CENTRAL ASIAN CULTURES AND CIVILIZATIONS:

Throughout its long and rich history, Central Asia's cultures and civilizations have left deep and profound impact on the societies, economies, and cultures of other states and countries. In turn, Central Asia has been affected profoundly by the cultures and civilizations of other states and countries such as China, India, Persia and Russia. Via its major urban centers, located on the Silk Road, goods, ideas, and religious beliefs travelled from Central Asia to the other states, just as Central Asians were in turn introduced to new religious beliefs and ideas, such as, Zoroasterianism, Judaism, Buddhism, Manicheanism, and Christianity.

Long before Central Asia was occupied and colonized by Russians and Chinese, its overall culture was first and foremost Iranian in character, sharing and contributing enormously to the growth and enrichment of Persian and Indian cultures and civilizations to the south. From the beginning of the eleventh century, mass migration of the Turkic tribes into the Central Asia intensified, and that was another major contributing factor to the complexity of the region. Starting in the nineteenth century, the Russian and Chinese influence replaced, or began to transform the Iranian and Turkish character that had dominated Central Asia for hundreds of years. Central Asians were now included in the Russian Empire or an expanding Chinese state, later succeeded by the Soviet Empire and Communist China respectively. It is not surprising, therefore, that Central Asians are confused about identity. Throughout the Soviet period, to identify oneself as a Muslim or a Turk or an Iranian was politically dangerous, risking charges from Moscow of nationalism, which was tantamount to treason.

Identity questions cannot be answered overnight, and Central Asia, whether under Chinese rule or as independent states, is currently undergoing an era of political, economic, and cultural evolution that previously had been nearly impossible during the past seventy years of Communist rule. The peoples of Central Asia will probably take decades before deciding just what their essential identity is and how it will influence their relationships with each other. Extreme political and social fluidity has marked Central Asian cultures, especially given the evolving efforts of their

citizens to determine their own cultural identities. In the meantime, Central Asian cultures remain in a state of rapid political, economic and social transition.

This class will analyze the complex nature of Central Asian cultures and civilizations, and their relationships among themselves. Particular attention will be paid to the history of the relationships among these cultures and civilizations, a history that in turn affects U.S. policy interests today.

Course Grade:

Daily Notes	20%
Midterm Writing Project	20%
Final Writing Project	20%
Final Exam	20%
Map Project	10%
Attendance & Quizzes	10%

Daily Notes (Journal), includes a minimum of one page of notes on the lecture, slides and power point presentation, video and other activities in the class. Students are expected to include in their daily notes (journal) their personal feelings and thoughts at the conclusion of each class.

Textbooks:

1. Christopher Beckwith, "Empires of the Silk Road", Princeton University Press, 2009.
2. Igor Lipovsky, Central Asia: In Search of a New Identity, Create Space, 2012.
3. Ardi Kia, Central Asia: A History of Cultures, Arts and Architecture, U. of Montana, 2014.
