This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
Course Description: This course is intended to provide students with hands on experience with developing technology support skills materials in the operations of local and wide area networks, computer labs electronic classrooms and videoconferencing rooms. Students will be teamed with faculty and staff to work on projects incorporating information technology into learning and teaching. We will cover networking essentials including installing software over the network, and disk imaging techniques, …etc.

Grading:
Group Projects = 100% of final grade

Projects will be announced

Plagiarism Warning: (P. 20 of the 1998-99 University of Montana Catalog)
“Plagiarism is the representing of another’s work as one’s own. It is a particularly intolerable offense in the academic community and is strictly forbidden. Students who plagiarize may fail the course and be remanded to Academic Court for possible suspension or expulsion.”
