PSYX583 Educational Assessment and Intervention - 4 Credits
Spring 2014
Mon & Wed 9:40-11:00am– SB246

Instructor: Anisa N. Goforth, PhD, NCSP
Office: Skaggs 367
E-mail: anisa.goforth@umontana.edu
Phone: 243-2917
Office hours: by appointment

Teaching Assistant: Laura Ambrose
Email: laura.ambrose@umontana.edu
Office hours: Thursdays 2-3pm and by appointment

Course Overview

The goal of this course is to provide students with a sound framework for assessing and intervening with students with educational difficulties. The first component of the course will focus on the assessment of educational problems, understanding etiology of learning problems, learning disabilities, and the legal and ethical practice of educational assessment. Educational assessments to be learned include standardized norm-referenced assessment, curriculum-based assessment, curriculum-based measurement, and assessment of instructional environments through observation and interviews. These assessments will be linked to prevention and intervention for academic problems.

The second component of the course will focus on empirically supported, evidence-based instructional and intervention methods for reading, math, and writing difficulties. Students will learn and apply best practice for prevention of academic problems in a multi-tiered systems model (i.e., Response to Intervention) and school-based intervention design and implementation methods. Assessments and intervention will be conceptualized in a problem-solving framework. Students will apply assessment and intervention skills during a concurrent practicum placement in a public elementary school (PSYX587-Section 01).

Course Objectives

NASP Domains of Practice
Domain 1: Data-Based Decision Making and Accountability
Domain 2: Consultation and Collaboration
Domain 3: Interventions and Instructional Support to Develop Academic Skills
Domain 5: School-Wide Practices to Promote Learning
Domain 6: Preventive and Responsive Services
Domain 8: Diversity in Development and Learning
Domain 9: Research and Program Evaluation
Domain 10: Legal, Ethical, and Professional Practice
**Corresponding Program Competencies and Objectives**

**Competency 1. Psychological and Educational Foundations of School Psychology**
- Students will learn how to diagnose learning disorders using both special education and mental health classification systems and given an understanding of what constitutes normal development at different ages.
- Students will learn how to administer, score, and interpret various measures of educational achievement.
- Students will learn how to integrate various components of a psychoeducational evaluation.
- Students will learn how to make specific and appropriate recommendations and/or referrals given the unique characteristics, culture, and factors related to the student.

**Competency 2. Psychometrics, measurement and research.**
- Students will learn to evaluate test and survey instruments for psychometric properties.
- Students will select and administer appropriate psychoeducational instruments.
- Students will learn to interpret and communicate assessment results in both written and verbal forms to school interdisciplinary team members, the student and the student’s family.
- Students will learn to evaluate and utilize research to inform and guide professional practice.

**Competency 3. Methods of school-based intervention.**
- Students will use problem-solving methods to develop and implement empirically supported intervention procedures including psychoeducational interventions.
- Students will design and deliver empirically supported preventative practices at the idiographic level.
- Students will learn to select appropriate progress monitoring measure to evaluate intervention progress and outcomes.
- Students will learn to communicate and interpret intervention outcomes in both written and verbal forms in school interdisciplinary team members, the student, and the student’s family.

**Competency 4. Professional school psychology**
- Students will learn to utilize special education laws and eligibility criteria for the purpose of assuring a free, appropriate public education.
- Students will learn to have an understanding of, and ability to practice within legal and ethical responsibilities related to the provision of school psychological services.
- Students will have an understanding and awareness of multicultural issues and their impact on student performance as well as the school psychologist-client relationship.
- Students will learn to understand the need for cultural competence and awareness.

**Required Texts**

Recommended Texts

Materials

- Stopwatch (preferably noiseless)
- Clipboard
- AIMSweb

Course Requirements

1. **Class discussion and participation (10 points)**
   I expect that you will come to class having read the required readings. We will be discussing readings during class and it is expected that you will be ready to thoughtfully engage in these conversations. If I believe that you are not keeping up with the readings, I reserve the right to require you to complete an additional assignment, such as writing annotations.

2. **Norm-Referenced Standardized Achievement Measures (140 points)**
   Each student in the course will sign up to administer the Woodcock Johnson Test of Achievement – III (WJ-III) and either (a) the Wechsler Individual Achievement Test- II (WIAT-II), or (b) the Kaufman Test of Educational Achievement (KTEA). You will complete two protocols for each of these administrations. For the first protocol, you will work in partners to complete the administration. One person will be the examinee (pretending to be a child age 3 to 16 years old) and one person will be examiner. For the second protocol, you will administer the test to a child that is not affiliated with your practicum setting. You will videotape your child administration for review. More information is available in Appendix A.

3. **Curriculum-based Measure Probe Proficiency (30 points)**
   You will administer and score curriculum based measurement probes. A colleague will pretend to be a child of a specific age (dependent on the CBM). These probes will be turned in and checked by a TA. Please see more information in Appendix B.

4. **Comprehensive Psychoeducational Report (100 Points)**
   You will be required to write 1 comprehensive psychoeducational report. The purpose of this task is to prepare you to write like a psychologist. These reports will be written on your
administration of one of the two standard tests (WJ-Achievement III or WIAT-II/KTEA). You will be given a case with background information, classroom observations, cognitive abilities test results and other information. You will integrate that information obtained from the academic achievement test with the other data. More information is provided in Appendix C.

5. **Intervention Bank (40 points)**
You will construct a comprehensive intervention bank (at least 10) for a specific academic domain (e.g., reading fluency, comprehension, written expression, spelling, math computation, math applications etc.). This bank will be one page synopsis of each intervention. More information is available in Appendix D.

6. **Assessment of Class-wide Data: Team assignment (50 points)**
In groups, you will be assigned to examine simulated Winter benchmark CBM data for a classroom of students. You will examine student performance generally, as well as look at the protocols more carefully in order to conduct an error analysis for students in the class. Using these data, as well as simulated data from the Fall benchmarking period, you will develop a short questionnaire to gather relevant information on the reading curriculum, instruction, and environment within the classroom. The instructor or TA will respond to this questionnaire. You will then use this information in order to provide data-based recommendations to the teacher. Further information is available in Appendix E.

**Informed Consent and Videotaping Procedures**
Written parent informed consent for a child/adolescent to serve as a practice recipient of educational testing must be obtained prior to testing. The signed parental informed consent must be submitted with each test protocol for review. If the administration is to be videotaped, the parent must be informed of this in the consent.

**Note:** Under no circumstances are practice assessment results to be reported to a parent, nor are results to be used for educational decisions.

Students are responsible for arranging for videotape equipment for the purpose of videotaping test administrations and the mock interview. You must use a DVD that can be viewed by the instructor. Videotape equipment is available through the department and UM media services. A videotaped administration and/or interview must show the administrator, placement and use of materials, and the person being tested or interviewed.

**Course Grades**
The points and percentage of the final grade related to each course assignment is as follows:

<table>

Course Policies and Procedures

Academic Honesty and integrity
As students entering the field of school psychology, there is an expectation of a high standard of academic integrity. Students are expected to perform to the utmost of their ability in an honest and ethical manner. The University of Montana Student Conduct Code (SCC) should be reviewed, especially in regards to plagiarism. It is the policy of the SPSY program that plagiarism will result in an “F” for the course in which the academic violation occurs as well as grounds for consideration of dismissal from the program. The SCC can be accessed either on line (UM Homepage, A-Z Index, select “S”, scroll down to “Student Conduct Code”) or in the UM Catalog, page 22.

Professionalism
I expect all students to behave with the highest standard of professionalism, both during class and in your practicum site. As a school psychologist in-training, you represent the university as well as the field. Keep in mind that how you behave makes an impression of you as a professional.

Accommodations for Disabilities:
It is my strong desire to fully include all students in this course. Please discuss any desired accommodations with me as soon as possible. I require documentation of any disabling condition prior to providing substantive accommodations (those that involve changes to deadlines, activities, or products) in this course. Students have the responsibility to arrange for such accommodations with Disability Services for Students (DSS). Please refer to the UM Catalog, page 334.

Attendance and Active Engagement
Attendance is highly encouraged since student’s course grades are partially determined by participation in class discussions and activities. Moreover, missing a class can substantially affect students’ depth of understanding. Please inform the instructor prior to class if a late arrival or early departure from class is absolutely necessary. An excused absence will be granted only in a documented emergency situation.
Religious Observance
Please notify me in advance if you will be absent from class for religious observances.

Incompletes, Make-Up Procedures, & Late Assignments
Incompletes will be given under limited circumstances (e.g., personal situations, illness). Make-up procedures must be arranged immediately with me. Assignments should be submitted to me on the due date. Late assignments reflects poorly on you as a professional, and 10% of points will be deducted per day.

Electronic Devices
Electronic devices (such as cell phones, I-pods, mp3s, etc.) must be turned off and put away before class. The use of computers during class to take notes or to use electronic articles and Power Points is encouraged. However, the use of computers for personal reasons during class is inappropriate and disrespectful to other students and to me. I will speak with you if I feel that your use of computers is detracting from your learning and use discretion in reducing grades for those students who are using computers in a disrespectful manner when class is in session.

Commitment to Multiculturalism
I am committed to creating an environment in which individuals’ diversity and opinions are respected. I strive to integrate multicultural and diversity issues in my courses in ways that is relevant to course content and process. I hope students will contribute their unique perspectives to this effort by considering and raising issues related to multiculturalism and diversity—and respecting others’ outlooks throughout this course.

“People First” Language
Students are expected to use appropriate, “people first” language in class discussions and written work. People with disabilities are just that: people who happen to have physical, sensory, behavioral, or intellectual disabilities. Please avoid phrases like “the handicapped,” “autistic kids,” “severely retarded,” or other statements that highlight the disability rather than the individual. Instead, speak and write in a way that puts “people first,” for example, “the student with a severe disability,” “the program for students with behavior disorders.” This small change emphasizes the humanity and individuality of the person and clarifies that disability is only one of many characteristics (and not necessarily the most important!) that people can possess.
## Course Schedule

The course schedule is subject to minor adjustments, as determined by the instructor.

Course Readings

Appendix A

Norm-Referenced Standardized Achievement Measure Administration

Each student in the course will sign up to administer the Woodcock Johnson Test of Achievement – III (WJ-III) and either (a) the Wechsler Individual Achievement Test- II (WIAT-II), or (b) the Kaufman Test of Educational Achievement (KTEA).

You will complete two protocols for each of these administrations. For the first protocol, you will work in partners to complete the administration. One person will be the examinee (pretending to be a child age 3 to 16 years old) and one person will be examiner.

For the second protocol, you will administer the test to a child that is not affiliated with your practicum setting. You will need to locate your own testing subjects. These cannot be children or adults who are being evaluated for services. Friends, neighbors, and children of friends are all possible resources. Do not test the same person more than once with the same test. Before testing subjects, you must secure permission from their parents or legal guardians (see example of consent form). Do not recruit subjects at any institution (e.g. hospital, school).

You will also videotape the child administration. The protocols will be graded and the videotapes reviewed by a TA. Please see the scoring rubric. When protocols are returned to you, you will be asked to correct scores that were affected by your errors. You will turn in protocols within one week of administration. If there are substantial issues in your administration, I may require you to complete a new protocol administration.

For the child administration of the WJ-III Achievement, you will administer the Standard Battery to the child and the Extended Battery with a peer to reduce the amount of time working with the child. For the WIAT and KTEA, you will administer all subtests. Please use a pseudonym on all documentation.

EXAMPLE FORM- Please INDIVIDUALIZE FOR YOUR OWN NEEDS

School Psychology Graduate Program
Department of Psychology
The University of Montana

Dear Parents,

I am taking a course titled Educational Assessment and Intervention at The University of Montana. This course is being taught by Dr. Anisa Goforth who can be reached at 406-243-2917 if you have any questions about this form or about the assessment procedures that will be performed. The class is made up of graduate students who are interested in and have worked with children and adolescents. As part of our pre-service training, we are required to administer a variety of individual achievement and/or behavioral assessment tests to children. I would like your permission to administer one or more tests with your child. The total administration of each test should take approximately one to three hours and will take place at a time that is most convenient for you and your child.

At the completion of this course, I should be able to select appropriate assessment instruments and correctly administer and score the instruments and write clear and concise reports. However, at this time I will just be learning to administer the test instruments and the results I obtain may not be reliable or valid. Therefore, it would be inappropriate to discuss specific results with you.

By giving your consent you indicate that you understand that your own and your child’s rights to privacy and confidentiality will be respected and while the information gained may be discussed in Dr. Goforth’s class, no personal identifying information will be shared.

Most children find the testing activities to be interesting and fun. By allowing your child to participate, you will also enable me to gain valuable practice. I appreciate your consideration of this request.

I do consent to let my child be given a practice administration of an individual measure of basic academic skills and/or behavioral performance and I understand that I will not be given specific information about my child’s performance due to the learning nature of this activity.

Appendix C

Comprehensive Psychoeducational Report

The purpose of a psychoeducational report is to provide a concise, yet comprehensive summary of social-emotional, behavior, and learning assessment. There are a variety of purposes for a psychoeducational report, including providing an accurate assessment for a referral source (e.g., parent), developing hypotheses and linking to appropriate interventions, providing e a baseline for the examinee, and as a legal document (e.g., IEP).

The typical report includes (Sattler, 2001):
1. Identifying information
2. Assessment instruments
3. Reason for referral
4. Background information
5. Observations during the assessment
6. Assessment results and clinical impressions
7. Recommendations
8. Summary
9. Signature

While there is a general standard structure for psychological reports, there is no “correct” way. Indeed, you will notice that each psychologist has his or her own way to writing. For this assignment, you will use the structure that I use in my practice, which may appear different from other psychologist’s reports. I believe that it is important that you are exposed to a variety of styles so that when you are an independent school psychologist, you can develop your own professional voice.

In my view, psychological reports are designed to communicate results of an assessment in a way that a non-psychologist should be able to read and understand what is written. The report is about the child and not about the test. There should be minimal psychological jargon (and if there is, it should be fully explained in lay-person language) and minimal numbers (e.g., no standard scores except in tables in appendix). A question you should continually ask yourself is: “Would my grandmother understand this report?” If you are describing a particular domain, such as working memory, you need to adequately describe this domain so that any person could understand what it is.

You will be given a case with background information, classroom observations, cognitive abilities test results and other information. You will integrate all available data as well as the results of one of the two standard tests you administered for the class (WJ-Achievement III or WIAT-II/KTEA). Use the structure in the next page as a template.
CONFIDENTIAL: For Professional Purposes Only

COMPREHENSIVE PSYCHOLOGICAL REPORT

Name: Dates of Evaluation: 
Date of Birth: Date of Report: 
Age: Client Number: 
Examiner: Supervisor: 

Reason for Referral

Relevant Background Information

Behavioral Observations

Procedures for Evaluation

Cognitive Abilities

General Intelligence
- Describe what intelligence is
- Provide summary of overall cognitive abilities (IQ score is ok)

Verbal Reasoning, Comprehension, and Knowledge
- Describe what verbal reasoning, comprehension and knowledge is in lay-person’s terms, provide example if necessary
- Share results using words, not numbers (e.g., “Justin performed in the average range”)
- If results are relatively high or low compared to other scores or compared to peers,
  o Provide a more thorough explanation or hypotheses for why it may be high or low (e.g., “Sara performed in the low range, suggesting that compared to her peers, Sara has difficulty with using language to reason and understand how the world works.”)
  o Describe implications of this skill deficit or strength as it relates to learning

Nonverbal Reasoning and Novel Problem Solving
- Same as above

Visual-Spatial Processing
- Same as above

Memory
- Same as above

Information Processing Speed
- Same as above

Academic Abilities
Overall Achievement
• Provide summary of overall achievement (standard score is ok)

Reading
• Describe what reading entails (i.e., reading decoding, fluency and comprehension)

Reading decoding
• Describe decoding in lay-person’s language
• Share results using words, not numbers (e.g., “Carrie’s decoding skills are in the average range”)
• If results are relatively high or low compared to other scores or compared to peers,
  o Provide a more thorough explanation or hypotheses for why it may be high or low (e.g., “Tyrone’s decoding skills were in the high range. Compared to his peers, he has an exceptional ability to break down phonemes and syllables.”)
  o Describe implications of this skill deficit or strength as it relates to learning

Reading fluency
• Same as above

Reading comprehension
• Same as above

Written Language

Spelling
• Same as above

Written grammar
• Same as above

Mathematics

Calculation skills
• Same as above

Basic math facts
• Same as above

Social and Emotional Factors Affecting Learning
• Describe relevant information related to social and emotional well-being
• Summarize the results by specific domains (e.g., focus one paragraph on conduct problems, one paragraph on anxiety issues, etc.)
Summary
Provide a thorough summary of the results of the assessment. It should be approximately 1-2 paragraphs that provides the “bigger picture” of the results. Don’t reiterate specific results unless they were unusual or notable. Discuss implications.

Appendix D

Intervention Bank

One of the difficulties in implementing Response to Intervention in many schools is that teachers and other school personnel do not know what interventions are available. As a school psychologist, you should have a “tool box” full of interventions that are evidence-based, easy to implement and readily available.

Thus, you will construct a comprehensive intervention bank (at least 10) for a specific academic domain (e.g., reading fluency, comprehension, written expression, spelling, math computation, math applications etc.). The purpose of this task is to provide you with an opportunity to learn more about specific academic interventions and how to think critically about them.

This bank will include a one-page synopsis of each of the 10 interventions, including but not limited to:

- age ranges
- target population
- intervention times (session/total)
- cost
- publisher
- effectiveness should be included for each intervention.

You may design the one-page synopsis in any way that you want. A template, however, is provided for you if you would like to use it.

At the end of the semester, I will compile the intervention banks from all of your colleagues and provide the entire bank to each of you. You may give the intervention bank to your teacher or supervisor if you wish.
Title of Intervention

Brief summary of intervention

Assessment of Class-wide Data Team Assignment

Universal screening is an essential component of Response to Intervention. In this assignment, you will have an opportunity to practice analyzing data from universal screeners (e.g., reading fluency probes) of “Ms. Blue’s” second-grade classroom. As a team, you will analyze the data and provide recommendations to Ms. Blue in how best to address the needs of her classroom.

Step 1: You will be given simulated data from a second-grade classroom. These data will include oral reading fluency probes for Fall and Winter benchmarks. You will input the benchmark data into AIMSweb and examine the results. You may wish to conduct error analyses of individual protocols as well.

Step 2: As a team, you will develop a short questionnaire for Ms. Blue. You may ask for information that will help you understand the general classroom instruction and environment. Pretend as if you were a school psychologist in the school for one-day a week. Send the questionnaire to Ms. Blue (the course TA) via email. Ms. Blue will answer questions through email.

Step 3: Provide a 3- to 5-page paper that summarizes the results of the universal screening as if you were speaking to Ms. Blue. You may describe additional steps you would take to obtain more data, if necessary. Then, provide Ms. Blue with at least 3 evidence-based interventions that would help her meet the needs of her students in the classroom. Make sure to provide a clear rationale for your recommendations in a way that Ms. Blue would understand.
