ANACONDA, UM HOLD  
UNIQUE MANAGEMENT LAB  
FOR FOURTH YEAR

MISSOULA--

A unique program in management education is under way for the fourth year as a result of continuing cooperation between the Anaconda Company and the University of Montana School of Business Administration.

According to Dr. Jack H. Doty, UM professor of management, Anaconda Forest Products Division (AFPD) officials are conducting a series of seminars and tours for the graduate business course entitled Advanced Management Problems.

The seminar is centered on policy level issues and problems, with the AFPD serving as a laboratory for the students. Real experience also is present, as a student's final reports--both oral and written--will be submitted to Anaconda executives for evaluation.

Dr. Doty said the course helps in integrating theory and practice as the students are required to apply concepts acquired in the classroom to the solution of real problems and to mapping out future business strategy for the AFPD.

The program this year was planned by J.F. Leary, AFPD administrative assistant to the general manager. Leary said the course fits Anaconda's interest in aiding education with the business school's concept of industry participation in management education. The program was originally conceived by Robert E. Sheridan, AFPD general manager, and Dr. Doty.

Graduate students in the course include Frank Buckley, Helena; Mike Collins, Missoula; Pat Conroy, Hamilton; Bruce Grebe, Ossining, N.Y.; Don Grosso, Butte; Deane Hockersmith, Great Falls; David Krueger, Lewistown; Peter McGillivray, Black River Falls, Wis.; Gary McKinley, Conrad; Gene Neely, Oil City, Pa.; and Paul Schaefer, Chester.
