HIGHER UNIVERSITY ENROLLMENT FORECAST

Advance registration figures compiled in the Montana University registrar's office continue to run well ahead of those for last year in mid-September, indicating that the University at Missoula will have a considerably higher enrollment this fall than last. The latest figures available show that 1,111 students have been accepted for admission fall quarter compared to 842 on the same date in 1957. The ratio of upperclassmen to upperclass women is exactly three to one. Among incoming freshmen, the men fail to hold such a commanding lead, but they still outnumber women by a little more than two to one.
