FOR IMMEDIATE RELEASE

Dr. Helmut Winkler, head of the Department of Mineralogy-Petrology at the University of Gottingen, Germany, will visit Montana State University this week, according to Dr. Fred S. Honkala, chairman of the MSU Geology Department.

Dr. Winkler will give three lectures, open to anyone interested, in room 107 of the Geology building. He will speak on "The Beginning of Metamorphism" Monday at 4 p.m., on "Metamorphic Reactions and Metamorphic Facies" Wednesday at 4 p.m., and on "Much Granite and Little Rhyolite - Little Gabbro and much Basalt" Friday at 4 p.m.

On Tuesday Dr. Winkler will accompany a field trip to view the border zone facies of the Idaho Batholith in the Bitterroot Mountains. Persons interested in participating in the trip should contact Dr. J. P. Wehrenberg of the Geology Department. The trip will leave from the Geology building at 8 a.m.

Dr. Winkler is one of seven foreign geologists who will visit selected Ph. D.-granting departments of geology in the United States this spring, and MSU is one of nine institutions to be visited by him. His tour was arranged by the American Geological Institute through funds made available by the National Science Foundation as part of the NSF Visiting International Scientists Program.
