This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
EET 234T AUTOMATIC CONTROLS
Credit: 4
Prerequisite: EET 205 Solid State Electronics I
Syllabus Last Revised: August 2013

Meetings:
   Lectures Mon, Wed & Fri 2:10PM – 3:00PM; Lab Thu 1:10PM to 3:00PM
   Classroom: HB05

Faculty Contact:
Steve Shen - steve.shen@umontana.edu
Phone: (406)243-7914
Office Hours: Monday 11:00AM to 12:00PM
               Wednesday 3:00PM to 4:00PM
               Thursday 12:00PM to 1:00PM

Location: 905 South Avenue, Griz House 8 (Modular – East side COT campus)

Final Exam:      Tuesday December 10, 2013 from 1:10PM to 3:10PM in HB05

Course Description
EET 234T Automatic Controls 4 cr. Offered autumn. Prereq., EET 205. Explores the theory, terminology and components used in automatic control of industrial machines and processes. Uses the servomechanism as a representative control system to analyze open-loop, closed-loop, proportional, integral, and differential control strategies. The use of transducers and computers in automatic control systems in the industrial control setting is emphasized.

Course Overview
This course introduces the terminology, concepts, and the fundamental methods of analysis and design of automatic industrial control systems. The course is designed to provide students with an understanding and appreciation of some of the theoretical concepts behind control system elements and operations without much need of advanced mathematics and theory. Typical topics in process control, such as analog and digital signal conditioning, thermal, mechanical and optical sensors, final control, discrete-state process control, controller principles, analog controllers, digital control and control loop characteristics, and etc. are covered in the course.

Learning Outcomes
1. To present the fundamentals of the methods of analysis and design of automatic control of industrial machines and processes.
2. To present concepts of measurement, manipulation, and control of automatic controls
in the industrial setting.

Required Materials

- Lab Manual on the CD to accompany the textbook
- EET 234T Toolkit (available in the Bookstore)

Assessment

Grades will be weighted and graded as follows:

- Homework Assignments 20%
- Attendance 10%
- Lab Exercises 20%
- Midterm Exam 20%
- Final Exam 30%

Grading Scale:

- 90-100% A
- 80-89% B
- 70-79% C
- 60-69% D

Topic Outline (subject to change)

I. Introduction to Industrial Control Systems
II. Interfacing Devices
III. Thyristors
IV. The Controller Operation
V. DC Motors
VI. AC Motors
VII. Servo Motors
VIII. DC Drives
IX. AC Drives
X. Temperature Control
XI. Process Control Methods
XII. Industrial Detection Sensors and Interfacing
XIII. Elements of Motion Control
XIV. Fundamentals of Servomechanism

Academic Integrity:

All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the
University. All students need to be familiar with the Student Conduct Code. The Code is available for review online at: http://life.umt.edu/vpsa/student_conduct.php

Using the Web to research materials and concepts is an integral part of learning in the twenty-first century. Studying with other students is a productive method of learning. A certain amount of collaborating on concepts with other students and using resources found on the Internet in an assignment is recommended. Copy and paste is not acceptable. It is expected that each student will input his/her assignment into the computer, and each student must be able to explain any assignment turned in. Collaboration on exams is strictly forbidden.

**Dropping and Adding Courses or Changing Sections, Grading or Credit Status**

University Policy for dropping courses or requesting grading/credit status changes can be found in the catalog: http://www.umt.edu/catalog/acad/acadpolicy/default.html Students should become familiar with all academic policies

**Disability Accommodations:**

Eligible students with disabilities will receive appropriate accommodations in this course when requested in a timely way. Please contact me after class or in my office. Please be prepared to provide a letter from your DSS Coordinator. For more information, visit the Disability Services website at http://www.umt.edu/dss or call 406.243.2243 (voice/text).

**Changes to Syllabi:**

NOTE: Instructor reserve the right to modify syllabi and assignments as needed based on faculty, student, and/or environmental circumstances. If changes are made to the syllabus, amended copies will be dated and made available to the class.

**Cell Phone and other Electronic Communication Devices Policy:**

All electronic communication devices must be tuned off and stowed away prior to the start of class.

**Attendance Policy:**

Regular classroom attendance is expected.

**Exam, Project, and Assignment Policy:**

All exams are to be taken on the assigned date and time. Projects and assignments are due at the start of class on the assigned date and time. Late assignments will be accepted at the instructor’s discretion. Rescheduling of an exam will be approved at the discretion of the instructor and only in extraordinary situations.

**Learning Management System:**

It is the responsibility of the student to access and familiarize herself/himself with the Learning Management System (LMS) for the course (Moodle). Access & training is available through UMOnline http://umonline.umt.edu
