10 THERAPISTS
TO PARTICIPATE IN UM WORKSHOP
ON PHYSICAL THERAPY PROCEDURES

MISSOULA--

A total of 10 physical therapists from Montana, Washington, Wyoming, Colorado, Florida and Canada have preregistered to participate in a five-day workshop on physical therapy procedures Monday through Friday (June 11-15) at the University of Montana, Missoula.

Nora B. Staael (pronounced Steel), workshop teacher and associate professor in the UM Department of Health, Physical Education and Recreation, said the five-day program will focus on the improvement of techniques to hasten recovery from nerve, bone and muscle problems resulting from injuries or diseases.

"I am working on the implementation of pain-free therapy," Miss Staael said. "I don't believe in forcing a joint. By learning a technique, one can recover a full range of motion and strength via the pain-free method in less time than by any other method I know. Also, incidents of re-injury are less likely to occur if the pain-free method of therapy is used."

Miss Staael said she has developed specific techniques for treatment of tennis elbow and facial paralysis (Bell's palsy).

Registration for the workshop will be at 8:30 a.m. Monday in the Physical Therapy Complex in the University Women's Center.
