AMATEUR DISTILLERS WILL
GET THE "INSIDE" ON WINE

Amateur distillers should benefit from a lecture Wednesday (Feb. 9) at the University of Montana.

Dr. Charles H. Drake, professor of bacteriology at Washington State University, Pullman, will speak on the "Microbiology of Wine Production" at 3:10 p.m. in Health Sciences 411 on the Missoula campus.

Dr. Drake received his B.S., M.S. and Ph.D. degrees from the University of Minnesota and taught several years at the University of Kansas before joining the faculty at Washington State.

He is a research officer for the United States Public Health Service and in 1957 and 1963 was radiation monitor during the atomic tests in Nevada.

Drake also has researched aquatic bacteria at the Limnologische Station Niederrhein in der Max Planck Gesellschaft in Krefeld, Germany during 1964 and 1965.

Interested public are invited to attend the lecture.
