**Course Description:**

This course will employ a discussion format to provide students with a sophisticated understanding of the rapidly changing strategic environment in the Asia-Pacific region. After an overview of key historical trends shaping the evolving strategic structure in Asia, including the forces leading to the Post-World War II strategic dominance by the United States, the course will use a largely geographic approach to hone in on an overriding theme: The recent emergence of China (and to a somewhat lesser extent, India) as a vital regional/global powers and the response by the U.S. and a range of other key actors to this phenomenon. We will conclude with an assessment of whether a “power shift” is in fact occurring in the Asia Pacific, and to what extent China may pose a threat to the U.S. in the near or middle term.

What this course will help you understand:

- The background of America’s Cold War Containment Policy in Asia, particularly the impact of the Korean War in shaping that policy
- The causes and impact of the end of the Cold War in Asia
- Domestic and strategic forces that shaped China’s switch to a policy of “peaceful rise”
- India’s increased role as a strategic and economic “hedge” against China
- Updated information on Chinese/Indian/US relations in Asia
- Updated focus on potential hotspots like the Korea peninsula, South China Sea and Taiwan
- The potential strategic shift resulting from China’s challenge to US dominance in Asia

**Required Readings:**

Alice Lyman Miller and Rich Wich, *Becoming Asia: Change and Continuity in Asian International Relations Since World War II* (Stanford University Press, 2011)

Ashley Tellis, et al (ed). *Asia Responds to its Rising Powers, China and India* (National Bureau of Asian Research, 2011).

David Shambaugh (ed), *Power Shift: China and Asia’s New Dynamics* (University of California Press, 2005).

**Plus a number of readings/videos that are assigned as appropriate, as noted on an updated Moodle page created for this course**

**GRADING: Grades will be calculated as follows:**

- **Attendance and active participation in class: one-third\*\***
- **A mid-term analysis essay: one-third**
- **final take-home project (position paper): one-third**

**\*\*Despite a snafu that led to a massive over-enrollment in this class, it has been developed as having a very heavy “reading and discussion” format. This puts a heavy burden on all students not only do the reading but to come to class having thought about it and prepared to discuss it. In class participation thus represents a significant part of the class grade. PLEASE NOTE: As part of that grade, two students will be assigned responsibility to prepare discussion questions and help guide the class discussion for each class.**

NOTE: Those taking the class for **graduate credit** must take two turns at the latter task, do a brief (20 minute) oral presentation on an agreed-upon topic in class, and must respond to a “higher standard” in class and on the written assignments.
