UM GEOLOGY DEPARTMENT RECEIVES N.S.F., RICHFIELD OIL GRANTS

The University of Montana geology department has received a matching fund grant of \$4,700 from the National Science Foundation under its Instructional Scientific Equipment program according to Dr. Robert W. Fields, department chairman.

The funds will be used to buy experimental and demonstrational equipment for the department's new 101-103 sequence Introduction to Geology for non-majors.

The geology department also received a \$500 grant from the Atlantic Richfield Oil Company. This money may be used as an operational grant to defray operating expenses and purchase needed equipment.
