# 2017 Economic Contribution of Nonresident Travel Spending in Montana Travel Regions and Counties

---

Kara Grau, M.S.

10/1/2018

Nonresident travelers spend over \$3 billion in Montana each year. This report looks at how the money spent is distributed across the six Montana travel regions, as well as 14 of the 56 counties in the state which receive the highest spending.

# 2017 Economic Contribution of Nonresident Travel Spending in Montana Travel Regions and Counties

2018

## Abstract

Money spent by those traveling in Montana has an effect directly on the businesses where spending occurs, and it ripples throughout the state's economy from there. Statewide, spending by nonresidents (averaged over two years) totaled \$3.24 billion. This report details the methods and results of the economic impact analyses for each of Montana's travel regions, as well as analyses for counties in which nonresident travelers spent approximately \$50 million or more.

## Executive summary

Nonresident travelers spent \$3.24 billion throughout Montana during 2017 (estimate is an average of 2016 and 2017 nonresident spending). This was an increase (2.6%) from the previous year's spending estimate of \$3.16 billion (2015-2016 average).

- Glacier and Yellowstone travel regions received the highest percentage of nonresident spending, 33 and 29 percent, respectively.
- Of the 56 counties in Montana, Gallatin (\$660 million) and Flathead (\$531 million) Counties had the highest amount of spending.
- Fourteen counties had high enough nonresident traveler spending (~\$50 million or greater) to allow for an economic impact analysis, the results of which are presented in the report.

# 2017 Economic Contribution of Nonresident Travel Spending in Montana Travel Regions and Counties

2018

## Introduction

Nonresident spending is a significant contributor to Montana’s economy. Money spent by those traveling to and through the state has an effect not only on the businesses where spending occurs, but it ripples throughout Montana’s economy, both locally and regionally. Economic impact analysis allows us to observe the direct and indirect effects of the money spent by nonresident travelers in terms of the economic activity supported by this spending, and the number of jobs and labor income attributable to this spending, as well. This report is comprised of a collection of economic impact analyses for each of Montana’s six travel regions, as well as 14 of the 56 counties in the state.

## Methods

### Expenditure Data

Nonresident spending data is collected at the statewide level, and estimates are based on average daily spending of visitor groups and the estimated number of visitor groups to Montana each year. To estimate the total spending at the county and region level, the reported spending patterns within each expenditure category are observed for each county in the state, and the state total spending amount is allocated to the counties appropriately.

Table 1 – 2016-2017 Average Nonresident Spending per Expenditure Category

Expenditure Category	2016-2017 Avg. Total Nonresident Spending (2017 \$s)
Gasoline, Diesel	\$710,392,000
Restaurant, Bar	\$644,231,000
Hotel, Motel	\$435,456,000
Outfitter, Guide	\$321,364,000
Retail sales	\$309,669,000
Groceries, Snacks	\$241,708,000
Licenses, Entrance Fees	\$201,021,000
Auto Rental	\$107,121,000
Rental cabin, Condo	\$87,225,000
Made in Montana	\$70,853,000
Campground, RV Park	\$38,847,000
Vehicle Repairs	\$30,090,000
Misc. Services	\$24,260,000
Gambling	\$11,289,000
Farmers Market	\$3,371,000
Transp. Fares	\$1,364,000
<b>TOTAL</b>	<b>\$3,238,261,000</b>

# 2017 Economic Contribution of Nonresident Travel Spending in Montana Travel Regions and Counties 2018

The statewide total 2016-2017 average spending is presented in Table 1. For the analyses highlighted in this report, the 2016 (inflation adjusted to 2017 \$s) and 2017 county spending estimates were averaged. Doing so helps to account for small sample sizes within some counties and within some spending categories, and the variations in county spending patterns that may occur from year to year because of these small sample sizes. Figure 1 displays total spending in the counties which received an estimated \$20 million or more in nonresident traveler spending. Total spending in the six travel regions is also included.

Figure 1 - County and Travel Region Spending Estimates, 2017

# 2017 Economic Contribution of Nonresident Travel Spending in Montana Travel Regions and Counties

2018

Presented in the following figures are the estimates of spending within the various expenditure categories by nonresidents for each of the selected counties (those in which nonresidents spent approximately \$50 million or more) and travel regions. IMPLAN economic modeling software was used to estimate the economic impact of nonresident spending within each of the six travel regions. Additionally, estimates were produced for 14 of Montana's counties which had samples large enough to do so. To clarify, "nonresident spending" indicates money spent by travelers who do not have a permanent residence within Montana. It does not include Montana residents traveling within the state who may have spent money in a county other than the one in which they reside.

## IMPLAN Analysis

An IMPLAN model was created for each of the 14 counties and six travel regions. Industry sectors corresponding to the expenditure categories were used in the models, and the dollar amounts for each county and region were input into the respective models accordingly.

The following 19 figures represent summaries for the individual counties and regions. Included in each summary is the estimated two-year average spending within each category and the economic impact within the county or region of that spending. The direct, indirect, induced and combined effects are included to provide a clear illustration of the ripple effect of nonresident spending at the local or regional scale.

In some cases, the economic impact to industry output (the value of goods and service produced by an industry which nonresidents purchase) is a smaller sum than the total amount of spending in a county or region. This is to be expected. On a regional basis, and particularly at the county level, much of the money spent in the area "leaks out." Generally, fewer industries exist at the local level than at the state level. Therefore, many supplies and goods must be purchased outside the local area, and can be considered imports. Hence, the dollar amount spent will not equal the Direct Industry Output figure unless everything required to produce the goods and services purchased by nonresident travelers is available within the region. This is particularly noticeable when looking at county level economic impacts, in which case much of the money spent within a county is leakage, and does not contribute to the impact.

## Regions & Counties Included

The following regions are included in this report: Central Montana, Glacier Country, Missouri River Country, Southeast Montana, Southwest Montana, and Yellowstone Country.

The following counties are included: Beaverhead, Cascade, Custer, Flathead, Gallatin, Glacier, Lewis and Clark, Lincoln, Madison, Missoula, Park, Silver Bow, Toole and Yellowstone. Other counties totaled less than \$50 million in nonresident spending, and were, therefore, not analyzed.

# 2017 Economic Contribution of Nonresident Travel Spending in Montana Travel Regions and Counties

2018

## Conclusions & Recommendations

The reader must be aware that the estimates presented on the following pages are just that – estimates of nonresident traveler spending. It is not possible to collect actual figures of total spending by nonresidents throughout the year at each establishment, or within each industry, in the state. Therefore, estimates of spending are generated by ITRR based on both primary and secondary data. Survey data collected around the state throughout the year provide insight into average spending patterns and dollar amounts by travel groups. This data, combined with estimates of total visitation to the state, allow for the statewide, region, and county spending estimates to be produced. Sample sizes can vary from year to year within regions, as can the spending patterns of those respondents captured in the sample. This can result in significant variation year-to-year, and readers are urged to use caution when comparing the estimates in this report to any previous or forthcoming estimates of nonresident traveler spending.

<b>TOTAL</b>	<b>\$326,872,000</b>		

## 2017 Contribution of Nonresident Traveler Expenditures in Central Montana Travel Region

- 2017 average spending\* in Central Montana by nonresident visitors to Montana totaled \$326.9 million.
- This \$326.9 million in local spending directly supports \$256.9 million of economic activity in the region, and supports an additional \$136.6 million of economic activity, indirectly.
- The total contribution of nonresident spending to the regional economy was \$393.5 million.

Table 2 - 2017 Economic Impact

	Direct	Indirect	Induced	Combined
Industry Output	\$256,932,000	\$67,958,000	\$68,635,000	\$393,525,000
Employment (# of jobs)	3,490	490	590	4,570
Employee Compensation	\$69,642,000	\$15,140,000	\$17,943,000	\$102,725,000
Proprietor Income	\$12,925,000	\$4,777,000	\$3,421,000	\$21,123,000
Other Property Type Income	\$27,048,000	\$10,155,000	\$11,299,000	\$48,502,000
State & Local Taxes <sup>^</sup>	–	–	–	\$16,432,000

**Direct impacts** result from nonresident traveler purchases of goods and services; **Indirect impacts** result from purchases made by travel-related businesses; and **Induced impacts** result from purchases by those employed in travel-related occupations.

**Industry Output** is the value of goods & services produced by an industry which nonresidents purchase. **Employment** is full- and part-time average annual jobs. **Other Property Type Income** consists of payments for rents, royalties and dividends.

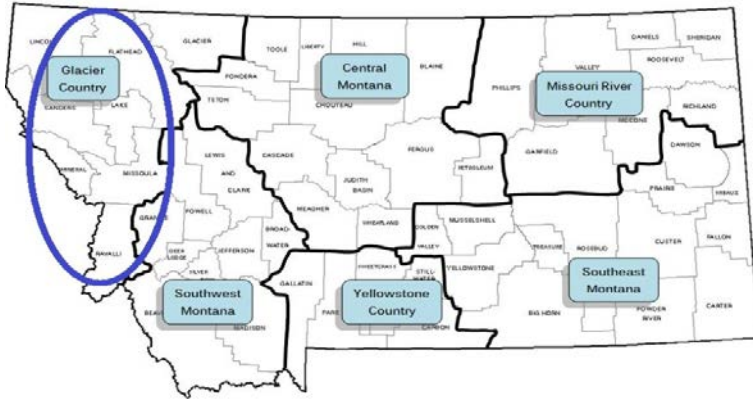

\*Data is collected at the state level. The two-year average of expenditures (2017 \$s) was used to help account for small and varying sample sizes at the county level.

◊Expenditure category totals may not add to overall total due to rounding. <sup>^</sup> Comparison to previous years is not advised.
