ARMY ENGINEER TO
SPEAK AT UM

Col. C. C. Holbrook, district engineer for the Army Corps of Engineers of Seattle, will present a talk on "The Role of the Corps of the U.S. Army Engineers, relative to National Water Conservation" at the University of Montana Wednesday (Feb. 8) at 3 p.m.

The lecture, which is the fifth in the series of nine lectures on water resources presented by the UM School of Forestry, will include a public participation discussion of local and national problems germane to the construction of large multiple purpose dams. It should clear up many of the questions on the Libby Dam Project.

Col. Holbrook has conducted numerous big dam evaluation meetings throughout the Pacific Northwest including several on the development of the Clark Fork River Basin.

The public is invited to Holbrook's talk Wednesday in Geology 107 on the University campus in Missoula.
