FLEA AUTHORITY TEACHES
AT UM THIS SPRING

A world authority on the classification of siphonoptera (fleas) is lecturing at the University of Montana this quarter only.

Dr. William L. Jellison, who for more than 30 years has been working at the Rocky Mountain Laboratory in Hamilton and has studied fleas all over the world, is teaching a graduate level zoology course "mostly as a favor," according to Dr. P. L. Wright, chairman, zoology.

Dr. Jellison has retired but still continues part time work at the Hamilton laboratory.
