FOR RELEASE TUESDAY, NOVEMBER 3

Dr. Clyde E. Noble, associate professor of psychology at Montana State University, Missoula, will deliver a paper, "Verbal Learning and Individual Differences," at a conference on verbal learning at Ardsley-on-Hudson, N. Y., Tuesday through Sunday, MSU officials announced.

The conference, sponsored by the Office of Naval Research, will deal with current status and future developments in basic research in the field of human learning.

Dr. Noble is one of seven specialists in this branch of experimental psychology who were invited to give papers at the conference. The other panelists are from Northwestern, Harvard, Johns Hopkins, and the Universities of California, Maryland, and Minnesota. Eight other psychologists will participate in the discussions.

Dr. Noble has just secured a two-year contract, in the amount of \$16,368, with the Office of Naval Research to conduct further research in this field. MSU graduate and undergraduate psychology students who will participate in the experimental work as laboratory assistants are George Parker and Charles Koski, both of Missoula, and Quentin Leland of Glendive.
