August 11, 1956

Professor S. E. Hollingworth, M. A., D. SC., F. G. S. (Fellow of the Geological Society), of University College London, spent a day at the Montana State University Biological Station at Flathead Lake this week, James W. Gebhart of the MSU faculty reported. During his stay in Montana he also took a field trip to the bison range at Moiese with the members of the Conservation Workshop that is in session at the station.

The noted geologist is a specialist in glaciers, Gebhart said. Professor Hollingworth, accompanied by his wife, is enroute to the International Congress of Geologists, which will be held in Mexico City in September.
