FOR IMMEDIATE RELEASE

Eight boxes of books and documents containing what the Geology Department rates as "extremely valuable material," were presented this week to the University of Montana by Mrs. C. H. Clapp, widow of the man who was president of the University from 1921 to 1935.

Particularly noteworthy, according to departmental authorities, were Dr. Clapp's original geological maps, journals and survey notes. As a resident of Montana over the years, he did extensive pioneering work in geological research and his effort is regarded as the starting point for geological studies that are continuing today.
