MATH TESTS TO BE GIVEN
AT UNIVERSITY, MAY 28

Tests for exemption from two mathematics courses at the University of Montana will be administered to high school seniors May 28.

The advanced algebra exam will be at 9 a.m. in room 109 of the Math-Physics building on the UM campus. The trigonometry test will be given at 10:30 a.m. in the same room.

According to H. E. Reinhardt, associate professor mathematics, one and one half years of algebra should make the algebra test feasible and a high school trigonometry course should be adequate preparation for the trigonometry test.

Entering freshmen who take mathematics at the University of Montana are placed in courses by the department on the basis of both their background and on their performance on placement examinations.
