2012 Contribution of Nonresident Traveler Expenditures to Montana's Economy

- In 2012, nonresident visitors to Montana spent an estimated \$3.27 billion in the state. (See Table 2 below)
- This \$3.27 billion in local spending directly supports \$2.64 billion¹ of economic activity in the state, and supports an additional \$1.59 billion²⁺³ of economic activity, indirectly.
- The total contribution of nonresident spending to Montana's economy was \$4.23 billion⁴ in 2012.

Table 1 - 2012 Economic Impact	Direct	Indirect	Induced	Combined

Employment (# of jobs)	29,750	6,550	6,600	42,900

Direct impacts result from nonresident traveler purchases of goods and services; **Indirect impacts** result from purchases made by travel-related businesses; and **Induced impacts** result from purchases by those employed in travel-related occupations.

Industry Output is the value of goods & services produced by an industry which nonresidents purchase. **Employment** is full- and part-time average annual jobs. **Other Property Type Income** consists of payments for rents, royalties and dividends.

* **CHANGE:** The IMPLAN data set *now* incorporates state-level BEA TOPI (taxes on production and imports) data, *rather than* using U.S. data to produce state-level estimates, as was done in previous IMPLAN data sets. Comparison to previous years is not advised.

⁵Data is collected quarterly. Therefore, avg. daily expenditures are weighted averages of quarterly figures. ⁶Expenditures may appear lower than typical costs in these categories because they are averaged across all visitor groups. ⁷Expenditure category totals may not add to year total due to rounding.
