HOSPITAL ACCOUNTING SEMINAR
TO BE ON UM CAMPUS MAY 23-27

Nearly 40 financial controllers of Montana hospitals are expected to attend a 4½ day seminar May 23-27, presented by the University of Montana's School of Business Administration, Department of Accounting.

General topics to be covered will be basic accounting for hospitals, cost accounting, accounting for decision making, budgeting, and electronic data processing.

The last 2½ days will be devoted exclusively to accounting for the Medicare program. The lectures for the Medicare program will be presented by a member of the Health Insurance Reimbursement Division of the Social Security Administration and by Walter Moeller from the Blue Cross Association, Chicago.

William E. Leary, executive secretary of the Montana Hospital Association, announced that the seminar is open to all hospital controllers, accountants, bookkeepers, and other hospital personnel engaged in financial management of the hospital.

The programs presented will be of extreme interest to untrained hospital bookkeepers and will also be a review for the graduate accountant, he said.
