... DECsystem-10 COMPUTER--Cooperation of UM faculty and staff is requested by UM Computer Center Personnel in converting computer programs from the IBM 1401 to the new DECsystem-10 Computer. Because there are more than 200 programs (more than eight years of work) to be converted from the old IBM 1401 Computer to the new $640,000 DECsystem-10, only those program changes which the University is compelled to make can be made at this time. "I estimate that we will have to abide by the above policy for 12 to 18 months," said Dr. Frank Greenwood, UM Computer Center director. "Otherwise the resulting inefficiencies may very well prejudice the concept of doing both the administrative and academic computing on the new machine. With patience and discipline on the part of our computer users there is no question that we can make the new computer do both administrative and academic work, but it will take a little time." Requests for program changes should be submitted to Dr. Greenwood, room 209, Main Hall. Dr. Greenwood will present the proposed changes to the UM Computer users Advisory Committee for consideration. .

... BEAR PAWS AND SPURS--Members of Bear Paw's and Spurs, sophomore service honoraries for men and coeds, respectively, will meet at 6:30 p.m. Tuesday (Nov. 21) in the 360 series rooms of the U Center. .

... All are invited to bring a friend.

CAMPUS BRIEFS

IFC DISBANDS -- At a recent meeting of the UM Interfraternity Council, the eight presidents representing UM fraternity chapters decided to dissolve the IFC because the organization no longer served the needs of the local council. The move was made in an effort to end the alienation of the fraternities from other segments of the University community, according to one of the men attending the meeting. IFC was dissolved on an optimistic note when it was announced that the number of new fraternity pledges this year at UM exceeds the number of men who pledged local chapters last year. There were 110 new fraternity pledges at UM as of Nov. 10 compared with about 90 last fall. Both of the totals include returning students as well as freshmen. FIRE AT UM--A fire of undetermined origin badly damaged a metal University warehouse and destroyed some of its contents about 10 p.m. Tuesday. The blaze was discovered in UM Building 85, east of the Harry Adams Field House, by a campus security officer, who saw flames leaping from the center of the roof of the structure. Local firemen extinguished the fire. Contents of the 85-by-200-foot structure included a lumber storage area and carpenter shop, a paint shop (excluding bulk paint storage), upholstering shop, storage areas for glass and Venetian blinds, laundry and boiler rooms, several offices and two custodial supply storage rooms. J. A. Parker, director of the UM Physical Plant Department, said the fire moved south, down the central corridor of the building, evidently from the central part of the warehouse, and destroyed a section of the mezzanine storage area above the main floor. Parker said much of the building is beyond repair. The fire marshal is trying to determine the cause of the blaze. Total damages, now being studied by an insurance adjuster, were not known immediately....

"Our power (4.3 kilowatts) will compare with that of the only other FM radio station in Missoula, KYSS-FM, which has 2.85 kilowatts," Hess said.
