This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
THE UNIVERSITY OF MONTANA-MISSOULA
COLLEGE OF TECHNOLOGY
RESPIRATORY CARE PROGRAM

COURSE SYLLABUS

COURSE NUMBER AND TITLE:  RES 129T Patient Care and Assessment

DATE REVISED:  Fall 2006

SEMESTER CREDITS:  3

CONTACT HOURS PER SEMESTER:
  Lecture hours per week:  3
  Lab hours per week:  2

PREREQUISITE: Completion of Health Core requirements, acceptance into the
Respiratory Care program or permission of instructor.

FACULTY:
Bob Wafstet
Robert.Wafstet@umontana.edu
243-7821 (office)
Office:  Bldg. HB
Office Hours: TBA

RELATIONSHIP TO PROGRAM:
This program offers the students the opportunity to develop fundamental knowledge of
nursing skills related to patient care.  It provides the basics of patient assessment which is
an integral part of any health profession program.

COURSE DESCRIPTION:
Introduction to nursing-related knowledge and skills with an emphasis on application of
Microbiology to aseptic technique.  Assessment of the respiratory system along with
cardiopulmonary diagnostic and laboratory test interpretation are covered.  Medical
terminology is integrated throughout this course.  Peer and instructor review of selected
clinical competencies are studied in a laboratory setting.
STUDENT PERFORMANCE OUTCOMES:
Upon completion of the course the student will demonstrate:

1. Knowledge of universal precautions.
2. Proper hand washing, gowning, gloving, and masking techniques, as well as procedures for moving patients.
4. Knowledge of response of the body to infections.
5. Knowledge of sputum collection principles.
6. Knowledge of basic body mechanics and safety procedures in the hospital.
7. Knowledge and proper techniques for taking patient vital signs.
8. Knowledge and proper techniques of auscultation, percussion, and palpation.
9. Understanding of various disorders of body systems with related use of appropriated medical terminology, abbreviations, and descriptive terms.
10. Know why specific laboratory tests are run.
11. Understand the physiological process measured directly or indirectly be each test.
12. Understand the clinical implications of laboratory findings.
13. Know normal test values.
14. Understand what test results indicate.
15. Interpret blood gases.
16. Knowledge of sleep disorders and discuss assessment to be applied to clinical experience.
17. Have a basic understanding of X-ray interpretation.

METHODS OF INSTRUCTION:
Lecture, reference reading, demonstration, group discussion, and laboratory participation.

STUDENT ASSESSMENT METHODS AND GRADING PROCEDURES:

Students in the Respiratory Care program must have a “B” final grade in order to progress within the program. Test questions will be based on unit objectives. Unit objectives are to be used as study guides.

ATTENDANCE:
Class attendance is an integral part of this course. The test dates are included in this syllabus. Pop quizzes will be given randomly throughout the semester. Failure for the
quizzes will result in zero being recorded and used in computing your average.
OTHER POLICIES:

Academic Misconduct:
All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the University.

All students need to be familiar with the Student conduct Code. The Code is available for review online at http://www.umt.edu/SA/VPSA/index.cfm/page/1321.

Disabilities:
Eligible students with disabilities will receive appropriate accommodations in this course when requested in a timely way. Please speak with me after class or in my office. Please be prepared to provide a letter from your DSS Coordinator.

Cell Phones/Pagers:
Due to an increasing number of students who own and use cell phones and pagers, it has become necessary to institute a policy regarding these tools during class times. As you are aware, these tools are distracting to an entire class. However, some students require them for business which allows them to further their education. Please follow these guidelines:

1. If the cell phone/pager is not business or emergency related, please turn it off.
2. Use the vibrating option on your pager.
3. Do not listen to the messages in class. Leave class quietly.
4. **Cell phones and pagers must be turned off during exam and class presentations.**

Seating:
Many classrooms have chairs to accommodate persons with disabilities. These chairs will display the international disability symbol and are assigned to a particular student. Please refrain from using these chairs or making adjustments to them unless the chair is assigned to you. If you think you may have the need for a specific chair, please contact Disability Student Services. Thank you for your cooperation.

Test/Quiz Makeup:
Make-up exams and lab experiences will only be given under extreme circumstances and them only if: a) permission is granted in advance by the course instructor, or b) a written excuse is provided by a medical doctor. The burden of proof is on the student, so you must document and prove a justifiable absence. Not following this procedure prior to the exam will automatically result in zero score being recorded. Missed tests need to be made up within one week of the original date given. You are responsible for contacting the Academic Support center to schedule the make-up. Failure to do so will result in a ZERO grade for the missed test.
The faculty senate guidelines concerning the issuance of incomplete grades will be followed. Also attention to critical dates such as P/NP, drop, etc. is in the responsibility of the student. Students wishing to drop the class after the drop deadline will need a documented justifiable reason for doing so. Dropping the class for fear of bad grade or to protect a GPA are not justifiable reasons. The principles and policies embodied in the Student Handbook Code will be adhered to in this course.

It is the expectation that homework will be turned in when due. If you are not present, it is your responsibility to see that it is in my mailbox by 4:00 p.m. on the due date or a ZERO will be recorded and used in computing your average.

REQUIRED TEXT:

**Egans Fundamentals of Respiratory Care, 8th ed.**
Author: Wilkins, et al
Publisher: Mosby

**Workbook for Egans Fundamentals of Respiratory Care**
Author: Wilkins, et al
Publisher: Mosby

**Clinical Assessment in Respiratory Care, 5th Edition**
Author: Wilkins, et al
Publisher: Mosby

**Programmed Medical Terminology, 2nd Edition**
Author: LaFleur Brooks
Publisher: Mosby

**Mosby’s Medical Nursing and Allied Health Dictionary**
Publisher: Mosby

**Basic Clinical Lab Competencies for Respiratory Care, 4th Edition**
Author: White, et al
Publisher: Mosby

Theory:
Tuesday, Thursday 8:10-10:00
COURSE OUTLINE:

I. Medical Terminology and Abbreviations
II. Spirometry and Pulmonary Function Studies
   A. Lung Volumes
   B. Lung Capacities
   C. Flow Rates
   D. Significance
   E. Pulmonary Function Testing
   F. Principles of Measurement
   G. Interpretation of Test Results
III. Safety
   A. Safety
      1. Basic Body Mechanics
      2. Patient Movement and Ambulation
      3. Electrical Safety
      4. Fire Hazards
      5. Safety Films
   B. Microbiology
      1. Classifications of Microbes
         a. Taxonomy
         b. Procaryote
         c. Eucaryote
      2. Bacterial Morphology
         a. Bacilli
         b. CocciCoccobacilli
         c. spirochetes
      3. Bacterial Staining Characteristics
         a. Gram Positive
         b. Gram Negative
         c. Acid-Fast
      4. Bacterial Growth Requirements
         a. Types of Media
         b. Practical Application
         c. Endospores
      5. Bacterial Growth
         a. Viability
         b. Generation Time
      6. Fungi
         a. Characteristics
         b. Types
         c. Systemic fungi
         d. Treatment
7. **Viruses**
   a. What are they?
   b. Replication
   c. Vaccines
   d. Pathogens
8. **Rickettsia/Chlamydia**
   a. Characteristics
   b. Types
C. **Principles of Infection Control**
   1. Clinical Aspects of Microbiology
   2. Spread of Infection
   3. Infection Control Methods
      a. Universal Precautions
      b. Hand Washing
      c. Gowning, Gloving, Masking
      d. Isolation
   4. Sputum Induction
   5. Consideration with the HIV Virus

IV. **Patient Vital Signs**
   A. Temperature
   B. Pulse
   C. Respirations
   D. Blood Pressure

V. **Patient Assessment**
   A. Inspection
   B. Palpation
   C. Percussion
   D. Auscultation
   E. Physical Signs of Respiratory Disease

VI. **X-Ray Interpretation**
   A. X-Ray Interpretation
      1. Indicators
      2. Evaluation
      3. Treatment
   B. Laboratory Tests
      1. Liver
      2. DWBC
      4. Glucose, Sed Rate And Chemistry Panel
      5. Renal
      6. Interpretation of Arterial Blood Gases
VII. EKG Interpretation
   A. EKG Interpretation
      1. Cardiac Cycle
      2. Conduction System
      3. Definition
      4. Running an EKG
      5. Reading EKG’s
   B. Assessment of Sleep and Breathing
      1. Symptoms of Sleep and Breathing
      2. Assessment
      3. Treatment

VIII. Assessment of The Geriatric Patient
   A. Assessment of the Geriatric Patient
   B. Bronchoscopy Assisting
   C. Assessment of the Home Care Patient

WEEKLY PLAN:
Lecture, demonstration, and lab experiences will revolve around the exam schedule.

INSTRUCTOR EXPECTATIONS:
Because the course has a great deal of new material, it is very important to study consistently. Some suggestions for better study are:

1. Read the unit objectives at the beginning of each chapter-find out what you are expected to learn.
2. Reading the material before class will help you understand the lecture.
3. Look up definitions to words you do you understand.
4. Attend every class and take notes but do not try to write down everything. Concentrate on concepts.
5. Review your notes as soon after class as possible make sure you can read them!
6. Study notes/material and compare with objectives.
7. Write workbook answers in your own words. This makes the material “yours.”
8. Study no more than one hour before taking a short break.
9. Relate information to prior learning/examples to develop a “picture” in your mind.
10. Ask instructor for clarification as needed during or after lecture.
11. Study regularly in a quiet place; set study hours and keep them.
13. See your instructor when you think you need help. Your instructor wants you to succeed and will have some ideas which should help.
14. Review for units exams and finals can be made easier by frequent review of chapter content reviews.
15. Be in class and don’t miss pop quizzes.
