The University's Department of Geology will present senior Idaho geologist, Garth Crosby, to discuss "The Search for New Exploration Tools in the Coeur d'Alene Mining District."

Chief geologist of the Day Mines, Inc., Wallace, Idaho, Mr. Crosby has done extensive work in the mineral development and exploration of Washington and Idaho, especially in the Coeur d'Alene area which is the country's largest silver producer and second-largest lead producer. Mr. Crosby is the author of several scientific articles about Western geology and has lately been working with new exploration techniques for finding mineral deposits.

Mr. Crosby will speak at 4 p.m., Friday, April 15, in Room 107 of the UM Geology Building. The public is invited to attend, and there is no admission charge.
