Hearing Connectivity Solutions for OT Patients When Hearing Aids Are Not Enough: Connecting Up

Al Yonovitz, Ph.D, Au.D, Emma Bozarth

Purpose
 To determine if Occupational Therapists (OT) and Certified Occupational Therapy Assistants (COTA) in Montana have awareness of hearing loss connectivity solutions which can be shared with patients/clients.

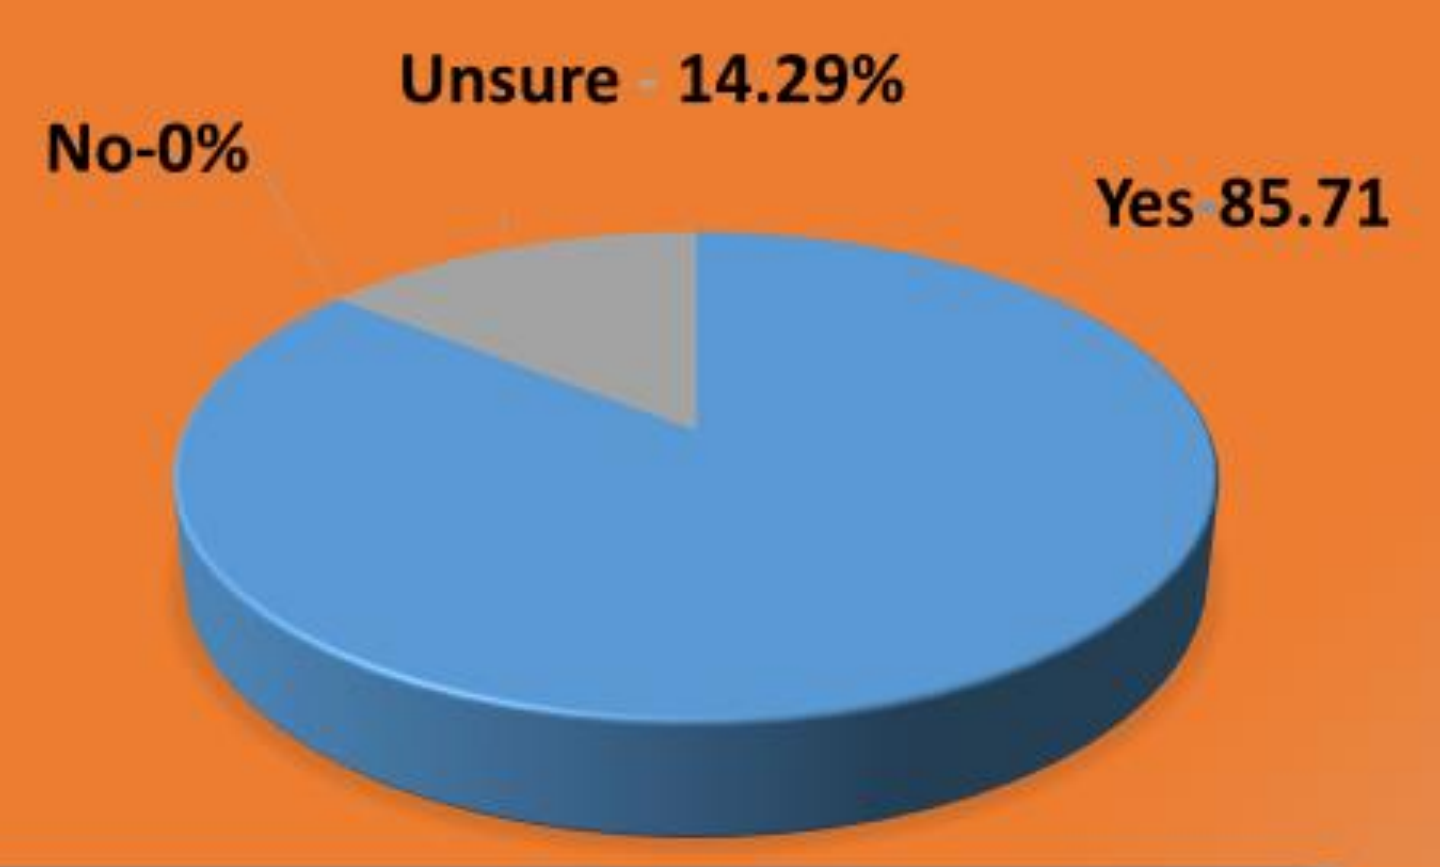

Methodology
 A survey was sent via email to OTs and COTAs in Montana. Qualtrics responses received were 36 (n=36).

Survey Results

FOR HOW LONG HAVE YOU BEEN A PRACTICING OT? - %

WOULD IT BE BENEFICIAL TO LEARN MORE ABOUT TECHNOLOGY? - %

Findings

- OTs have an understanding of a number of connectivity solutions for patients/clients with hearing loss.
- one respondent commented, "I don't use a smart phone or apps so your list above was insightful."

Implications

- From this survey, 85.71% of respondents stated that it would be beneficial to learn more about hearing connectivity solutions
- Not one respondent stated that having greater knowledge concerning hearing technology would not be useful.

TECHNOLOGY SUGGESTIONS FOR PATIENTS/CLIENTS WITH HEARING LOSS - % OT'S HAD USED
