COURSE PHILOSOPHY, CLASS PEDAGOGY, AND LEARNING OBJECTIVES

Learning is more than memorizing facts and answering questions on a test. It is the process of enhancing your ability to use information to understand of how things work and how to make them better. This course will enhance your ability to:

- Ask the right questions
- Frame good problems.
- Acquire information.
- Evaluate sources of information.
- Critically investigate & solve problems.
- Make choices among alternatives.
- Explain abstract ideas to others.
- Generalize to new situations.

Pedagogy

The structure of this course is influenced by a taxonomy of cognitive skills developed by Benjamin Bloom. He identified six steps to the learning process students must complete to master a subject and organized them into a pyramid (see figure at right) to show how more complex skills developed on a foundation of simpler ones. In this course, students will focus on remembering and understanding concepts outside of class, while in-class time will be focused on the application of concepts.

Learning Objectives

Bloom translated his taxonomy into discrete and measurable actions called learning objectives, which are statements that start with an action (verb) associated with the intended cognitive skill and end with an object that describes the knowledge students are expected to acquire or construct. Learning objectives have been developed for each topic based in this course and are the basis for all instruction and assessment.

Student Responsibilities

This learning philosophy imposes upon students the responsibility to:

1. Review the learning objectives for each topic.
2. Complete all assigned readings and exercises before class.
3. Ask the professor for assistance if they difficulty with specific learning objectives.
4. Attend class regularly, but only when they are fully prepared to participate.
5. Complete all course assignments by their deadlines (Late work is not accepted).
6. Review all feedback from the instructor, including feedback posted online.
7. Ask for clarification if instructions or feedback are not fully understood.
8. Finish the class (University policy on incompletes will be strictly enforced).
9. Inform the instructor beforehand if they cannot fulfill these responsibilities.

CLASS POLICIES

Academic Misconduct

All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or disciplinary sanction by the University. All students need to be familiar with the Student Conduct Code, which is available for review online at: <http://life.umt.edu/VPSA/name/StudentConductCode>.

Students with Disabilities

If you have a disability and feel you need accommodations in this course please present me with a letter from Disability Services for Students (DSS), Lommasson Center 154 (243-2243), indicating the existence of a disability and the suggested accommodations.

COURSE REQUIREMENTS (% OF FINAL GRADE)

The following paragraphs outline the requirements for this course. Detailed information on each can be found on Moodle.

Midterm: 9/11 Analysis and Online Exam (25%). The midterm in this class is divided into two parts. After reading the *The 9/11 Report*, students will write a 5-page midterm paper analyzing the process and structure of decision-making in AFP. Students will also complete an online midterm exam that asks five randomly selected questions based on the learning objectives listed on Moodle.

Policy Memo and Library Research Assignment (2.5%). This preparatory assignment that models the research practices needed when writing policy memos.

Learning Group Policy Memos and Presentations (40%). Students will be assigned randomly to learning groups of 3-4 students to work on five problems related to AFP. For each problem, groups must (1) define a specific policy problem to address and (2) write a policy memo recommending a solution to the problem. Twice during the semester, groups will also give a seven minute presentation on their problem/solution. Groups will share their grade for each policy memo and presentation, but individual grades will be adjusted using an online peer evaluation. Groups will also submit learning issues and problem statements to the instructor. They will not be graded, but incomplete or late submissions will result in a one-letter grade penalty applied to the policy memo grade.

Policy Presentations Worksheets (5%). At the end of each set of presentations, all students will submit a presentation worksheet in which they identify the recommended policies, indicate if they accept or reject the recommendation, and indicate the reason for their decision. The worksheet is due at the end of class.

Final Paper and Final Exam (27.5%). The final in this class is divided into two parts: a traditional bluebook essay exam and an individual policy briefing outlining recommendations to the President on the content of a new National Security Strategy.

Peer Evaluations. After each group assignment, students will complete an online peer evaluation awarding a share of the final product to each group member besides themselves. Students earning a higher or lower average share will have their grade adjusted. Students must complete their peer evaluations to receive credit for the policy memo being evaluated. Full details are available online.
