Resolution Concerning Wireless Technology on Campus

Whereas, despite the fact that excessive money is being spent for wireless, there are few students able to use the service due to proprietary formats,

Whereas, by requiring the Cisco VPN we are excluding a large majority of students,

Whereas, the current set up includes too much money being spent, forcing people to buy a Cisco Wireless Network Card,

Whereas, too many layers of unnecessary and breakable security, preventing the majority of users from access wireless on campus,

Whereas, a student may buy a $3000 laptop with wireless capabilities and the machine is completely unable to use wireless without having to invest another $100 to $150 in a Cisco Wireless Network Card,

Whereas, this process would also allow cheaper implementation on campus and a greater coverage of area, including buildings not previously considered for wireless due to cost,

Therefore Let It Be Resolved to use open standards based security as opposed to proprietary closed standards,

Let It Be Further Resolved for CIS to enable necessary security, without technologically alienating students, by requiring MAC address verification from student computers,

Let It Be Further Resolved for using WPA as opposed to LEAP, PEAP or other proprietary forms of security will allow greater access to the wireless network,

Let It Be Further Resolved that a copy of this resolution will be issued to both Chief Information Officer Ray Ford and President Dennison urging both parties to reconsider current standards and adopt this proposal.
