FOR IMMEDIATE RELEASE

Montana State University has been awarded \$24,630 in National Science Foundation matching grants for purchase of scientific equipment, MSU officials announced. The Mathematics Department will receive \$22,640 and the Chemistry Department, \$2,990.

The grants are made to help educational institutions meet the national need for scientists by updating undergraduate instruction, according to a foundation spokesman. In selecting institutions to receive grants, the foundation gave priority to those showing the relationship of the equipment needed to a new or improved instructional program in a specific area of science, he said.
