Course Overview
Welcome to Principles of Entertainment II. This course is designed to provide you with some of the basic tools for better understanding the processes involved in the conceptualization, development and production of live events.

Throughout the course we will maintain an emphasis on applying our knowledge to realistic and relevant problems faced by entertainment professionals. It is only when you have experienced applying your knowledge to actual problems that you can readily see your strengths and weaknesses, and perhaps more importantly recognize that no single approach is appropriate for all situations.

The purpose of this course is to synthesize real world situations with classroom learning. Students will learn from experts and professionals of the entertainment industry, thus receiving current, relevant information as it applies to the professional world. Students will engage the instructors in intelligent and relevant discourse.

The course provides you professional and personal development opportunities. Written and verbal communication skills will be put to the test. Workshops, discussions, essays, and lectures will provide you with a greater understanding of the entertainment industry as a whole and your professional and personal situation

Course Learning Goals
BMGT 403 students will be expected to:

1. Understand industry trends based on guest lecturers’ expertise.
2. Draw information through the seminar lectures to be applied towards the entertainment industry.
3. Apply personal experience to lectures presented by guest instructors.
4. Workshop together and collaborate based on instruction presented by guest instructors.
