HUNGARIAN ECONOMIST TO DESCRIBE NATIVE LAND'S ECONOMIC GEOGRAPHY

Dr. George Enyedi, an economist and deputy director of geography in the Hungarian Academy of Sciences, will summarize the economic geography of his native country in an address Thursday evening (April 6), at the University of Montana.

Dr. Enyedi is studying methods of regionalization of agriculture in the United States, with emphasis on quantitative methods and the use of computer techniques in geographic analysis. He is traveling under the Hungarian Exchange Program of the Ford Foundation.

The 37-year-old lecturer was born in Budapest and received his doctorate in economics from the University of Economics, Budapest, in 1957. He is professor of economic geography at the University of Debrecen and has been associate professor at the Agricultural University, Godollo. Dr. Enyedi is the author of several monographs and two university textbooks on agrogeography.

His address, which will be in the journalism auditorium at 8 p.m., is sponsored by the University Public Exercises Committee in conjunction with the ASUM Program Council. It will be open to the public without charge.
