\$16,575 AWARD FOR FORESTRY
CURRICULUM PROJECT

MISSOULA--

The National Science Foundation has approved a grant of \$16,575 for the Curriculum Development Workshop, a project of the national Council of Forestry School Executives (CFSE).

Dr. Arnold W. Bolle, dean of the University of Montana School of Forestry, and Dr. Henry Webster, head of the forestry school at Iowa State University, Ames, are cochairmen of the workshop. The two men prepared the project proposal.

"The purpose of the grant is to help support a series of workshops to acquaint the faculties of the schools of forestry in the country with new materials needed for a broadly directed forestry curriculum," Dr. Bolle said.

The curriculum development project was undertaken by the CFSE in 1965 when Dean Bolle was council chairman. It is aimed at a broadly oriented program in the management of natural resources.

The project relies heavily on new directions for forestry education initiated at several schools throughout the country in which UM has also been involved.

The first portion of the project consisted of preparation of a new handbook in national resources management under the leadership of William A. Duerr, Syracuse University, Syracuse, N.Y., and Dennis Teegarden, University of California at Berkeley.
