MISSOULA--

Two members of the University of Montana chemistry department faculty are authors of an article entitled "Teaching Handloading," published in the January-February 1975 issue of the bimonthly publication, "Handloader, The Journal of Ammunition Reloading."

Authors of the article are Edward J. Keller, a lecturer, and Dr. Forrest D. Thomas II, professor of Chemistry, who also have taught a University Center course on handloading for beginners. The course also has been offered by the Missoula Technical Center. The article by Keller and Thomas in "Handloader" includes a nine-lesson outline on the handloading course.
