Adv. Ballet Technique Practice and Performance ~ Developing Artistry

Course Description:

Technique is a daily practice investigating movement through the ever-changing landscape of the body. It is a practice used to build strength, dynamic alignment, mobility, articulation, musicality, and navigate the use of weight, momentum, force, and direction. Students in technique are expected to actively engage in class through the investigation of a dynamic use of body, space, time and energy. This course will explore advanced level ballet technique through the incorporation of ballet movement vocabulary, improvisation, somatic practices, conditioning, and composition. Level III students are expected to engage with material both individually and as a community. Throughout the course, students will analyze and reflect on their personal growth, while actively investigating their individual voice and development of personal artistry.

Objectives:

1. Continue to develop strength and mobility in accordance with dynamic alignment in order to prevent injury, and allow greater range of motion within the body.
2. Continue to develop, practice, and identify advanced level ballet movement vocabulary and terminology.
3. Continue to build awareness of the body's three-dimensionality, and the navigation of weight, momentum, force, and direction.
4. Ability to recognize technical themes presented at the Barre and apply them to center floor exercises.
5. Ability to investigate ballet as an evolving art form, historical and contemporary influences, improvisation, somatic practices, conditioning, and performance techniques in order to cultivate an understanding of one's facility, awareness of one's freedoms and limitations, and the development of personal artistry.
6. Foster individual growth through self-reflection, self-assessment, and peer evaluation.
7. Create a classroom environment for students to demonstrate dance professionalism, including the development of individual warm-up practices, class preparation techniques and classroom material.
8. Provide an environment in which students feel comfortable questioning, experimenting, taking risks, and ultimately deepening their practice of ballet technique.
9. Encourage the connection of physical, technical, intellectual, emotional, kinesthetic, and creative elements of one's dance to explore a deeper connection to the world.

Assignments:

1. **Attendance:** Students are expected to be on time and ready to move when class is scheduled to begin. If you have extra warm-up needs please take care of them before class. Students arriving late will not be permitted to take class. Students are required to remain in class until it finishes with reverence. Consistent departure from class before its end will result in lowering of one's grade.

Attendance is important in any field, but vital in the field of dance. Learning to dance requires that your body do it. You won't gain in flexibility, and strength, or in your ability to pick up movement or generate your own movement by hearing about what happened from a classmate, watching a film of the dance or reading about it in a book. In other words, there is no way to make up the material you miss.

The Dance Faculty EXPECTS STUDENTS TO BE IN EVERY CLASS. However, knowing that unpredictable circumstances can arise, **students are permitted 1 week of absences (2 total).** Given the content of a dance class, no make-up work can be done when a student is absent.

AFTER YOU HAVE USED YOUR PERMITTABLE ABSENCES (2 total), YOU WILL BE DOCKED ONE-THIRD OF A GRADE FOR EVERY ADDITIONAL ABSENCE.

Observations: Students are allowed two observations per semester. Each observation after the allotted two will be considered an absence. Please refer to the Observation Policy for what is expected when you observe a class.

GRADING: Dance is different from many other fields in that a student's work is not as quantifiable as it is in some other subjects, such as history or math. For this reason, we do not have a point breakdown, but rather general guidelines.

To receive an "A" you must:

2. show signs of aptitude for dance technique
3. have an energetic, attentive attitude
4. progress over the semester
5. be at the top level of the class, and, of course,
6. fulfill the attendance, critique, and exam requirements

You will receive an "F" if your absences and lack of critiques add up (or subtract) to an "F." Students may receive an "incomplete" (I) only if there are exceptional circumstances that *have been discussed with the instructor.*

2. Writing:

Self Reflections: Students will be asked to reflect on their experience in Ballet Technique at the beginning, middle, and end of the semester. The initial self-reflection should include areas identified as technical strengths/weaknesses, and a minimum of three clear goals established by the student setting their intention for the semester. Mid-way through the semester, students will be asked to reflect on their initial goals and their development half way through the course. At the end of the semester, students will be asked to reflect on their greater understanding of their practice and performance in Ballet Technique. The final reflection should include an in-depth description of what the student has discovered about technical strengths/weaknesses, goals set at the beginning of the semester, themes addressed in the movement material presented in the course, the relationship between ballet movement vocabulary->improvisation->somatic practices->composition->technique->performance, and the development of personal voice and artistry. All reflections should be typed 10-12 point font, 1-inch margins, 1.5 spaced, submitted on Moodle. **Initial reflection due Tuesday, September 6th (1 page), Mid-term reflection due Tuesday, October 25th (1 page), Final reflection due by 11:59pm on Monday, December 12th (2-3 pages).**

Creative Reflection: Following your attendance at a UM Dance Concert or an arts event outside the dance department, write or make a creative reflection that describes how the event inspired you as an artist. Identify your interpretation of the content, meaning, artistic intention of the creator, and reflect on how the work inspired you as an individual. What did you take away from this event? How could you use this information in future creations? Clearly cite facts regarding the event title, date/time, location, creator, and performing artists involved. Length of paper: 1-3 pages. Typed, 10-12 point font, 1-inch margins, 1.5 spaced. **Submitted electronically on Moodle within one week of the event.**

- 3. Mid-Semester Movement Project:** Partway through the semester, students will work in groups to create two center combinations that incorporate movement vocabulary investigated and practiced throughout the course. Groups will film and present this project to the class. *Further details for this project will be presented in class.*
- 4. Final Movement Project:** At the end of the semester, students will create a solo or group work that incorporates movement investigated and practiced throughout the course. Students should choose movement they believe they have mastered, as well as material/concepts upon which they can continue to improve. Students will perform this solo for the class and as part of *Dance Underground*. *Further details for this project will be presented in class.*

Grading: Final grades are determined in the following way:

- **Physical Practice, Active Participation, Attendance and Artistry (60 points):** Overall understanding and demonstration of movement principles emphasized and studied in class, investment in material, creative signature demonstrated in material and artistry described in one's dancing, punctuality, and active participation in class for movement exercises, video viewing, observations, feedback, and discussions.
- **Self Reflections (15 points):** Reflections are graded with respect to thoroughness, clarity, depth of analysis and thoughtfulness.
- **Creative reflection (5 points):** Reflections are graded with respect to thoroughness, clarity, depth of analysis and thoughtfulness.
- **Mid-Semester Movement Project (5 points):** Projects are graded with respect to performance, creativity, group participation, written feedback, demonstration of class principles and investment in the process and product.
- **Final Movement Project (15 points):** Projects are graded with respect to performance, artistry, creativity, risk taking, demonstration of class principles and investment in the process and product.
