DR. GORSLINE TO ADDRESS GEOLOGY DEPARTMENT AT UM

MISSOULA--

alle all

Dr. Donn S. Gorsline, professor of marine geology at the University of Southern California, Los Angeles, will address students and faculty of the University of Montana geology department at 8 p.m., March 11, in room 107 of the Geology Building on the Missoula campus.

The lecture, which is open to the public, is sponsored by the American Association of Petroleum Geologists. There is no admission charge.

Dr. Gorsline's lecture is titled "Sedimentary Processes and their Role in the Formation of Future Source and Reservoir Rocks." His program will deal with recent findings about the movement of sands and the formation of rocks similar to those involved in the production of oil and gas reservoirs in the geographic past.

Dr. Gorsline is widely known in oceanographic research. Much of his lecture is based on information he has gathered about ocean life and the ocean bottom from a research vessel. He has carried on his studies off the coasts of both California and Florida.
