MISSOULA--

The University of Montana chapter of the American Chemical Society is one of 64 ACS chapters throughout the nation adjudged outstanding by the society's Council Committee on Chemical Education.

D. L. Swanson, chairman of the committee, recently commended the UM chapter for its educational achievements. Altogether there are 475 ACS chapters throughout the country. The 64 receiving a high educational rating represent 13.4 per cent of the total.

The UM chapter and the other 63 are being honored for their accomplishments during the 1966-67 academic year.

Dr. Leland M. Yates, associate professor of chemistry and faculty adviser for the University's ACS chapter, was singled out by Swanson for the work Dr. Yates had done with the UM students.
