Psyx 582 – Behavioral Assessment & Intervention

Fall 2014

Course Location and Time
Skaggs 303
Tuesday 12:10 – 3:00

Instructor Information
Instructor: Greg Machek, Ph.D.
Office: Skaggs 240
Phone: 406.243.5546
Email: greg.machek@umontana.edu
Office hours: Monday 11:00 – 12:00; Wednesday 11:00 – 12:00; and by appointment

Required Texts

Additional Readings (Moodle)
Additional readings – or other material- will be available on Moodle.

(Some) Recommended Texts

Course Objectives (NASP Standards relevant to the objective are listed in bold)
Upon successful completion of this course, students will be able to:

• Understand the need and the theoretical and empirical support for school wide positive behavior supports. (PBS)
Specifically, students will be able to understand a three-tiered model of PBS, as well as implement assessment and intervention strategies appropriate to each tier of the model. (2.1; 2.4; 2.6; 2.7)

- Develop a behavioral intervention plan (BIP) using empirically supported behavioral procedures (2.1; 2.2; 2.4; 2.9; 2.1)
- Understand, identify, and articulate the foundation learning principles of classical conditioning, operant conditioning, and observational learning essential to behavior therapy methods for exceptional students (2.4; 2.5; 2.7)
- Understand, identify, and articulate antecedent conditions associated with behavioral difficulties and antecedent modifications that can be made to prevent problematic behavior. (2.4; 2.6; 2.7)
- Demonstrate increased knowledge and proficiency in classroom settings, including proficiency in actual measurement, formulation, implementation, and evaluation of behavioral interventions. (2.1; 2.6; 2.9)
- Demonstrate competence in consultation and collaboration with family and/or school personnel in understanding, and meeting, student intervention needs. (2.2; 2.8; 2.10)
- Develop knowledge about, and competence with using, various standardized, norm-referenced, behavioral assessment systems. (2.1; 2.7)
- Develop an understanding of the components of school-wide positive behavioral intervention & support efforts. (2.6; 2.7; 2.9)

Learning Activities

Class Participation
Students are expected to read the text(s) and any assigned articles prior to each class session. Class sessions will typically consist of a presentation by the instructor to clarify points in the assigned readings, followed by a demonstration or exercise, as well as discussion of assigned readings, film, or case studies. Students will receive credit for class participation based upon the number and quality of contributions to whole class discussion, small group work, and exercises.

Assignments
Each student will complete small assignments related to one of the three tiers of a response to intervention (school wide) approach to dealing with behavioral difficulties in students. For example, completion of the Schoolwide Evaluation Tool (SET) is an assignment that relates to a universal (Tier 1) effort of providing positive behavior supports to all children in a school. Completing scripts for a group social skills class would be considered a targeted or Tier II intervention. Additionally, the middle portion of our course will address Tier III (and, somewhat, Tier II supports [more later]) and entail completing assessment and planning that one would do when completing an FBA/BIP process. For example, students will complete different FBA assessment procedures, including interviews and direct observations. You will graph data using excel using a single-subject design format. You will conceptualize and create a “competing behavior model.” Finally, you will ultimately create a Behavior Intervention Plan (BIP that is linked to the FBA results). This will include a description of all data collection steps, your hypotheses, your single-subject design plan, as well as your plan to evaluate your intervention. These assignments will be described more fully by the instructor during class time. Due dates are listed in the timeline below.

Note: It is assumed that all students will be placed within a public school setting during the semester. You will want to work with your practicum supervisor to identify cases for which a behavioral
assessment and behavioral plan will be needed. Alternatively, it is possible that the assignments can be done on children that are randomly selected and who are NOT 1) being concurrently assessed for behavioral difficulties, or 2) already being given special education services. But, again, if you are in a situation where your assignments for this class would allow you to help out on a case that you will be doing with your practicum supervisor, which is preferable.

A general description of assignments (more specifics will be provided in class):

**Rule Matrix**
You will identify and describe behavioral expectations for both classroom and non-classroom settings. This will consist of identifying 3-5 positively stated expectations, and completing the matrix with 2-3 positively stated examples of rule-following behavior within each of the settings for each basic behavioral expectation.

**Social Skills Lesson Plan (“Teach-To’s”)**
Based on the rule matrix you completed, above, chose one behavioral expectation. Then, develop a lesson plan to teach that social skill (i.e., rule) in that setting. Use the provided format (I will provide) or create your own with the same components.

**School Wide Evaluation Tool (the SET)**
You will be asked to learn this assessment tool, and then go to a local school to administer and score the SET. This is the case even if you have done a SET in the past. More details will follow.

**Graphing Data**
Using fictional data, you will correctly create an excel chart depicting student progress within a single-subject design model.

**Data Gathering**
You will be asked to collect data on a student’s behavior. This will entail both direct observational approaches, and indirect interviewing approaches. The assignment will ask you to collect data on the behavior, itself, and another part of the assignment will have you collect information on the presumed function of the behavior. More specifics to come.

**Competing Behavior Assignment**
This assignment will allow you to take the presumed function of your target behavior and come up with a plan to introduce more positive and socially acceptable alternatives that serve the same function for the student. It also allows you to consider and plan for manipulations in the relevant setting variables that accompany the target behavior.

**Presentations**
Students will be responsible for researching and presenting on an assessment and/or intervention. The purpose is to introduce your colleagues to published, norm-referenced behavior assessment instruments, as well as school-wide screening and intervention products. Instruments to choose from include:

- **First Steps to Success** (Secondary – Tier 2- focused on early screening and intervention for disruptive problems. It is used with k-3 children with ADHD/OD/CDD characteristics)
- **Second Steps** (This is a Primary (Tier 1) violence prevention curriculum. Highly Recommended! If you use, please ask me to give you a Second Steps-PBIS Alignment chart)
The BASC-II System (Broadband standardized behavioral scale)
The ABAS-II (adaptive behavior scale)
- The Conners’ Rating Scales (ADHD and general behavior problems that may be associated with ADHD referrals)
- The Social Skills Intervention System (SSIS). This is a NEWER program that includes screening/assessment as well as social skills scripts. The version we have is used for Class Wide (Tier I) social skills training. PLEASE Consider!
- The Behavioral and Emotional Rating Scale, Second Edition (BERS: 2)
- The Early Screening Project (ESP; this is a downward extension of the SSBD)
- The Attention Deficit Disorder Evaluation Scale (ADDES-II)

This is not an exhaustive list, but the presentation of any other instruments should be approved by the instructor. Presentations can be done by two (2) person teams or individually. Content should include the purpose and rationale of the instrument; a thorough description of what it measures; explicit instructions on its use; and, technical qualities. A more thorough rubric will be presented in class.

All of the listed materials are either in the test closet at the CPC or in the Skaggs building (likely in my office). Ask me and I can point you in the right direction.

Final
A final exam over selected class topics may be given. This would likely be a take home, essay format.

Practicum involvement
There will be activities for this class that will be included as part of your practicum hours (SP students): please keep track of all these hours. In general, your 587 hours will only be those in which you spent time in the school setting, not other time spent on assignments for this class, such as writing up the BIP, etc.

The practicum site affords students to get accustomed with school classrooms (again). It is also where you will be able to identify and work with a student for your FBA/BIP assignments.

Grading
Class Participation: 75
Assignments: 120
Final BIP: 80
Presentations: 80
Final: 50
Total: 405 points

Final Grades will be determined as follows:

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>94% - 100%</td>
<td>A</td>
</tr>
<tr>
<td>90% - 93%</td>
<td>A-</td>
</tr>
<tr>
<td>87% - 89%</td>
<td>B+</td>
</tr>
<tr>
<td>84% - 86%</td>
<td>B</td>
</tr>
<tr>
<td>80% - 83%</td>
<td>B-</td>
</tr>
<tr>
<td>77% - 79%</td>
<td>C+</td>
</tr>
</tbody>
</table>
### Percentage and Grade

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>74% - 76%</td>
<td>C</td>
</tr>
<tr>
<td>70% - 73%</td>
<td>C-</td>
</tr>
<tr>
<td>67% - 69%</td>
<td>D+</td>
</tr>
<tr>
<td>64% - 66%</td>
<td>D</td>
</tr>
<tr>
<td>60% - 63%</td>
<td>D-</td>
</tr>
<tr>
<td>0% - 59%</td>
<td>F</td>
</tr>
</tbody>
</table>

### Projected Times

Please note: this timeline is subject to change, as are specific readings. I will try to give ample forewarning if this happens.

<table>

**Course Guidelines and Policies**

**Expectations**
Academic dishonesty is antithetical to the mission of the University of Montana; all students must practice academic honesty. Misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the University. Academic misconduct – including plagiarism - will result in an “F” for the course grade and might result in dismissals from the university. Please let me know if you have any questions about what might constitute plagiarism, (also please see p. 21 in the Catalog). Please also familiarize yourself with the Student Conduct Code.

Disability Modifications
The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and Disability Services for Students. If you think you may have a disability adversely affecting your academic performance, and you have not already registered with Disability Services, please contact Disability Services in Lommasson Center 154 or call 406.243.2243. I will work with you and Disability Services to provide an appropriate modification.

Syllabus
The instructor reserves the right to change the syllabus, if necessary.
