ASSIGNMENT

Start with a generous sized sheet
Of transparent mylar or acetate
A centimeter more on each side
Than the man you have to cover.

You will find him in the Molex Terminal.
He won't be the best fist heard that night
And he might zig and zag out of phase.
You will have to be as accurate as the crystal
To avoid moonbounce and attain
Those close tolerances.

If you are using india ink
And have to change his features,
The easiest way I have found
Is to scratch off the faulty part
With the blade of a sharp knife
Being careful not to damage the mylar.

You may then walk into the idling propellor.
We will send home a corporal and a flag.
