Abstract

This study was conducted for the Kalispell Chamber of Commerce/Convention and Visitor Bureau to provide insight into the characteristics of attendees of the 2015 Spartan Race. Paper surveys on site were completed by 423 attendees and/or participants of the event. Results show that 53% of respondents were registered participants of the event while 47% were spectators. Residents of Montana made up 48% of the respondents and of those Montana residents, 39% were from Flathead County. Out-of-county respondents spent an average of 3.43 nights away from home. Of those nights, an average of 3.41 nights were in Montana and 1.30 nights (on average) were in Kalispell. Hotel/motel/bed & breakfast/rental home purchases received the highest total dollars spent during the event. Respondents to the survey reported total spending of $159,278.00 in Flathead County. Results provide event organizers and the Kalispell Chamber of Commerce/Convention and Visitor Bureau with useful data for future event planning, making improvements to the event, event marketing/promotion, and understanding the visitor spending associated with the event.

Executive Summary

The 2015 Spartan Race attracted out-of-county Montana residents (29%) and out-of-state (52%) visitors to the Flathead County area. The attendees of the event make important economic contributions to the Flathead County area. The results of the study are worth considering for future promotion of the Spartan Race.

- 96% of visitors who reside outside of Flathead County spent at least one night away from home.
- 44% of out of county visitors reported this being their first time visiting the Flathead Valley.
- More money was spent by these out-of-county visitors in hotel/motel/b&b/rental home ($55,200.00), restaurant/bar ($40,340.00), and gasoline ($22,903.00) than other spending categories.
- 64% of respondents reported staying in a hotel/motel/b&b/rental home, followed by 15% staying in the home of a friend or relative and 10% staying in a rental cabin/home.
- Attendees were mostly travelling with family and friends (37%) or with immediate family (22%). The average travel group size was 3.35 people (travel group spending size).
- Respondents traveled with a variety of age categories in their group – the highest percentages were 25-34 years old (57%), 35-44 years old (40%), 18-24 years old (25%), and 45-54 (24%).
- Attendees heard about the event mostly from the word of mouth (68%), social media (20%), the event website (15%), email from the event planners (8%), and Television (7%).
- Overall, attendees of the event were satisfied with most aspects of the Spartan Race. The cost of the event was the thing participants and attendees were most dissatisfied with; however, 86% of respondents indicated that they would attend the event next year.

Management Implications

Survey results indicate that Spartan Race attendees are travelling from outside of Flathead County for the event. This event brings both resident and nonresident visitors to the Flathead County area, and the attendees of the event make a variety of monetary contributions while visiting.

More than half of the people who attended the Spartan Race in 2015 were non-residents with 52% coming from other U.S. states, Canada, or other countries. Non-resident visitors bring new money into Montana and make valuable economic contributions to the area. Event organizers should continue their efforts to attract non-resident visitors to the Flathead Valley area for future events.

It is recommended that the organizers review the respondents’ comments from Appendix B to gain more insight into people’s likes and dislikes of the event’s organization, location of the event, concessions available, other aspects of the event, as well as suggestions. Changes based on this input could help bring back repeat visitors to Flathead County in the future.
Introduction

A Spartan Race is the world’s leading obstacle race series varying in distance and difficulty ranging from one mile to marathon distances. In 2012, they were voted Outside Magazine’s “BEST OBSTACLE RACE.” Races are held in the USA, Canada, Europe, South Korea, and Australia. On May 9, 2015, the Kalispell Convention and Visitor Bureau sponsored a Spartan Race located at Averill’s Flathead Lake Lodge. This was the second year the event was held at this location.

This event is organized by the Kalispell Chamber of Commerce/Convention and Visitor Bureau. The Kalispell Chamber of Commerce works to improve the business environment for the Kalispell and Flathead area community. Kalispell’s Chamber has been around since 1904 and is committed to strengthening the economic opportunities for the greater Kalispell area.

The purpose of this study was to provide the organizers of the 2015 Spartan Race with an understanding of the characteristics of participants and spectators of the race, visitor spending in Flathead County, and levels of satisfaction with different aspects of the event.

Methods

Surveyors intercepted participants and spectators for on-site completion of the survey. Surveys were given to people by random selection in an attempt to represent the attendee population. People willing to fill out the questionnaire were asked the beginning of the questionnaire (Q1-Q11) by a data collector and then given the clipboard, pen, and survey to complete (starting with spending questions through the end of the questionnaire).

No documentation of the number of refusals was recorded.

Limitations

As in all research, there are limitations to the study. Limitations for the Spartan Race study include the following:

- Data was collected by Kalispell area volunteers and employees who received training from ITRR’s survey contact person at the Kalispell Chamber/CVB on how to intercept people and how to obtain completed surveys.
- ITRR personnel were not present during the data collection for quality control.

Results

Of the 423 valid responses to the residence questions, 48 percent (202 people) were from Montana and 52 percent (221 people) were from out-of-state, Canada, or another country (see Tables 1 and 2). Twenty-one U.S. states and four Canadian provinces were represented. Of all Montana respondents, 39 percent (79 people) were from Flathead County while 61 percent (123 people) were from other Montana counties.

The mean age of respondents was 39 years old. Of those who were from outside Flathead County and responded to the survey, 96 percent reported that they spent at least one night away from home. Of those nights spent away from home, the greatest percent of respondents (38 percent) spent two nights in Montana. The mean number of nights spent in Kalispell was 1.30 nights. The mean number of nights spent in other Flathead Valley locations was less than one night. A full breakdown of nights spent as well as results of all other questions in this survey can be found in Appendix A.

Expenditures

Spending information was asked of event attendees (participants and spectators) who reside outside of Flathead County. The survey asked that they report their best estimate of the total amount of money they and their family/travel group (if applicable) spent in the Flathead Valley area in the following categories: accommodations, restaurant or bar, groceries or snacks, gasoline, transportation, auto rental, retail goods, and entertainment or recreation.
Table 3 presents the expenditure data of only the non-resident respondents (those who reside outside of Flathead County) who reported spending money in the categories. The mean expenditure of those who spent money for each category can be found along with the percentage of people who reported that they spent money in that category. The last column provides the total dollars spent by those respondents in each category. The total reported expenditure for respondents who spent was $159,278.00.

Event was the best Spartan race we have been to.
Every turn is more money.
Exhausting
Expensive
Expensive for spectators.
Expensive registration.
Fees for switching from sprint to beast race (had to pay insurance twice).
First time nothing to complain about.
Foe the best the said 12-13 miles and at mile 13 they said it was still 2 miles. It was depressing.

Too many people.
Too long.
Training
Trying to buy Spartan (Reebok) all terrain shoes in Canada only a few Reebok stores or online could I get them.
Two places where it was not clear where to go. Many people had this happen. Completely unacceptable for the cost of this race.
Unclear signage about what events were in what order. Maps not always near by
Very difficult to get photos/official photos of self.
View of races.
Viewing of the event.
Water at all stations.
Would be nice to see a few more events.

Q25. What suggestions do you have for improvements to the event?

2 sets of restrooms on-site.
A better map for the start and finish.
A few separate restrooms areas (not all located in one group).
A little more trail.
A Montana super would be awesome!
A super.
All is very smooth.
Allow spectators to go further, after all they do sign a waiver!
Announce event to local restaurants.
Avenue with more parking?
Awesome event.
Bathrooms more spread out.
Bathrooms need to be more spread out!
Better bathrooms.
Better communication with staff and volunteers.
Better directions and instructions for participants online and at the event.
Better introductions and signs to locate activities.
Better parking.
Better parking/more concessions.
Better signs for vehicles.
Better spectator paths.
Better trail marking.
Board with the race course.
Campfire for morning group. It was realllly cold.

Starting today

Stay as is.

Structure of [timing]

Tables/chairs for food booths.

Tailgating option.

Tell NBC to be more organized so they don't hold up the open heats.

The event shouldn't be on mothers day weekend.

Time board at the end that shows the start and finish time of each racer. (start at 9:15-- finishes at...)

Transportation for physically challenged.

Viewing.

Warm water for showers!

Warmer

Warmer :)

Washrooms by the entrance.

Water stations

Way to track racers on the course so we can plan for photos and not miss them. Porta-potties distributed- harder for older people to go from one end to the other.
