**Stratopause Experts To Give Convocation**

Dr. and Mrs. Jean Piccard will speak on “Thin Air—and Beyond” at the convocation tomorrow morning at 8:00 in the Student Union auditorium.

They will also show newsreels of their famous stratosphere flight in 1934.

Both Dr. and Mrs. Piccard are eminent scientists who have made significant contributions to the study of the stratosphere and both are licensed free-balloon pilots. Mrs. Piccard received her doctorate in natural science in 1930 at the University of Chicago, where she studied with the noted meteorologist, Charles Newton. Dr. Piccard received his doctorate of natural science in 1930 at the University of Chicago, where he studied with the noted meteorologist, Charles Newton.

They will also present a series of programs showing the development of the science of the stratosphere, the laws of physics and chemistry, and the techniques for exploring it.

One of a Hundred

Dr. and Mrs. Jean Piccard. As part of their program they will show newsreels of their famous stratosphere flight in 1934.

**Folsom Makes Known State’s Oldest Culture**

BY FRANK NORBERG

The finding of the evidence of the Folsom man in 1925 definitely makes known the oldest civilization in Montana, reports C. I. Malouf, associate professor of zoology.

This evidence was found last summer by a field party jointly sponsored by MSU, Columbia University, and the American Museum of Natural History. The field party was directed by Richard Forbis, 1949 MSU graduate and now a graduate student at Columbia. Assisting Forbis in the excavating were MSU student Robert J. Fischer, Seattle, and two Columbia students.

**Prohibitive Indians**

Evidence of the Scottish Yuma man and a prehistoric Indian of unknown origin at 6 p.m. in Old Science auditorium. The Folsom man lived in Montana before the Olmec culture of Mexico. His tools, which included a large number of stone projectiles, were found at the same site, said Malouf.

The evidence was found in the well-stratified excavation were flint blades, stems, and other flint implements. This evidence reveals three levels of the most ancient hunting cultures of North America, he said.

**No Skeletons Found**

What the Folsom man looks like is not known, said Malouf, as no skeletons were found. But he added that many other important facts were learned from the excavation. He said the Folsom man lived in smaller groups in Montana than in New Mexico. He ate Mastodon meat and New Mexico meat, but in Montana he evidently ate buffalo, which he butchered in small groups.

This site was very good, Malouf said. It was referred to as a “stratified site,” which made it easy to tell the age.

**A High Culture**

Browder said that he had a high culture. “After all,” Malouf said. “We are not in the Dark Ages.”

**The Scottish Yuma Points**

The Folsom points were found deepest in the ground. The Yuma points were not found. The Scottish Yuma points are large and slender and so named because of their first discovery at Scottsbluff, Neb.

Before the Helena discovery the range of their culture nearly to the continental divide, and their non-stratified excavated site of this kind, and shows a definite difference between the two cultures, he said.

**MSU-Produced Radio Programs Aired Over 11 Montana Stations**

Eleven radio stations throughout the state are now carrying MSU-produced radio programs, according to William E. Spahr, radio program director.

The programs are edited and distributed by the Public Service Division of the United States of America, and is expected to expand its network to 11 stations. The Public Service Division of the United States of America is the federal agency responsible for the development and distribution of educational radio programs.

Before the Helena discovery, the range of the Folsom culture was limited to the high plains area of the Northern Great Plains and the Southwestern United States.

The finding of this culture near Helena expands the range of their culture nearly to the continental divide, and their non-stratified excavated site of this kind, and shows a definite difference between the two cultures, he said.

**Psi Chi Initiates Four New Members**

Four new members were initiated Tuesday by Psi Chi, psychology honor society, Gordon Gerrish, president; Missoula, said yesterday. A prospectus is not the same as a psychology student, Gerrish said.

The new initiates will receive special attention.

Preliminary reports from the Corvallis Health Department show that the Folsom man had the oldest culture in the world.
A Muddy Road Ahead

The air will continue to get cloudier.

By the time we reach the beginnings of 1952, the realm surrounding political aspirants will be so murky that a seer or sage would have difficulty separating wisps of fiction from fact.

With GOP leaders fanning the fires of investigation into the RHAs among internal Revenue and Internal Security areas, peculiarities of the smoke will thicken. If and when the fuel doesn't burn well, so much the better, for greater smoke makes more smoke and darkness is more effective.

The Republicans go into this next mud-game with a slight advantage for material. They can use their rakes on nearly 20 years of Democratic control whereas the Dems will have to remember that 1952 is as good a GOP elephant's pick to out the spikes of long-lasting Republican administrations.

But the Democrats should have many tricks too. A consideration might be the size of the government payroll—and the number over 21 who draw that pay. And of that group the number that like to vote for the hand that has been signing the checks.

Given a few years, it is possible that something like perpetuation might be accomplished by virtue of payroll size.

When November of '52 approaches, a few politicos as well as those persons with fun-damentalist tendencies, the Rev. J. M. Wilcox of the First Methodist church in Missoula, said.

He added that the problem was pronounced in a town with a university campus. All of the forum members agreed that Protestant churches should get away from vague sermons, which they said, invited religious laxity.

"The dictates of man's own, conscience should lead him to the worship of God," the Rev. Mr. Bole concluded.

The forum members agreed that all Protestant churches have something to learn from each other, and that through cooperation on church government, more strength can be obtained.

Protestants Discuss Similarities
While Catholics Talk Theology

"More unity exists in Protestantism than most religious critics would testify," the Rev. Charles F. Bole, field worker for the Presbyterian church, said yesterday at a forum in the Student Union.

Over ninety per cent of the Protestants, who are divided into more than 300 sects, believe in the mainstream of traditions common to the 20 major denominations, the Rev. Mr. Bole said.

Seventy-five students and representatives from down town churches attended the 90-minute discussion in the Bitterroot room. The forum, sponsored by the Student Christian association, highlighted the third day of religious discussion in the Bitterroot room. The forum, sponsored by the Student Christian association, highlighted the third day of religious discussion in the Bitterroot room.

Leaders of the program, sponsored by the Newman club, were the Rev. Father Kavanagh, presiding for Catholic students in the Eloise Knowles room of the Student Union at 5 this afternoon.

Topic for study will be "Concerns of Catholic Life," and will be student led.

Colorado A and M Boasts Strong Passing Attack

BY RUD SCOTTEN

The Grizzlies will travel to Fort Collins, Colo., today to play their last Skyline conference game of the season with the Colorado A and M Rams.

They will face a team that was stunned last Saturday by the BYU Cougars, but the Rams will be considerably stronger if the week’s hard workouts on the practice field have any results.

Coach Bob Davis, of Colorado A&M, has been working his squad as hard as he possibly could in order to team for the Montana invasion. He was reported to have been highly displeased at the Rams’ performance against the Cougars.

Montana can sniff the Skyline hopes of the Rams by defeating them in Saturday’s tilt. The Aggies must win their remaining conference battles and Utah must lose, in order to share the conference crown with Wyoming, defeated earlier by the Rams.

Burroughs Is Their Ace

Grizzly defense will have to cope with the conference’s second greatest aerial artist, Don Burroughs. On the receiving end of Burroughs’ passes will be end Jim David, who has caught 32 forwards for 600 yards, and now stands second in conference standing.

Ken Wilhelm, a definite threat in the running and rushing department, will be striving to place his name higher in the conference standings. He now holds sixth in the scoring of the conference.

Coach Davis Optimistic

Coach Davis said earlier this week that “we have to do our own thing and look like a different ball club if we want to beat the Grizzlies in this highly popular game.”

Helping to make Davis’ squad will be two defensive ends which have been out of action for the last two games. He will also have Moffett, third highest scorer in the conference, to plague the Silvertips secondary.

Military Dept.

Leads League

Military Science keepers moved into the locally bowling championship yesterday when they jumped from fifth to second, in the semi-finals. The Chis will meet the winner of the Alpha Phi Nu game in the championship tomorrow.

The Chis’ series composition of winning, which included a win over Don Olsen, Butte, proved fatal to the efforts of the crew. Olsen scored both of the touchdowns on passes from Tustison. Olsen now has scored seven touchdowns this season.

Jumbo was able to penetrate the Sigma Chi pass defense only once and made but one first down. The Chis dominated the game with accurate passing and a hard charging line.

Jumbo will meet the lower of the Phi Delta-Sigma Nu game in a play-off for third place.

Victory Hungry Grizzlies

Leave Today for Ft. Collins

Montana’s victory hungry Grizzlies will leave this afternoon at 3:30 p.m. by train for Fort Collins, Colo., where they will meet Colorado A and M Saturday. The Grizzlies will make the long southbound trip hampered by injuries from the Wyoming game. Three first-string backs will not see action in the game because of injuries, and several linemen are injured, but Coach Ted Shipkey hopes they will be ready by Saturday.

The backs who are out with injuries are Bob Graves, Paul, and Fred Mirchoff. There is some hope that Mirchoff might be ready to play in practice sessions this week.

The Silvertips have been trying a new offense, the single wing with Bob Byrne in the tailback position, according to Coach Shipkey. Byrne probably do most of the passing if the Grizzlies use the single wing against the Rams.

Shipkey has been working his charges considerably on pass defense this week in an effort to hold down the Rams’ highly regarded aerial attack. The Grizzlies pass defense was weak against Wyoming and will have to be tough to stop the Rams’ passers Don Burroughs.

A prophet, today, is anyone who can distinguish our enemies from our allies.
Inspector Checks Progress of PCT
Mrs. Jeanne Clark, Berkeley, Calif., national inspector of Phi Chi Theta, business women’s honor society was here Sunday through Tuesday on her annual visit to check on the progress and growth of the local chapter. She also gave members new ideas and suggestions on how to improve the chapter.

Sunday evening a banquet was given in the Palace hotel in honor of Mrs. Clark, Pat Danielson, Billings, and Fran Jorgenson, Great Falls, who were pledged Oct. 30. Other honor guests included Deen and Mrs. Theodore Smith, Mrs. Brenda Wilson, Miss Verna Wichman, and Miss Gloria Macdon.

A model initiation, pledging, and business meeting were features of the banquet.

Mrs. Clark was a guest at the Delta Gamma house before she left for the University of Utah.

Queen of Hearts Candidates Chosen By Living Groups
Candidates for the Sigma Phi Epsilon’s Queen of Hearts have been chosen by their respective living groups.

The Queen of Hearts ball is Nov. 9 in the Governor’s room of the Florence hotel. Loyola women of Missoula, Sig Ep district governor, will crown the queen.

The nine candidates are:
Anne Blusehel, Los Angeles, New hall; Nancy Gallauder, Council Bluffs, la., Alpha Phi; Joanna Guilbaud, Missoula, Delta Delta Delta; Angie Goerts, Red Lodge, Delta Delta Delta; Angie Hiltz, Red Lodge, Sigma Kappa; Marjorie Budgeford, Butte, North hall; Barbara Schunk, Billings, Alpha Chi Omega; Pat Schwarz, Missoula, Kappa Kappa Gamma; Marion Budgeford, Hamilton, Kappa Kappa Gamma; Beverly Terpening, Har-din, Delta Gamma.

The candidates will be chosen after meeting the men at two dinners and one fireside. The queen attends all major Sig Ep functions and receives a $50 scholarship.

Last year’s queen was Carol Noel, Missoula.

Cabinet Gorge Science Work To Commence
Faculty members and students of MSU will do scientific research in Cabinet Gorge on the Montana-Idaho border this week end and next, according to Prof. Carling L. Malof, anthropology department. The site, on the Clark Fork river, will be covered with water after completion of the Cabinet Gorge dam.

Professor Malof with several students will conduct the archaeological and sociological survey; Prof. Fred S. Honkala will do the geological survey with several students; and Prof. George F. Weisel will do the biological survey with student assistance.

Funds for this scientific research were made available by the Washington Power company. Dalton Pierson, Missoula, United States District attorney, was instrumental in negotiating for the funds to accomplish the project, Professor Malof said.

Informal Party Said Successful
North hall women and Juniors men had an informal get-together Saturday night in North hall. Tables and chairs in the dining room were shoving back, a record player was set up in one corner, and the room became a dance floor.

When they weren’t dancing, the men and women were gathered around the piano singing to the accompaniment of Gib Lathinger, Miles City, and Nadine Gender, Fairfield. Or they were popping corn, drinking punch, or eating cookies.

TWO STUDENTS PLAY SOLOS AT SUPERIOR TUESDAY
Douglas Kuster, Hamilton, and Betty Rumph, Broadus, were featured solists at the Child Study club meeting in Superior Tuesday evening. Kuster, accompanied by Rudolph Wendt, played “My Regards” and “To the West” on the trumpet.

Miss Rumph’s violin selections were “Air for the G String” and “Romanza Andaluza.” Stella Cristelli, Billings, was accompanist.

This little gee-gee was all at sea. It was enough to upset his equine-inity. He’d been reading about those rush-rush cigarette tests — the quick sniff, the fast puff, “Hardly the scientific approach,” he said in his confusion. But then he realized that one test is an equine of a different pigmentation—a thorough, conclusive test of cigarette mildness.

It’s the sensible test . . . the 30-Day Camel Mildness Test, which simply asks you to try Camels as your steady smoke—on a day-after-day basis. No snap judgments! Once you’ve tried Camels for 30 days in your “T-Zone” (T for Throat, T for Taste), you’ll see why...

After all the Mildness Tests, Camel leads all other brands by billions
