<sup>^</sup> Expenditures may appear lower than typical costs in these categories because they are averaged across all visitor groups.

<sup>^^</sup> These figures represent the number and percent of visitor groups who actually spent money in each category. The dollar values are reflective of the actual average amount spent per category.

Spending data are gathered via on-site surveys of nonresident travelers at airports, gas stations, and rest areas in MT. Travelers report 24 hours worth of trip expenditures.

<sup>1</sup>Visiting friends and/or relatives. <sup>2</sup>Mean, or average, is the sum of the values divided by the number of values. <sup>3</sup>Median is the middle value in a string of numbers, with half of the values higher, and half lower than the median value.

\*Small sample size, use with caution.
