This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks. For more information, please contact scholarworks@mail.lib.umt.edu.
**BIOH 112 - Human Form and Function I**

**Course Meeting Times:** Tuesdays and Thursdays 3:40-5pm, NULH

**Instructor:** Heather Labbe  
243-5436  
heather.labbe@mso.umt.edu

**Office Hours:** Tuesdays 9:10-11am, ISB 103A and by appointment

**Course Online Supplement:** All lectures, assignments, and info regarding participation opportunities will be posted on the course Learning Management System (LMS), Moodle: [http://umonline.umt.edu/](http://umonline.umt.edu/)

**Text:** Anatomy and Physiology: From Science to Life. Jenkins and Tortora, 3rd edition -required
- WileyPlus is the publisher generated online content for the course. If you bought your text from the UM bookstore the book will include a registration code for this content. It may also be purchased as a standalone product and does include an e-version of the above required text. If you wish to ONLY purchase WileyPlus and are comfortable having a digital version of the required text you may do so by following the instructions here: [http://edugen.wileyplus.com/edugen/class/clg408720/](http://edugen.wileyplus.com/edugen/class/clg408720/) -recommended

**General Course Learning Goals:**
- Develop a vocabulary of appropriate terminology to effectively communicate information related to anatomy and physiology.
- Recognize the anatomical structures and explain the physiological functions of body systems.
- Recognize and explain the principle of homeostasis and the use of feedback loops to control physiological systems in the human body.
- Use anatomical knowledge to predict physiological consequences, and use knowledge of function to predict the features of anatomical structures.
- Recognize and explain the interrelationships within and between anatomical and physiological systems of the human body.
- Synthesize ideas to make a connection between knowledge of anatomy and physiology and real-world situations, including healthy lifestyle decisions and homeostatic imbalances.
- Interpret graphs of anatomical and physiological data.
- Approach and examine issues related to anatomy and physiology from an evidence-based perspective.

**General Course Learning Outcomes:**
- Demonstrate practical knowledge of human gross and microscopic anatomy.
- Identify structures in the body and their interrelationship with other structures.
- Describe development, regeneration, normal function of body systems.
- From observations of A&P status, interpret observations & predict consequences to homeostasis.
- Demonstrate understanding of chemical and biological principles and knowledge that serve as the foundation for understanding of human anatomy & physiology.
- Employ the scientific process for understanding principles of anatomy & physiology.
- Evaluate scientific value of new A&P observations & data.
- Describe energy-transfer processes in human body & predict consequences of interrupted or pathologic energy transfer.
- Describe cellular processes governing development, growth, & normal function of the human body.
Chapter section specific learning outcomes are provided in the lecture powerpoints, text, and embedded within the online publisher's content (WileyPlus)

**Tentative Reading Schedule (as we progress through semester- check Moodle for updates)**

### Assignments:
There are four, 25 point take home assignments that are due throughout the semester. Assignment assessments are generally based off of a reading, video, or podcast which will be accessible via the Moodle page. All assignment assessments will be posted on the Moodle page and must be completed and submitted prior to the due date deadline.

No late assessments will be accepted.

Assignment due dates:
- 9/18/14
- 10/16/14
- 11/13/14
- 12/4/14
Participation Grade Lab Prosection Days:
- Thursdays 1:30–3 PM
- Fridays 2:30–4 PM
- Sundays 7:00–8:30 PM
- Mondays 9:00–10:30 AM

Prosection 1: Overview of Organ Systems - Focus on Terminology and Identification
- September 11th, 12th, 14th, and 15th

Prosection 2: Focus on the Skeletal System and Articulations
- October 9th, 10th, 12th, and 13th

Prosection 3: Focus on Muscle Anatomy and Physiology
- November 6th, 7th, 9th, and 10th

Prosection 4: Focus on the Nervous System
- December 4th, 5th, 7th, and 8th

Additional Participation Point Opportunities will be posted to the Moodle page as the semester progresses. These may take the form of temporally limited online assessments, service activities, attendance at on-campus lectures or seminars and/or online assessments based on additional readings and are subject to the discretion of the instructor. No more than 150 points will be available during the semester, from which each student will fill a quota of 50 points.

Notification of participation point opportunity availability will be sent to your university email addresses via Moodle announcements.
