tolerated.

Attendance:
Attendance is required for successful completion of course as is reading, completing practicals and chapter questions. If you are sick or need an excused absence, please inform instructor ahead of time if possible.

Official UM policy: “Students are expected to attend all class meetings and complete all assignments for the course. Instructors may excuse brief and occasional absences for reasons of illness, injury, family emergency, religious observance or participation in a University sponsored activity. (University sponsored activities include for example, field trips, ASUM service, music or drama performances, and intercollegiate athletics.) Instructors shall excuse absences for reasons of military service or mandatory public service.”

Missing lab during the term: The number one reason for failing this class is missing labs! If you must miss a lab for a reason acceptable to your instructor, you must make arrangements for making it up prior to your scheduled lab time.

Assessment:

<td>20%</td>
</tr>
</tbody>
</table>

Final course grades will be assigned as follows:

- A 93-100%  B+ 87-89%  C+ 77-79%  D+ 67-69%  F 59 or below
- A- 90-92%  B  83-86%  C  73-76%  D  63-66%
- B- 80-82%  C- 70-72%  D- 60-62%

Please note: You must take the class with traditional grading to apply it towards the Gen Ed lab science requirement. A minimum grade of C- must be earned for the course to be applied for the Gen Ed requirement.
Online Content:
The web site for your book is:

http://www-geology.ucdavis.edu/~cowen/HistorvofLife/

Check it out and use this web site. It contains useful information keyed to your text chapter reading and the weekly assignments made.

Communication: Useful information will be posted on Moodle, such as announcements, the syllabus, chapter questions, lecture notes, and handouts distributed in lab. You can also view your grades. Please note that I will use your official UM email address to communicate with you. **It is your responsibility to make sure you receive these messages sent to your UM email address in a timely manner.** Moodle is the program for online components of courses. You can log into Moodle by going to either OneStop and then UMOnline, or directly to UMOnline from the UM homepage. You will see your course listed when you enter Moodle. On the UMOnline homepage, there are resources you can use to familiarize yourself with Moodle (UM Online Orientation and UMOnline 101). If you have technical problems with Moodle call the UMOnline Techs at 243-4999 (during regular working hours).

The University of Montana Honor Code IV A.

*All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the University. All students need to be familiar with the Student Conduct Code.*

Students with Disabilities: Students with disabilities will receive reasonable modifications in this course. Your responsibilities are to request modifications with sufficient advance notice, and to be prepared to provide verification of disability and its impact from Disability Services. Please speak to your TA after class or during office hours to discuss the details. For more information, visit the Disability Services for Students website at http://life.umt.edu/dss.
