MSU ASSISTANT PROFESSOR OF MICROBIOLOGY
TO SPEAK AT UNIVERSITY OF MONTANA FRIDAY

MISSOULA--

A Montana State University faculty member will be featured speaker at a microbiology seminar Friday (April 19) at the University of Montana. The seminar will be at noon in room 411 of the UM Health Science Building.

Dr. David Stuart, assistant professor of microbiology at MSU, will discuss "Survival, Injury and Recovery of Indicator Bacteria Exposed to the Aquatic Environment." Stuart's talk will deal with some of his findings from environmental research he has conducted in the Bozeman area.

He has been observing two lakes in the Gallatin Valley. One is open to hunting during hunting season and the other is not. Stuart hopes to determine how much pollution hunters bring into the open lake during the hunting season. He has been working on this project for nearly five years.

The public is invited to attend Friday's free seminar, which is sponsored by the UM microbiology department.
