Whereas, the University Center (UC) building is a hub on campus which thousands of students utilize on a daily basis;

Whereas, thousands of students live on campus and utilize and value various avenues for entertainment;

Whereas, Red Box video rental units provide videos at a rate affordable to students, and provide payments to the facility they are operated in;

Whereas, the UC would stand to benefit financially from diversifying their revenue streams;

Whereas, a video rental option in the UC has the potential to reduce vehicle traffic emissions of students both on and off campus;

Whereas, a video rental option in the UC could have a positive impact on student safety and responsible decision-making by younger students;

Therefore, Let It Be Resolved, that The Associated Students of The University of Montana encourages the University Center Administration to look into the feasibility of installing a Red Box video rental unit within the UC premises.
