FOR IMMEDIATE RELEASE

Dr. W. B. Rowan, associate professor of zoology at the University of Montana, is the recipient of a \$1,375 grant from the Office of Water Resources Research of the Department of Interior, Washington, D.C.

Dr. Rowan said the grant would be used to investigate the "usefulness of freshwater protozoan animals for assaying the presence of organic micropollutants in rivers and streams."

He will direct the preliminary-type study for its year and a half duration. The grant was received under the matching funds title of the Water Resources Act. The UM is providing services in an amount equal to the grant, he added.
