COURSE DESCRIPTION: An examination of environmental knowledge of Native Americans and their relationship with nature by analyzing historical and ethnographic sources.

PURPOSE: This course will emphasize the environmental knowledge of Native peoples of the Northern Great Plains. It will explore how different groups utilized different environments, the different societal roles of women and men and how different societies utilized either domesticated or wild species (both plant and animal). The course will focus not only on human relationships to their environments, but also on how humans found meaning within nature.

LEARNING OUTCOMES: By the end of the course the student will be able to;

- 1) Read, analyze, and orally summarize historic and ethnographic materials.
- 2) Write an effective academic essay related to environmental studies issues.
- 3) Research historic and ethnographic materials to effectively write about and orally articulate the issues related to environmental knowledge and Native societies.
