This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
THE UNIVERSITY OF MONTANA – MISSOULA
COLLEGE OF TECHNOLOGY
DEPARTMENT OF RADIOLOGY TECHNOLOGY

COURSE SYLLABUS

COURSE NUMBER AND TITLE: RAD 122T Radiographic Imaging

DATE REVISED: Fall 2005

SEMESTER CREDITS: 2

CLASS HOURS: Friday 8:10 – 10:00

PREREQUISITES: SCN 119N Anatomy and Physiology, CRT 101 Intro to Computers, MAT 100 Algebra, RAD 110T Medical Imaging, RAD 111 T, RAD 121 T, RAD 131 T

Faculty: Anne Delaney
E-Mail: Anne.Delaney@mso.umt.edu
Phone: 243-7809
Office: AD05
Office Hours: By appointment

RELATIONSHIP TO PROGRAM: Students will learn the detailed imaging techniques of computerized imaging. Special imaging techniques such as MRI, CT Mammography will be included in this imaging course. Course will offer more detailed cross sectional anatomy.

COURSE DESCRIPTION: Content of the class is designed to establish students with a knowledge base in more sophisticated imaging techniques found in advance imaging procedures.

STUDENT PERFORMANCE OUTCOMES:
Upon completion of this course, the student will be able to:

1. Discuss flat panel detectors used in digital electronic x-ray equipment.
2. Differentiate between quality improvement/management, quality assurance and quality control.
3. List the benefits of a quality management program to the patient and to the department
4. List elements of a quality management program and discuss how each is related to the quality management program.
5. Identify various types of computers
6. Define analog to digital conversion and digital signal processor.
7. Identify various terms related to computer fundamentals and components.
8. Describe major functions of central processing unit (CPU).
9. Differentiate the various types of software.
10. Identify various terms related to computer care and preventive maintenance.
11. Explain computer operation.
12. Distinguish between analog computers and digital computers.
13. Discuss application of various types of software.
14. Explain the following computing applications as they relate to radiology:
   Radiologic information systems (RIS), hospital information systems (HIS) and
   picture archiving communication systems (PACS).
15. Define digital imaging and communications in medicine (DICOM),
16. Discuss the impact the internet has on the distribution of health information.

**STUDENT PERFORMANCE ASSESSMENT METHODS AND GRADING PROCEDURES:**

**Grading scale:**
- 100-90 A
- 89-80 B
- 79-70 C
- 69-60 D

Total grade will be determined by total points received on homework, tests, final paper and final exam.

Tests: 40%
Paper: 30%
Final Exam: 30%

100%

**Instructions for Semester Paper:** The paper for this course will be a group paper. Students will choose a topic about the specialized areas in radiography such as CT, MRI, Mammography, PACS administration etc. Papers must include research about the specialty, educational opportunities, job market, average wage associated for the specialty and what credentialing is available for the specialty. Give me your topic in writing no later than Friday, September 16, 2005. Groups of 4 will be determined on the first day of class.

Papers will be type written, double spaced and 6 to 10 pages in length. Use 12pt font and one inch top and bottom margins. This paper is to include a reference and bibliography page in addition to the 6 to 10 pages. Pictures and diagrams are to be included in an appendix and referenced to in the body of the paper they are not to be included in the 6 – 10 pages. Papers will be presented on and Friday December 2, 2005.

The purpose of the presentation is to instruct fellow students, provide opportunity for discussion and to gain confidence in presenting ideas and information. Please send me an electronic copy of your paper prior to the day you are presenting and give me a hardcopy directly following your presentation.
Papers will be graded for content, interest, attention to detail, correct grammar and punctuation. Plagiarism will not be tolerated; if you are quoting a source you must reference it. Papers found to be plagiarized will be reduced by 20 points. Use of previous papers written by a student and turned as new material will be considered plagiarized.

**Note:** Students must pass this course with a “B” (80%) in order to continue with the Radiology Technology Program the next semester.

**ATTENDANCE POLICY:** All students are expected to come to class each day, on time and prepared by having read the required chapters. Class participation is expected and may impact grades that are borderline.
