December 19, 1980

Dear UM Basketball Fan:

Welcome to the first Champion Holiday Classic. This tournament is made possible thanks to the financial support and assistance of the Champion International Corporation. The intention is to give you, the UM fan, the opportunity to see the varied style of play of teams from different regions of our country.

Many people have worked long and hard to make this event a reality. While space does not permit each of them to receive proper acknowledgement, special thanks must go to Bob Sheridan and Jim Scarborough — our Tournament Co-Chairmen, the Tournament Steering Committee, the Team Selection Committee, and Ron Herron who designed the trophies for the winner and most valuable player. The cooperation of the Village Motor Inn and the local sports media are also greatly appreciated.

A special and important aspect of the Champion Classic is that the proceeds from each year’s competition will go into UM’s Excellence Fund to support academic and scholarship programs campus wide. As this tournament firmly establishes itself, we have high hopes that such proceeds will exceed $25,000 annually.

This tournament, then, is more than just an outstanding example of Division I basketball at the national level, it is also a successful demonstration of how the business, athletic, and academic communities can work together for the benefit of the University of Montana.

Thank you for your attendance. Enjoy the tournament.

Sincerely,

Allan M. Vannini
Executive Director
On behalf of everyone at the University of Montana, I am pleased to welcome all of the participants in the First Annual Champion Holiday Classic basketball tournament.

The University hosts many different kinds of activities, concerts, lectures and plays. We are excited about the prospect of hosting a basketball tournament the calibre of the "Classic".

We hope you enjoy the tournament and your visit to our University and community.

Sincerely,

Richard C. Bowers
President

Program Dedication

Committee meetings weren't the same. No one laughed quite as much as usual. The one-liners were losing their zing. Jim Scarborough, the Co-Chairman of the 1st Annual Champion Holiday Classic hadn't been attending meetings lately. That was the reason for the lack of laughter, one-liners and the rest.

Jim's excuse was a good one, though. An automobile had almost taken him from us. Now he is on the road to recovery and has resumed his duties as president of Mueller Tire Company.

A 1964 graduate of Gonzaga University, Jim took his share of barbs from other tournament committee members about his alma mater. He always had a quick response to the kidding. An active man in the community, he is a past president of the Missoula Rotary Club, on the advisory board of St. Patrick's Hospital, President of the Missoula Golf and Country Club and is involved with several other organizations.

The speech is a little slower than it used to be, but the wit and smile were the same recently, when Jim attended a tournament meeting. We are as happy to see him out and about as are his wife Sharon, and two daughters Stacey and Stephanie.

This program is dedicated to Jim and his family.

—The Tournament Committee
While you're enjoying the game have a Coke and a smile. Coke adds life.
The University of Montana in Missoula is located in a mountain forest setting in beautiful Western Montana. It is halfway between Glacier and Yellowstone National Parks.

Four wilderness areas are located nearby Missoula. The natural surroundings offer excellent opportunities for hunting, fishing, backpacking, river floating, camping and other outdoor recreational pursuits. Two excellent winter ski areas are located within minutes of the University. Several other ski areas are only a couple of hours away by car. UM owns and operates its own golf course adjacent to campus.

The University of Montana is one of the West's pioneers in education and was chartered February 17, 1893. The school opened in September, 1895, with 50 students enrolling the first day. Located on 201 acres at the base of Mount Sentinel, UM has grown from 50 students and seven faculty members to a present enrollment of 8,880 and approximately 450 fulltime state supported faculty positions.

Throughout its history, the University of Montana has sustained a high standard of academic excellence in teaching, research and service.

UM offers associate of arts degrees in two areas and bachelor's degrees in 58 fields. It offers master's degrees in 54 programs and doctoral degrees in 13.

The College of Arts and Sciences, which is the core of the University, includes a full range of programs and courses in the life sciences, physical sciences, social sciences and humanities. The College also offers curricula in interdisciplinary fields ranging from ethnic studies to interdepartmental studies.

Seven professional schools complete the academic program—Business Administration, Fine Arts, Journalism, Education, Forestry, Law, Pharmacy and Allied Health Sciences.

The aim of the University is to provide its students with a relaxing and meaningful learning experience with the best facilities possible. The administration, faculty and staff strive for this goal.

At the University of Arizona the last five years, Barbara began her job as associate athletic director at UM in August of 1980. She served as women’s athletic events coordinator while at UA. Her responsibilities will primarily be in women’s athletics in areas of athlete eligibility academics, AIAW rules, scheduling and promotions. She is a 1964 graduate of Ohio State, with a B.A. in physical education. She received her master’s degree in recreation and administration from Ohio State in 1968. Prior to her position at Arizona Hollmann was at the University of Washington, where she was the associate director of recreational sports from 1971 through 1974. Her husband, Robert, is an associate professor of management at UM.

Barbara Hollmann  
Asso. Athletic Director

Dick Seaman  
Equipment Manager

Naseby Rhinehart  
Athletic Trainer

Gary Hughes  
Ticket Manager

Dick joined the UM staff in July of 1979. Seaman has lived in Missoula since 1949. He spent almost 24 years in the United States Marine Corps, before retiring in 1966. His last eight years in the service he was in charge of physical conditioning and all athletic equipment. A veteran of World War II, the Korean and Vietnam wars, Seaman played varsity football for the Marines. He played halfback and end. Originally from Williamsport, Pennsylvania, Seaman is married to a Missoula native (Nina).

Beginning his second year as UM’s faculty representative, Evan has been an instructor here since 1969. He is now chairman of the Department of Geography at UM. He earned his B.A. at the University of Washington in 1963, his M.A. at Washington in 1965, and his Ph.D. from Washington in 1970. Prior to his UM teaching career he taught at Washington (1966-69) and Colorado State (1965-66). From Tacoma, Washington, Denney is associated with several professional organizations. He determines academic eligibility for UM athletes.

Dave is in his third year as Grizzly sports information director. His responsibilities include press releases, press guides, game programs and advertising and promotion of men’s and women’s sports at UM. He was previously the sports editor at the Fresno Guide (Calif.). He received his B.A. in journalism at Fresno State University in 1975. While attending FSU he worked as a student assistant in the sports information office for three years, and also wrote sports for the Fresno Bee. His UM basketball and football press guides, as well as game programs, have been honored by the College Sports Information Director’s of America (Co-SIDA) by placing in District 7 competition the past two years.

Naseby is the only men’s athletic trainer Montana has known. A month after his graduation from UM in 1935, he was appointed Montana’s first athletic trainer. He was a standout athlete while attending high school in Milwaukee and became one of Montana’s finest all-around athletes, earning nine varsity letters in football, basketball and track. He has received many honors and accolades during his 44 years at Montana, including the Grizzly Cup, which he won in 1935 and his son Pete won in 1958.

Gary has been ticket manager at UM since 1966. In 1978 he was also appointed field house manager. He schedules all events in Adams Field house and at Dornblaser Stadium in addition to handling ticket distribution. He is a native of Ronan, Montana and graduated in accounting from the Missoula Business College in 1962. He gained extensive experience in accounting and auditing before assuming his responsibilities at Montana.
ABOUT CHAMPION

Champion International Corporation is a major forest products company and a pioneer in the building products, papers and paper packaging businesses. Headquartered in Stamford, Connecticut, the company's major domestic divisions include:

- Building Products
- Paper
- Packaging
- Timberlands

The company was formed in 1967 with the merger of Champion Papers Inc. and U.S. Plywood Corporation. The name Champion International Corporation was adopted in 1972.

Champion in Montana

Champion's investment in Montana is a substantial one. It includes 683,000 acres of timberlands; the largest softwood plywood plant in North America; several sawmills that produce a wide variety of lumber products; and the largest pulp and paper mill of Champion's packaging division. All together, there are some 2,400 Montana Champions employed by these operations located primarily in western Montana and also northern Idaho.

Champion's desire to sponsor a tournament for the University came as an outgrowth of an existing community interest in college basketball, and a need for additional academic scholarship programs at the University of Montana.

It is intended that any income from the tournament which is not required to pay the expenses of the tournament will be used for academic and scholarship programs at the University of Montana.

This community event enables individuals from divergent backgrounds and interests to have a common interest, that being the University of Montana.

This event is an example of industry and community participation, hosting an athletic event to provide assistance to academic and scholarship programs at the University of Montana.

(Photos by Christine Nordbye)
The art of lost wax casting is almost as old as art itself. Probably the most complex of all casting techniques, it has been used throughout history to capture detail and intricate design in various metals.

When Missoula residents Don Olson and Ron Herron first tried their hands at this ancient technique, they used an old tomato juice can and plaster of Paris. That was in 1970 and both would have to admit they've come a long way since then.

Herron, who has since moved to Helena, has become a nationally recognized artist, famous for both his painting and sculptures, and Olson have perfected the techniques of casting in bronze to the point that artists from around the nation send their work to his Alpine Bronze foundry, located in Missoula.

Watching the technicians work on the two bronze trophies for the Champion Holiday Classic offers a glimpse into the history of this ancient art, a complex and time consuming process which yields works in bronze that cannot be duplicated.

The process begins in wax. The two original trophies, which were sculpted by Herron in wax, were first photographed for reference and then brushed with several layers of latex to create a mold of the wax original. This latex mold is the permanent record of the artist's original.

Next, wax is poured into the latex mold, the wax cooled, the mold disassembled, and in theory what emerges is an exact duplicate of the artist's original. However, it is never that simple.

The wax replica must be transferred to the secondary wax room where technicians, who are artists in their own right, refine and perfect the wax, constantly comparing it to the original in the photographs.

Once the technicians are satisfied that the secondary wax is indeed identical to the artists original, it is fitted with a system of tubes, or sprue...
HOLIDAY CLASSIC TROPHY

gates, which serve as ducts for the molten metal and escaping air. This insures that when the bronze is eventually poured into the mold, it will flow evenly through the piece and into any extremities.

From the secondary wax to a secondary mold. From this wax replica of the artist’s original a silica and sand shell is created by dipping the replica first in a liquid silica and then into several layers of sand. Once the shell is thick enough, the entire piece, which now looks like something that has just been washed ashore, is placed in an oven. The wax, which is sealed inside the shell, is heated and runs out. Thus, the lost wax.

This empty sand shell is then reheated, molten bronze poured into it, the shell broken, and the bronze and metal allowed to cool, then the trophy is revealed.

At last! But not finally.

For now it must go back to the technicians for refining and finishing.

The sprues, which are now made of bronze, must be removed along with any imperfections, such as air bubbles or cracks. Once again, the technician works from the photographs to insure the accuracy of even the smallest detail.

The entire piece is then heated with a torch until it is so hot it actually glows, and a chemical compound is sprayed onto the surface to achieve the finish, or patina.

Finally the piece is baked with a wax coating and then mounted, which brings to an end an estimated 150 man hours in the casting of one bronze trophy.

The winning team and most valuable player at this year’s Champion Holiday Classic will not only be taking home a trophy for their team and school, they will be earning a unique and valuable work of art, the likes of which will not be seen until the process begins again next year, when the second in the series of trophies is cast.

Winner is a Word That Can be Associated With The 1st Annual Champion Holiday Classic

by DAVE GUFFEY
UM Sports Information Director

Winner is a word all athletic teams like to be associated with — and the participants of the 1st Annual Champion Holiday Classic — Montana, Maine, Gonzaga and Murray State — are all just that — winners.

All four teams playing in the tournament had winning seasons last year. Three teams have winning marks thus far in this young stanza of the 1980-81 season.

"These are four quality teams," said Montana's third-year coach, Mike Montgomery. "All of the teams are similar in that they are well-coached, and they play to their abilities. I think all four games will have equal match-ups."

Maine, Montana's opening-round opponent Friday, Dec. 20, is 3-2 thus far this year. The Skip Chappelle-coached Black Bears were 15-13 overall last season, and have three starters and five lettermen back from that team.

Maine's two losses were to two top-notch teams. They lost their opener 66-57 to 12th ranked Texas A & M, and the other loss was on the road to the University of Connecticut (55-51), a team picked as a possible NCAA qualifier by many prognosticators.

The Black Bears run a “three guard” type of offense. Maine's starting lineup is not too tall at 6-6, 6-6, 6-5, 6-2 and 6-1; however the team is shooting a lofty 57.5 percent from the field, and that kind of shooting makes up for any lack of height.

Four Maine players are scoring in double figures. The team is led by sophomore guard/forward Rick Carlisle, who is averaging 15.2 points a game. He was the ECAC/North Rookie of the Year last season, when he averaged 12.3 points a game.

Maine has changed its look a lot from last season. The team lost high-scoring Rufus Harris to graduation. Harris rewrote the Bear's record book last season, averaging 25.6 points a game. He led his team in scoring in 26 of 28 games, scored 36 points in five games, and was the final cut of the National Basketball Association’s Boston Celtics.

Maine's team oriented concept, very similar to Montana's can be seen in the teams' 114 assists in five games. In five games Maine has three different leading scorers. Seven players see a lot of playing time.

"We are looking forward to our next encounter with Montana in Missoula," said Maine coach Chappelle. "I think it will be a fine tournament. I am very pleased with our play to date. I thought it would take us longer to play as a unit, since we have six new players."

"We've been doing what we have to do very well," he continued. "We are very small, and cannot afford to toss the ball around. We don't like to take a shot unless it's a good one, and we've been doing pretty well to date."

Other starters for Maine, and their scoring averages: Jim Mercer, 6-2, G-15 points a game; Gary Speed, 6-1, G-4.8 ppg; Clay Gunn, 6-6, C-10.6 ppg and 9.2 rebounds a contest; and Dave Wyman, 6-6, F-4.8 ppg.

Montana is led by guard Craig Zanon, who is scoring 16.3 points a game, and shooting 66 percent from the field. He is ranked in the top 20 in the nation in that category. Zanon is also shooting a lofty 93 percent from the line (38 of 41). He has led UM in scoring in four of its games.

Lead guard Blaine Taylor, the team's No. 2 scorer (9.7), will (continued on page 13)

miss the tournament with a knee injury he suffered in the Eastern Washington game. He might play in the KOA in Billings Dec. 29-30, and Montgomery said he hopes to have him ready for the Big Sky Conference opening weekend, Jan. 9-10.

Other tentative starters and their averages: Craig Larsen, 7.1 points and 4.7 rebounds a game; Derrick Pope, 9.0 points and 2.6 rebounds; Rod Brandon, 6.7 points and 3.7 rebounds; and guard Marc Glass, is averaging 3.3 points a game.

Marty Green is leading the team in rebounds with 38, and he is followed by Zanon with 36, Larsen with 33 and Tim Knight with 32. Taylor was leading the team in assists with 32.

“Maine is a very patient, pass-oriented team that takes the good percentage shot,” said Montgomery. “They display a lot of ball control. Carlisle is a very good player, who can do a lot of things. Mercer is outstanding outside shooter.”

“Our defense is coming along, and we’ve got to keep improving with every game,” Montgomery continued. “Offensively, we still need to show more patience, but we’re getting there. I expect four close, tough ball games in the tournament.”

Montana, 5-2 thus far this season, has won three straight games, and both of its games on the road. The Grizzlies leave for Nebraska Monday, Dec. 22 for a game with Nebraska the following day.

The second game tonight pits the Murray State Racers against former Big Sky conference member Gonzaga.

Murray State of Murray, Kentucky, was 23-8 last season, and narrowly missed making the finals in the NIT tournament in New York, losing by two points to Illinois on the road. A victory would have given them a trip to the prestigious postgame tourney.

The Racers are currently 3-2, but their losses have been by Indiana and Arkansas State, two good teams. They led Indiana 33-30 at halftime.

The Bulldogs of Gonzaga are 2-3, with losses to No. 1 ranked DePaul, Idaho (73-69) and Washington State.

Gonzaga was 16-11 overall last season, and 10-6 in the West Coast Athletic Conference, good for a second place tie. The Bulldogs return two starters and eight lettermen (compared to four starters and five lettermen for the Racers).

The incredible thing about Murray State was not that it defeated Jacksonville and Alabama on the road in its quest for the NIT — but that the Racers were 4-22 the previous season.

Racer coach Ron Greene was honored by his team’s efforts, being named the conference and NABC District 7 Coach of the Year. He was also nominated as a candidate for the national coach of the year.

MSU’s leading scorers are Mont Sleets (14.8) and Kenney Hammonds (15.0).

Gonzaga coach Dan Fitzgerald’s top scorers are guard Don Baldwin (12.0) and forward Tony Sheen (10.6).

Gonzaga has been hampered with a lack of opportunities from the free throw line. Opponents have had 37 more free throw attempts.

Murray State’s lineup is quick, but not too big at 6-6, 6-5, 6-3 and 5-10, and is being outrebounded by more than three per game.

GEOLGY IN THE VERNACULAR
IS DAVID ALT’S SPECIALTY

By Kathy Mensing-Rehbein
UM Publications and Media Relations

Raindrop splash, earthworms, and meandering streams. More than subjects of prose poetry, they are forces that affect the topography around us. And they are the major topics of discussion in University of Montana Professor David Alt’s introductory course to geology. “Science is not so difficult that people on the street can’t understand it,” he said in a recent interview. “There’s nothing sacred about it. Students just find it difficult when science is placed in jargon. But most scientific ideas can be taken from jargon and and put into the vernacular.”

So Alt draws teacups on the overhead screen while as many as 300 students watch. When a drip of liquid falls into a cup of tea, he explains, a splash forces small droplets to spray over the sides of the cup and onto the saucer. So it is with raindrops falling from the sky, splashing droplets of mud in all directions as they hit the earth. Believe it or not, over time a raindrop splash moves enough mud to be considered a geologic force.

This is geology in the vernacular. Though the practice is not always appreciated by academics, Alt has made it his hobby to bring geology out of the ivory tower. And, he is one of the few scholars working to bring science down to the level where it is interesting to large numbers of people. He and UM colleague Donald Hyndman have written three books on “Roadside Geology,” pointing out formations visible from the roads of Western Montana and Northern Idaho, Oregon, and Northern California. The books have been selling well since the first one, “Roadside Geology of the Northern Rockies,” was written in 1972.

“In geology, the subject just surrounds us,” Alt said. “But go to any book store; you’ll find dozens of books on birds, trees, wild flowers, stars, everything you can think of except geology. Or at least it was that way until we started writing books. Those books on rocks and minerals just don’t pack it, because geology is a local affair.”

And what could be more local than discussing Glacial Lake Missoula’s 35 shorelines that are visible as horizontal lines on Mount Sentinel? Or the black stripes (basalt dikes) and fossilized mudcracks, ripple marks, and raindrop imprints in the roadcuts of Prickly Pear Canyon near Wolf Creek? Or the ponds around Ninepipes National Wildlife Refuge north of St. Ignatius that were formed by large blocks of ice that melted after the last ice age?

Judging by the demand for the “Roadside Geology” books and for Alt and Hyndman’s geologic guide to Glacier Park, more and more people are appreciating popular geology. In fact, though the two authors are working on another book, on Washington’s roadside geology, they can’t keep up with the demand. The publisher has asked other authors to expand the series, covering Colorado, Texas, New Mexico, Arizona, Utah, and Wyoming.

Alt said his time for the past few years has been taken up by the “all-absorbing process” of writing a college-level introductory geology textbook scheduled to be out late next year. He said he’d like to title it “Rocks I Have Known,” but the publisher wasn’t really hot on the idea.

In addition, Alt writes a non-technical geology column in the bi-monthly Montana Magazine. He also serves on the Missoula County Planning Commission.

Besides teaching and writing, Alt pursues his hobby in other ways. He and Hyndman, as a public service, have agreed to suggest sites for potential natural landmarks to the Heritage Conservation and Recreation Service. (“That used to be the Park Service,” he said, “until President Carter came in and simplified the bureaucracy.”)

“We have no say as to whether they are included in the national landmark system,” Alt said. “Our suggestions will just be fed into one end of the bureaucratic machine. It will churn for a couple of years. Then something will poop out the other end.”

Sites that Hyndman and Alt will suggest include Chief Cliff on Flathead, Chief Mountain near the east end of Glacier Park, Sun River Canyon near Augusta, Kootenai Falls between Libby and Troy, Rainbow Lake north of Plains, Square Butte near Great Falls, and about 200 others.

Alt laughs when he admits that he has become somewhat of a celebrity. “I don’t know how many thousands of students have gone through my 101 classes, and they all know me. I don’t know them, but they know me. One time my wife and I were driving down a street in Saussilito, California, and these people flagged us down. They had taken my class and they recognized me. I was living on a houseboat, and nothing would do but that we had to go down and see their houseboat.”

Even when he enters the state prison yard at Deer Lodge to teach extension courses to the inmates, Alt said, some of the prisoners recognize him from when they took a class at the university. “It’s crazy. I’m known inside the pen and out.”

But while Alt’s techniques and humor have inspired many, he said others have a difficult time appreciating the wonders of rocks, and some of his projects have produced “grass roots groundswells of apathy.”

But nor do those so inclined, understanding for the first time the meanders of a stream or the folds of a rock, or hearing of the volume of earth a worm moves gives a great appreciation for the landscape, which is, after all, “geology with trees growing on it.”

Al Manuel ....................................................................... Rebounds
SueLynn Williams ......................................................... Play-by-play (typist)
Joel Lundstedt ............................................................. Spotter
Dale Wyman ................................................................. Minutes played
Welcome to Missoula The “Garden City”

WELCOME TO MISSOULA! A friendly town protected by a ring of mountains, breathtaking in its beauty, cultural in its taste, and a place we hope you will return to.

The “key to the city” is yours and the “red carpet” is out. Make yourself at home, we’re glad to have you here.

MISSOULA is located 100 miles from the Idaho border at the junction of Interstate 90, U.S. Highways 10, 12, and 93, and Montana Highway 200. These same crossroad attracted the original settlers over 120 years ago. Five valleys open into the Missoula basin and make Missoula an exciting city of 70,000 with a trade area of 150,000.

Nestled at the base of Mount Sentinel the University of Montana has an enrollment of 8,800 students from throughout the world. The faculty is exceptional with 72% holding a Ph.D. degree. The University heritage includes a Pulitzer Prize winner, twenty-three Rhodes scholars, a Nobel Prize recipient, and countless honors bestowed on its students for excellence in many fields. The Maureen and Mike Mansfield Library on the University of Montana campus is a source of pride to Missoula and Montana.

MISSOULA is one of the fastest growing cities in Montana. We are striving to maintain the best of all worlds... the flavor of a small town with the advantages of a city.

We know you will enjoy Missoula’s Magic, where else within a short distance from a business center could you find wilderness areas, mountain lakes, ranches, fishing streams, and other recreational opportunities for all ages.

ICE SKATING

HUNTING
Planting seeds for the future in Montana.

Champion is big on Montana.

Nearly 700,000 acres of timberlands, a wood products complex at Bonner, a half-dozen sawmills, and the pulp and paper mill at Frenchtown make Champion's investment in Montana an important one.

But what makes it more important still are the 2,500 Montana and Idaho Champions—our employees, your neighbors and friends.

Champion is in Montana to stay.

Montana is important to Champion; Champion is important to Montana. We're here to create the future. We've opened our new Plains. We're reforesting 3,500 acres and placing 15,000 acres under intensive management. We're modernizing wood-converting facilities. And expanding our pulp and paper capacity.

Champion and Montana: a partnership.

We're working hard to build our future here. But we can't do it alone; no company operates in a vacuum. We must all interact successfully with the people, the society, and the governments around us. Creating the future that's best for all of us is up to each of us.
