J-Council Seeks To Improve Athletic Relations

Improving student relations between athletes and non-athletes has been the objective of interviews conducted by Judicial council this week.

Twelve football players have been called before the council, Don Mosher, Butte, chairman of the men's board said. The interviews are an aftermath of violations of University standards following the alumni football game.

Letters of warning will probably be written, Mosher said, but the prime objective has been discussing relations between athletes and other students.

Certain students feel no problem exists, Mosher pointed out, but most of those interviewed voiced opinions concerning the root of the "problem," and what makes the athlete stand out from the other students.

"I think most of the others (students) look on us as a bunch of free loaders," one of those interviewed said. "We haven't had a winning team in recent years. Everybody wants a winner and most students don't care about associating with a bunch of losers."

"Sure, we band together," another said. "Everybody can spot an athlete, especially when we walk into a bar."

"We don't like the situation any better than you do. But was the M club president invited to Leadership camp to talk over this and other campus problems? I'm glad Judicial council is taking this action. Maybe it will help straighten out a lot of misunderstandings."

Four Take Tests For English MA's

Four students completed examinations for masters degrees in English Tuesday.

L. A. Lawrence, teacher at Dillon high school, Albert Esta, Elizabeth Morris, and Edwin Casebeer, graduate assistants in English, have completed both written and oral examinations.

The oral exams were taken individually. They were administered by English department faculty members: Dr. Edmund Freeman, Dr. Leslie Fiedler, Dr. Vedder M. Gilbert, Dr. John E. Moore, Dr. Walter Brown, Dr. Merrel D. Clubb, Dr. Bernard Heringman.

Achievement Awards Presented ROTC Candidates at Monday Review

Awards for achievement during the 1955-56 academic year were presented to ROTC cadets Monday on the oval at the annual awards parade.

Army ROTC award winners were Cadet Major Donald R. Schessler, Laurel, selected for the first All-American rifle team. He was also awarded a golden bullet by the National Rifle association. Sgt. John R. Foster, Springfield, O., a certificate from the association naming him to the second All-American Rifle team.

Cadet Col. Ray Henry Lee, Butte, was awarded a medal from the association of the U. S. Army as the all-around outstanding second-year advance cadet. Lee was also presented with an award from the Montana Reserve Officers association for outstanding second-year advance cadet in academic work.

Rae Young Receives Medal
Cadet M/Sgt. Rae Freeman Young, Billings, the all-around outstanding first-year advance cadet, was awarded a medal by the American Legion. Presented by Hellgate Post No. 17, Cadet Capt. Jack Ray Evans, El Dorado, Ark., was also awarded an American Legion award as the all-around outstanding basic Honorary Pershing Rifles cadet.

Cadet M/Sgt. William B. Cogswell, Missoula, was awarded a medal as one of the outstanding first-year advance cadets enrolled in the ROTC units in the nation.

Cadet M/Sgt. Young, the outstanding first-year advance cadet,

Central Board Discusses Golf Course, Orientation, Grass at Regular Meeting

Lawn Problem Draws Ideas From Board

With barely a quorum attending, Central board discussed the grass situation, an orientation course, MSU golf course, and the Lodge public address system at its regular Wednesday meeting.

"This campus is burning up—something must be done, and done fast," one member asserted in discussing the age-old grass problem.

It was pointed out that \$50,000 was spent in planting MSU lawns, and now funds seem to be lacking for keeping them up.

"You don't let the buildings run down once they are built," one voiced. "Why let the lawns burn up? Everybody talks about the paths across the oval. Those paths wouldn't be there if the grass were watered."

Can Be Walked On
"Grass is meant to walk on, if it is taken care of properly."

Fowler offered to write a letter to President McFarland voicing student concern and asking if something could be done to promote a more extensive watering program.

"Students are concerned more than most people think," another member said. "Even the girls in Brantly hall were going to fill waste baskets with water to wet down the grass."

In other business, possibility of (Continued on page four)

SENTINEL ASSOCIATES SELECTED THIS AFTERNOON

Publications board will select three Sentinel associates this afternoon, according to Rick Lee, chairman.

All letters of application must be turned in by three o'clock this afternoon to either Lee or Natalie Nordby, Sentinel editor. Applicants will be interviewed at 3 p.m. in J 211, Lee said.

The three positions are for six months and each associate will receive \$10 a month, according to Lee. After the associates are selected by Publications board their names are taken to Central board for final approval.

Robots Top TX To Gain B Lead

Theta Chi just missed upsetting the Robots in the feature of Tuesday's intramural softball games.

The Robots eked out a 13-12 win to remain tied for first and second in the B league.

Robots got away to an 8-0 lead in the first inning, but saw this big lead vanish in the third as Theta Chi picked up 9 big runs. Robots then got a run in the fifth, two in the sixth, while limping Theta Chi to three runs after the third inning. Theta Chi finished the season with an 0-7 record. Robots had a 7-1 record before Wednesday's game.

Fi Alfa Falfa closed out their season on a winning note taking an 18-6 victory from Sigma Alpha Epsilon. Fi Alfa Falfa got away to an early lead and was never threatened. The game was called at the end of five innings because FAF was leading by more than 10 runs. Fi Alfa Falfa's season record now is 3-4. SAE has a record of 1-6.

Elrod Hall and Jumbolaya won forfeits over the Fort Falcons and Phi Sigma Kappa respectively. Jumbolaya remains unbeaten going into Wednesday's game with six wins and no defeats. The Phi Sigs closed out their season with a 2-6 slate. Elrod has a 2-3 won-lost record, and Fort Falcons now have a 6-2 record.

The softball tournament, composed of the two top teams in both leagues, is scheduled to start

JUMBOLAYA UPSET

Jumbolaya was upset by Sigma Chi in softball play yesterday afternoon, and they are now tied for first place with the Law school in "A" league standings.

It has not been determined how a selection will be made to see who is ranked first for tournament play.

today. However it may be delayed if several teams tie for the top spots in the B league. In the A league, Law and Jumbolaya are the top teams. The tournament schedule follows: Number one team in the A league, Jumbolaya, vs. the number two team in the B league, not yet decided. Number one team in the B league, not yet decided, vs. the number two team in the A league, which is Law.

New Course May Open Next Spring

A University golf course is fast becoming a reality.

Central board at its regular meeting Wednesday outlined a publicity campaign, and May 31 was the tentative date set for approving plans of the course.

President John Fowler pointed out the need for recreational facilities, such as a golf course, at an expanding University. He told the members that if a vote of Central Board could be taken this spring, then work could be started during the summer months, and the course would be ready for student use next spring.

Two meetings have been held with President Carl McFarland, and Fowler reported the University head gave his approval to the tentative plans.

These plans call for loaning the \$43,000 in the ASMSU reserve fund to the University. The University would then build the course, which will cost between \$45,000 and \$50,000.

This would enable the cost of play to be kept nominal for students, and towns people using the course could contribute to the summer upkeep via higher fees.

The proposed course will be located beyond the strip houses and bounded on one side by the Pat- (Continued on page two)

Affidavit Filed in Park Case To Disqualify Judge Padbury

President Carl McFarland and Dean Gordon Castle have filed an affidavit in Helena to disqualify District Judge George Padbury Jr. from hearing a case involving a dispute over the University biological station at Yellow bay park on Flathead lake.

A temporary injunction was issued May 2 preventing the park from being closed to the public. The injunction was granted on a petition by Mrs. Juanita B. Elliott of Kalispell. A hearing is set for May 31 in Helena.

Mrs. Elliott, in petitioning for the injunction, charged McFarland, Castle, The Montana highway commission, Ashley C. Roberts, state parks director, and Albert J. Loomis, caretaker, with planning to close the park to the public on May 1 of this year.

Elliott Gives Objection
She listed among her objections to the park's closing the loss of a site used to launch boats onto the lake.

In addition to filing the affidavit disqualifying Judge Padbury, McFarland and Castle filed a demurrer maintaining:

1. The complaint filed by Mrs. Elliott does not show a cause of action for legal relief;

2. The complaint fails to name the correct parties in not including the state board of education among the defendants;

3. The complaint is too indefinite and uncertain for legal proceeding.

Summer Materials Out May 28

Students planning to attend summer session may pick up registration material beginning Monday, May 28, at window five of the registrar's office, announced Leo Smith, registrar.

After receiving registration material, students should consult their advisers to arrange and get approval of schedules. Courses are sectionized following adviser's approval.

If sectionizers are not available, sectionizing may be done in the Field house June 11, along with checking, billing, and paying fees. No checking will be done prior to June 11. Students must keep registration cards until then, he said.

Summer session is divided into one 10 and two 5-week sessions. The 10-week session begins June 12 and ends August 17. Short sessions last from June 12 to July 13, and from July 16 to August 17.

This year's summer session offers 276 courses in 25 fields. In addition to regularly offered courses, 18 special programs (work shops, institutes, and conferences) are planned.

Summer session faculty include 84 regular members and 32 visiting staff members. Last year's session attracted 1,089 students, about half of them graduate students, according to E. A. Atkinson, summer session director.

Calling U

All present Spurs and Bear Paws are to meet in front of the Lodge at 5:30 p.m. today for the annual picnic.

Inter-varsity Christian fellowship meets tonight at 7:30 in Committee Room 2 of the Lodge. Miss Martha Phillips, who has been in Mexico working with the Indians, will speak.

Young Democrats rally will be Monday at 7:30 p.m. in LA 104 to hear Mary M. Condon, State Superintendent of Public Instruction.

Prospective Bear Paws who have not been interviewed will report to the conference rooms in the Lodge today between 3 and 5 p.m. Others interested in Bear Paws are also to report to get an application.

Dean Robert E. Sullivan, representing McFarland and Castle, said the University had no intention of closing the park to the public on May 1. Plans to build a trailer camp on the 15-acre boat launching site have been discussed, he said.

The trailer camp under consideration would be for married students attending classes at the Biological station during the summer months, he explained. The 15 acres along the lake is the only possible place for a trailer camp because the rest of the station's land is heavily wooded, he said.

Mrs. Elliott charged the park was to be closed to obtain the 15 acres "in order that some of the exclusive members of this school . . . may park their trailers upon the land now occupied by Yellow bay park."

MSU Got Land in 1905

Dean Sullivan said the 160-acre tract used by the station was given to the University for biological research purposes in 1905 by the 85th Congress. Under the law that gave the land to the University. Failure to use it for biological research would cause its return to the federal government, he said.

The Montana Legislature passed a law in 1941 when the park was set up stating, "that nothing hereinafter contained shall operate to prevent the use of the area within the said park for biological station purposes whenever it becomes useful or necessary for such purposes."

Summer Work Scheduled At Yellow Bay

The University biological station at Flathead lake will hold two sessions this summer—an eight-week session from June 16 to August 11, and a five-week session from July 16 to August 18.

The station is at Yellow bay on the east shore of the lake. Plans call for students to spend part of their time in the station's seven laboratories and part of their time with actual work in the field. Nine botany and 11 zoology courses are offered this summer.

A conservation education work shop will be held in conjunction with the sessions. It will stress problems and principles of conservation characteristic of the northwest. Proper management of natural resources is the primary aim of the workshop.

Dr. Gordon B. Castle is station director. Staff members include Dr. Royal B. Brunson, associate zoology professor; James S. Gebhart, assistant education professor; Dr. Joseph W. Severy, botany professor; Dr. Philip L. Wright, zoology professor; and Dr. Leroy H. Harvey, assistant botany professor.

Visiting staff members are Dr. Gerald W. Prescott, professor of botany, Michigan state college; and Dr. Paul Baldwin, assistant zoology professor, Colorado A&M college.

EDITORIALLY...

Voice Your Approval

The much discussed golf course can become a reality by next spring if the student body wants it. All that is needed for actual work to begin on the course is the final approval of Central board.

Central board must formally approve the course and decide how the \$43,000 in the reserve fund will be spent toward the course. This vote will come next Thursday, May 31.

Among Central board members the question still remains whether or not the tennis courts should be repaired before construction of the golf course begins. This question arose because the members of the board do not know what student attitude is toward the course.

Details concerning the course are being distributed to all campus living groups. This information shows why we should have a golf course, including three points presented in an April 17 KAIMIN editorial.

Included in the information is the fact that the money currently in the reserve fund can be loaned to the University. This is definitely the best solution as to how we should handle our money.

Within two to four years from the time actual play on the course starts this money could be regained. This would be done through a refinancing process similar to the one negotiated in conjunction with the skating rink.

If this method is used to finance the course, students could use it at a nominal fee. Townspeople would play on the course during summer months, and revenue for maintenance and repayment of any financial obligation could be received this way.

One week from today Central board is scheduled to take final action on the golf course. This opportunity for a golf course cannot be passed up. Student approval must be voiced before next Thursday.—J.G.B.

Dike Gives Way Near Idaho Town

Bonniers Ferry, Idaho, May 23 —(UP)—The rampaging Kootenai river has broken through a dike protecting the city of Bonners Ferry, Idaho, and water is pouring onto the main street of the town.

Volunteers and soldiers have been rushed to the scene to pour tons of dirt on the break, but a spokesman for the Army Engineers says he is "really concerned" whether they can keep much of the business section of the town from being flooded.

The critical point is at the south end of a U.S. 95 highway bridge. Water seeped through an expansion joint at the bridge abutment and boiled up beneath the protective dike and into the town. Bonners Ferry is a city of 2,000 population, and was last flooded in 1948.

More than one-thousand army troops and volunteers are manning the dikes against the swollen Kootenai. Two dikes gave out earlier this week and 6,000 acres of farm land have been flooded.

Schessler, Foster Win All-American Rifle Honors

Don Schessler, music major from Laurel, and John Foster, forestry major from Springfield, Ohio, have won places on the All-American rifle teams. Schessler is on the first team, among the top

10 in the nation; Foster, on the second team, is one of the top 20, according to a report just issued by the National Rifle association.

Schessler, who received a certificate and a gold bullet for placing in the top 10, has been on the ROTC rifle team for four years. In 1953 he took top individual honors in the Hearst Trophy Matches, and before that had been among the leaders in national small bore shooting. Schessler will be graduated in June and expects to accept an army commission.

Foster received a certificate for his place on the second team. He also placed first individually in this year's Hearst Trophy match for the sixth army district, and fourth in the nation. Foster has been on the MSU ROTC rifle team for the past two years and a member of the Montana Military District reserve big bore rifle team. Last year he made the sixth army reserve team and went to Camp Perry, Ohio, to fire in the nationals. He has just returned from Camp Roberts, Calif., where he again won a berth on the sixth army team.

Making an all-American rifle team is comparable to making an all-American football team. Each team has 10 members who are selected by votes of college rifle team coaches from all over the nation. Leadership and scholastic standing, as well as marksmanship, are considered in choosing team members.

Golf Course

(Continued from page one)
tee canyon road. It will be a nine-hole, all-grass course and can be expanded to 18 holes in future years.

The course would probably be run by Earl Martell, assisted by a student committee. Fowler emphasized, however, that all the details have not been worked out. ASMSU officers will be available to speak to interested living groups during the next week.

Silvertips Will Travel To Bozeman

The Grizzly baseball squad, 18 strong, leaves at 1 p.m. today for Bozeman where they play the Bobcats in the first two of four games to determine the mythical state diamond champion. The second two games are scheduled for Campbell Park June 1.

Friday's double-header in Bozeman starts at 2 p.m. with the second game immediately following the first.

Montana's season record, after the split with Gonzaga last week, now stands at six victories and six defeats. The 'Cats have won three of six this year with the Idaho State Bengals, a team which defeated the Grizzlies in an early-season practice game at Pocatello.

Pleased with 4-1 Win

Coach Hal Sherbeck, commenting on the Gonzaga games, said he was pleased with the showing of the Silvertips in the afternoon against the Spokane Independents where Montana won 4-1 behind the tight pitching of Larry (Lefty) Schultz. As for hitting, the coach said the Grizzlies showed a potential for hitting the long ball in the first game, which had not been evident in earlier contests. Both Reed Smith and Schulz hit homers in the Grizzly victory.

Although Montana was swamped 17-1 in the nightcap against the 'Zags, Sherbeck said he was impressed with the showing of pitcher Roland Stoleson, a heretofore untested Grizzly moundsman, who threw hitless ball for the last three innings.

Pacing the Bobcats at the plate this year are Bob Black, Don Edwards, and Bill and Jerry Haslip. The mound staff is built around Keith Strandberg, who leads the 'Cat pitchers in victories. Strandberg threw a near-perfect one-hitter against Idaho State two weeks ago facing only 25 men in the seven inning contest.

Grizzly batters are led by senior outfielder Keith Peterson who is hitting at a .471 clip followed by Schulz who has four hits in ten appearances at the plate for a .400 average.

Road Crew

Making the trip to Bozeman in private cars today are: pitchers—Paul Caine, Glenn Biehl, Stoleson, and Schulz; infielders—Sam Pottenger, Lynn Colvert, Jerry Daley, Bobby Hendricks, and Bill Redmond; outfielders—Smith, Frank Kocsis, Peterson, Jim Lee, Dick Bork and Gordon Hunt; and catchers—Lee Bofito and Jerry Walker.

TWO UNIVERSITY OFFICIALS ATTEND DENVER MEETING

Athletic Director George Dahlberg and Dr. Eary Lory, faculty athletic representative, are in Denver for a meeting of Skyline athletic directors and faculty athletic representatives.

During the meeting, the conference group was to decide upon the eligibility of two MSU athletes, Ray Howard and Vince Barone.

What young people are doing at General Electric

Young ad man handles G-E jet and rocket engine advertising

The first jet engine ever to power an American plane was built by General Electric in 1942. Since 1948, G.E. has supplied the Air Force with over 30,000 of its famous J47 jet engines. And General Electric's jet experience soon will be paying additional new dividends to national defense. Its J79—called the most advanced engine of its type in the world—will soon enter production.

The man responsible for reporting G.E.'s jet and rocket engine progress to its customers and the public is Roy O. Stratton, Jr., 27-year-old account supervisor in the Company's Apparatus Advertising and Sales Promotion Department.

Stratton's Work Important, Interesting

Stratton supervises the planning and preparation of direct-mail promotion, brochures, films and presentations, as well as public-informational space advertisements for *Time*, *U.S. News & World Report*, *Business Week*, *Aviation Week*, and other magazines.

Considerable personal contact with the Armed Services makes Stratton's job an interesting one. Last year he traveled over 60,000 miles, visiting many of the country's Air Force bases to gather necessary information and pictures.

25,000 College Graduates at General Electric

When Stratton came to General Electric in 1952, he already knew the kind of work he wanted to do. Like each of our 25,000 college graduates, he is being given the chance to grow and realize his full potential. For General Electric has long believed this: when fresh young minds are given the freedom to develop, everybody benefits—the individual, the Company, and the country.

Writers Slate July Sessions

The eighth annual MSU writers' conference will be on campus July 16-21, says Henry V. Larom, assistant professor of English, and conference director.

Specialists of national fame in writing of novels, short stories, and poetry, together with students, will take part in discussions, panels, and lectures during the entire week, Larom said.

The conference will include a talk by the western historian, Walter Prescott Webb. Professor Webb, of the University of Texas, is the author of several books. Among them are: "The Texas Rangers," "The Great Plains," and "The Crisis in Frontier Democracy."

The MSU conference will include many talks and discussions but will specialize in private conferences, Mr. Larom said. Each conferee may send in one manuscript. It will be carefully read by a member of the staff. Then the conferee will discuss it with the staff member. In this manner, each conferee will get personal attention and a chance to talk over his writing problems with a nationally known author.

Because of the manuscript load and the personal interviews, the conference is limited to about 40 members. Interest was shown from as far as New York, Texas, and California, and a number of conferees have already sent in deposits to hold their places for this summer's session.

Lawn Problems

(Continued from page one) establishing an orientation course for freshmen was discussed.

Orientation Course

President John Fowler read a letter written to Andrew Cogswell, dean of students, requesting consideration be given to such a course. Officers attending the recent Vancouver convention reported that courses orientating freshmen to university life, ways, organizations, and possibilities are successfully offered on other campuses. Several members expressed they would favor similar courses being offered here. Study will be continued, with findings to be reported at future Central board and faculty curriculum committee meetings.

Music on PA System

Fowler pointed out the Steam Valve letter appearing in the Wednesday Kaimin asking for action on the Lodge public address system, and the type of music played thereon. It was emphasized that this was only one person's opinion, but none-the-less, the matter should be looked into.

It was referred to Marilyn Shope and her Activities board committee for further study.

The next regular Central board meeting will be 4 p.m. Saturday.

Dr. Fiedler Returns From Freud Lecture

Dr. Leslie Fiedler, professor of English, has returned from Philadelphia, where he was featured speaker for the third annual Freud Memorial Lecture, held by the Association for Psychoanalysts of Philadelphia.

Dr. Fiedler's speech marked the 100th anniversary of Sigmund Freud.

The first of the annual Memorial lectures was given by Anna Freud, daughter of the noted psychologist. Last year's lecture was given by Dr. Lionel Trilling, professor at Columbia university.

Association officers asked that Dr. Fiedler allow them to reprint his speech, "Versions of Love in American Fiction," in their official news magazine.

While on the trip, Dr. Fiedler stopped at Princeton university to make final arrangements for his year there, beginning this fall, as a guest teacher.

Three Job Openings Available for Summer

There are three job openings, Cryle VanDuser, student employment secretary, said. One full time job for this summer and two employment openings for this week.

There is an opening for a cowboy at a dude ranch in Wyoming, she said, but three qualifications are needed for the job. First, the young man must be of unquestioned moral character as the guests consist almost entirely of teen-age boys and girls; second, he must be thoroughly familiar with horses and riding; and third, he must be able to shoe a horse.

The job pays \$175 per month plus board. The job begins between the first or middle of June until the first of Sept.

There is an opportunity for a baby sitter for Friday afternoon and yard jobs are also available this week, Miss VanDuser said.

LUCKIES RING THE BELL with college students all over the country! The reason: Luckies taste better. That's because they're made of fine tobacco—mild, naturally good-tasting tobacco that's **TOASTED** to taste better. Now check that Droodle above: Lucky-smoking midget in telephone booth. He may be short on stature, but he's mighty long on smoking enjoyment. Next time, ask for Luckies yourself. You'll say it's the best-tasting cigarette you ever smoked!

COLLEGE SMOKERS PREFER LUCKIES!

Luckies lead all other brands, regular or king size, among 36,075 college students questioned coast to coast. The number-one reason: Luckies taste better.
