# Haitian Complaint Sent to Council

UNITED NATIONS, N.Y. (AP) — The UN Security Council will meet in urgent session today on Haiti's complaint that it is being threatened by the Dominican Republic.

The council president, Ambassador Roger Seydoux of France, called the meeting for 3 p.m.

Gonzalo Facio of Costa Rica, Organization of American States chairman, predicted the UN group would refer the Haitian complaint back to the OAS, which debated the issue for two hours Monday. The only OAS action was an appeal to both sides "not to resort to force."

In the U.S. opinion, a Dominican attack would rally the Haitians behind their dictator, Francois Duvalier, and damage the Dominican case in the OAS.

Still, the possibility that the independent-minded Dominican chief, President Juan Bosch, might stage at least a token assault was not ruled out.

Washington took a dim view of Haiti's recourse to the United Nations. Even if the Security Council agrees to let the OAS, as a regional organization, continue to handle the case, debate on whether to do so could give the Soviets another good chance to accuse the United States of interference in the Caribbean—a favorite Communist theme since the rise of the Castro regime.

The U.S. delegation to the United Nations declared that the OAS should deal with the Haitian-Dominican crisis now

rather than the 11-nation Security Council.

The State Department announced yesterday it has ordered families of U.S. officials in Haiti to leave the troubled country and is urging private American citizens to depart too.

## Prosecution for Murder May Be Result of Riots

BIRMINGHAM, Ala. (AP)—Riot-trained state police poured into this racially torn steel city yesterday after thousands of Negroes charged in two massive waves on the downtown area.

Gov. George C. Wallace ordered 250 highway patrolmen to supplement law enforcement authorities in Birmingham. Eight persons were injured in various melees.

President Kennedy voiced hope in Washington on Tuesday night that the people of Birmingham could solve the racial problems.

Fire hoses played high-velocity streams of water on milling crowds at half a dozen downtown intersections before order was restored.

Meanwhile, 75 police officers were required to quiet a restive crowd of more than 1,000 Negroes in a park near desegregation headquarters.

The first mass invasion of the downtown area followed unsuccessful attempts by Negro children to be arrested. Nearly 1,000 young Negroes were arrested Monday, bringing to more than 2,400 the number of

demonstrators jailed since the Rev. Martin Luther King Jr. initiated the desegregation campaign April 3.

The current campaign is by far the largest—both in the number of participants and those arrested—in the Southern civil rights struggle.

Meanwhile, Alabama's segregationist Gov. Wallace bluntly warned Negro demonstrators that he would prosecute them for murder if the massive desegregation drive in Birmingham resulted in violence and death.

## Second Telstar Satellite Sent Up by U.S. Rocket

CAPE CANAVERAL, Fla. (AP) — A three-stage Delta rocket blasted off yesterday in an effort to send a second Telstar satellite into orbit as another step toward a worldwide communications system.

The 90-foot rocket blazed skyward at 6:38 a.m. with the 175-pound Telstar 2 cradled in its nose. The satellite was aimed at a wide looping orbit ranging from 575 to 6,559 miles above the earth.

Project officials announced shortly after launch that the second stage had ignited successfully.

The National Aeronautics and Space Administration, which launched the 175-pound ball of instruments for AT&T, announced all spacecraft systems were operating satisfactorily.

Project officials hope Telstar 2 will be working well and in position next week to relay to Europe the scheduled launching of astronaut Leroy Gordon Cooper Jr. on his intended 34-hour orbital flight from Cape Canaveral.

## House Opposes JFK's Program for Education

WASHINGTON (AP) — A House Education subcommittee ignored Kennedy administration wishes and approved a separate \$1,195,000,000 program to help build college classrooms, laboratories and libraries.

It was the first concrete step taken by the Education subcommittee this year to break up the omnibus education bill submitted to Congress by President Kennedy. The administration asked for college aid as part of its over-all program, not as a separate entity.

Many members of Congress, however, contend that a separate college aid bill has the best chance of any education measure to win congressional approval this year.

The college aid program has strong bipartisan support and a subcommittee spokesman said it was approved unanimously. A similar measure passed the House last year but died in a Senate-House conference committee.

No funds could be used under the program approved by the subcommittee Monday for any sectarian instruction or religious work.

## Military's Role in Seminar Opposed by Faculty Groups

Members of two organizations of University professors have expressed opposition to the military's role in the National Security Seminar which is in its final week of instruction.

The MSU Chapter of the American Association of University Professors unanimously approved a resolution saying, "We do not believe that the Armed Forces are the proper agencies for this kind of political education."

It is the opinion of members of the Teachers' Union, Local 497, that the seminar job should have been contracted out to a university rather than handled by the Armed Forces.

"The seminar seems to be mixing housewives and military officers," George B. Heliker, associate professor of economics and president of the union, said.

The Seminar, which started April 29, is sponsored locally by MSU, the Missoula Chamber of Commerce and the Missoulian-Sentinel Publishing Co.

"Some faculty are in disagreement with the idea of the University being one of the sponsors of the Security Seminar," Prof. Rulon C. Jeppesen and president of the Faculty Senate, said.

Proponents of the Seminar say the lectures are designed to increase general understanding of the need for co-operation between the military and civilians. The programs are sponsored nationally by the Industrial College of the Armed Forces.

"The Seminar sessions are appropriate for any citizen of the United States who has any feeling for his country," Lt. Col. William W. Morrison, Seminar administrator, said. "People should be interested in it, not boycotting it."

Seminar sessions are in the morning from 10 to noon and from 1:30-3:30 in the afternoon in the Wilma Building. The last session ends Friday noon.

In an editorial Sunday, the Daily Missoulian claimed that the quotation of Sen. J. W. Fulbright,

D-Ark., referred to in the AAUP resolution was "taken out of context."

"As a matter of fact," the editorial said, "the Seminar faculty does not discuss policy. They leave that to the civilians. What the faculty does is present facts, and the conclusions and interpretations are up to the Seminar participants."

The text of the AAUP resolution follows:

"The Montana State University Chapter of the American Association of University Professors is in sympathy with every sincere attempt to educate the public on matters of national and international importance. However, we do not believe that the Armed Forces are the proper agencies for this kind of political education. We support the view of Sen. Fulbright, quoted below:

"The memorandum was based on my strong belief in the principle of military subordination to civilian control. There has been a strong tradition in this country that it is not the function of the military to educate the public on political issues. Military officers are not elected by the people and they have no responsibility for the formulation of policies other than

military policies. Their function is to carry out policies formulated by officials who are responsible to the electorate. This tradition is rooted in the constitutional principle that the President is the Commander in Chief of the Armed Forces . . .

" . . . If, by the process of the military 'educating' the public, the fevers of both groups are raised, the danger is great indeed.

"Perhaps it is farfetched to call forth the revolt of the French generals as an example of the ultimate danger. Nevertheless, military officers, French or American, have some common characteristics arising from their profession and there are numerous military 'fingers on the trigger' throughout the world."

The remarks of Sen. Fulbright were from the Congressional Record, Aug. 2, 1961.

## Homecoming May Feature Bob Hope

Bob Hope has been requested to appear as big name entertainment for Homecoming, Oct. 11-12.

The comedian has not committed his appearance, but a final decision should be forthcoming soon from Mr. Hope's agent, according to Stacy Swor, chairman of the Special Events Committee.

If Mr. Hope cannot appear for Homecoming next fall, then Special Events Committee will try to get Mort Sahl, comedian; Henry Mancini, who has a 40-piece orchestra; Ella Fitzgerald, vocalist, or Ray Charles, jazz singer.

"As yet, nobody has made any commitments. We're only hoping that Hope will say yes," Swor said.

"Another thing we might be able to bring in sometime next year," Swor said, "is an off-Broadway production of 'My Fair Lady'."

**OUT OF A JOB**—Ed Whitelaw, who turned over the presidency of ASMSU to Rick Jones Sunday evening, will graduate this spring with degrees in mathematics, economics and political science. ## Free Pool, Rink Use Part of Agreement

An agreement providing for free student usage of the University swimming pool and ice skating rink and reduced rates at the University bowling alley was signed by Ed Whitelaw, former ASMSU president, as one of his last official acts before leaving office.

The agreement, which will not be final until Pres. H. K. Newburn signs it, states that ASMSU will pay the University an estimated \$4,762.80 for the 1963-64 academic year in lieu of admission charges presently paid by students for use of the facilities.

Two thousand dollars of this sum is designated to pay for use of the swimming pool and \$750 for use of the ice skating rink. The balance will be for use of the bowling alleys.

According to the agreement, students will have free use of the pool during public swimming sessions, which are usually on Friday and Saturday evenings and Saturday and Sunday afternoons.

Use of the pool may be interrupted or postponed, however, for special events such as swimming meets and Aquamaid shows.

Students will be permitted free usage of the ice skating rink dur-

ing public skating sessions next fall and winter quarters, but it will not be open to students during adult skating lessons and special events.

The agreement provides that the administration will pursue a program to have the ice rink repaired with a \$6,000 gift and grant from ASMSU. However, if engineering studies determine that adequate repairs can't be made for this amount, the administration will return the money to the student body.

Bowling rates will be reduced from the present 35 cents per line to 25 cents per line for open bowling and 30 cents for league bowling.

Next year will be a trial year for the facilities usage plan. In future years, the program will be evaluated yearly by both the students and administration to determine if the program is to be continued.

The sum ASMSU will pay for future use of the facilities will also be determined yearly and will take into consideration such items as increased enrollment, costs of operations and general use of the facilities for recreational and physical education programs.

# Performers 'Elevate' Music Symposium

**THE PERFORMERS**—At the Friday evening concert, Kay Larsen, flutist, and Linda Fasching, vocalist, performed "Two Chinese Poems" composed by MSU student Bruce Lester. Both women are seniors in the music school and Lester is a sophomore.

(Photos on this page by Ray Dominick.)

By RAY DOMINICK

(Editor's note: Mr. Dominick, not a regular critic for the Kaimin, consented late last night to write the following review of the Music Symposium when the Kaimin was unable to get the review which originally was planned.)

"This weekend has renewed my faith in the University," one student observed Sunday evening when the First Annual Symposium of Contemporary Music ended.

The Symposium presented what was perhaps not the best music ever composed but it did provide the audience a glimpse of what the young composers are producing at MSU.

In many cases the productions were not only sensual but had a quality comparable to that of noted composers.

**THE COMPOSER**—Jerry Mader, a freshman in music, defends one of his compositions performed at the concert from audience and panel criticism.

him nervous and waiting for a break to relax.

Other quick-moving pieces included the Organ Sonata by John Selleck. This piece, however, had changes in tempo which not only relaxed the listener but had him waiting in anticipation of the coming stanzas.

The majority of the folk songs Friday evening thoroughly enthralled the audience not only with their originality but also with the atmosphere the performers produced. The interpretation of the song "Fix My Television, Lord" by Edward Harris as sung by Margie Fowler had the audience rolling in its seats.

The most important part of the Symposium, however, was not the music, although it cannot be forgotten, but the discussions which followed the performances.

Leslie Fiedler, professor of English, said "It is a shame that things like this Symposium have not been going on for years in universities throughout the country."

"This is something that MSU should have started years ago," and he said he hopes this will be

**THE PANELISTS**—Following each concert, a panel discussed the performances and other phases of contemporary music. Pictured are Asst. Prof. Joseph Mussulman of the music school, Prof. Leslie Fiedler of the English department, and Assoc. Prof. John Wehrenberg of the geology department.

the beginning of annual presentations and discussions of the music contemporary composers are producing.

Saturday night the discussion centered on the importance of producing and playing new music. Prof. John Wehrenberg of the geology department said this was the first time most of this music had ever been performed and possibly the last time. Why then, he asked, should we bother to write or listen to contemporary music?

The conclusion was that by allowing the composers to continue writing, they may produce music for the pleasures of coming generations.

The discussion Friday was concerned with what music should be composed for church services. Should the composer be compelled to write music for a defined part of the service in a specified tone or should he be given complete liberty to write what he wants? There was no definite answer.

What can be concluded from the Symposium? The fact that the weekend was inspiring is one answer. Future symposiums of this type only can help to clarify and give a hearing ground to the music of our modern composers. If the future symposiums are of the quality of this one they will be welcomed not only for the beauty of their performances but for the information they provide.

## the fourth dimension: TIME

...still a mysterious concept to science. Time is only an idea, an abstraction... an area of shadow, speculation and surprise

**HAPPY DEC. "W"!**... Under a new world calendar now under study by the United Nations, each year would be exactly the same. (We now have 14 different kinds of year.) Since the new calendar would have only 364 days, the final day would be Dec. "W" or "Worldsday," an international holiday.

**WAIT A SECOND?**... Nothing much can happen, you say? In science, it's different. Inside the atom, for instance, 10,000 collisions occur in one billionth of a second.

**TIGHT SQUEEZE**  
... The coil in a Hamilton 505 Electric Watch is 1/4" in diameter. Its .00075" wire is so thin, it stretches to 137 feet long when unwound.

For the absolute ultimate in one-upmanship, wear a Hamilton 505 Electric watch. For girls who seek the same sense of elegance and excellence, there is a beautiful selection of Lady Hamiltons. They start as low as \$35 and make outstanding gift suggestions.

# Prospects 'Looking Up' for Local Animals

By JACKIE BISSONNETTE

Prospects are looking up for Missoula's animal population.

Through the efforts of a few Missoula citizens, the dog shelter south of Missoula on Highway 93 has been changed from a filthy, neglected animal graveyard to respectably clean and comfortable living quarters for homeless dogs and cats.

It all started during the cold days of February when two Missoula women, Mrs. John Peterson and Mrs. Manse Olson, went to the shelter to purchase a cat for a friend. The sight that greeted them was sickening. Cats were dead, dying and starving in dirty, unsanitary pens. Small kittens had frozen to death and were frozen into the ice around the pen.

What they saw horrified the women. They went home, got on the phone and organized a group of friends to go out and do something about the situation.

They went out with their husbands and cleaned and disinfected the pens, and put in clean straw and wood chippings to make the animals more comfortable. Dead animals were hauled away and buried and the pens were repaired.

"I never knew I was a carpenter until I started helping out there," Mrs. Dale Dahlgren said.

By this time more people had found out about the problem and began to donate their time and materials to help rebuild the shelter. Lumber companies donated lumber and paint; an electric stove and refrigerator were donated for the caretaker's house, and several persons and club groups donated their time.

The shelter is now clean and respectable although it still is run down, Mrs. Dahlgren said. The Humane Society hopes to sell the place, buy a new location and build a new animal shelter with concrete floors and runoffs. The society has been offered a very good price for the old site, Mrs. Dahlgren said.

Following the initial cleaning up of the shelter, "we really got down to business and found out how to run a dog shelter and organize a humane society," Mrs. Dahlgren said.

"We made reports, went before the City Council and wrote for literature. We told the city that if the shelter was going to be used as a city dog pound that it should be the responsibility of the city to help maintain it."

The city had been using the shelter as a city pound, but the Humane Society had received no reimbursement.

The Missoula dog ordinance states that the "poundmaster shall at the city's expense provide a safe and suitable place for the impounding of dogs—and see that it is kept and conducted in a quiet, humane and proper manner."

However, the women were told that while the city had budgeted \$300 to the Humane Society for the year and \$500 for the services of a veterinarian, neither amount had been spent.

So the women went to work again and reorganized the Missoula

Humane Society to make it more efficient. They elected Mrs. John Peterson president, Mrs. Ruth Olson vice president, Mrs. Dahlgren secretary and Dr. A. G. Phelps treasurer.

Much of the money for the maintenance of the shelter comes from donations and pet sales at the shelter itself.

At present the city is using the dog shelter to a limited extent for nuisance dogs only. Mrs. Dahlgren said the Humane Society will work out a contract so that the city can make more use of the shelter if it desires.

Mr. and Mrs. Charles W. Norris,

the new caretakers hired by the Humane Society, love animals. They are ardent poodle raisers and have three of their own—Smokey, Pierre, and Petite. Smokey recently gave birth to three more poodles—the Norris' pride and joy.

The two dogcatchers hired by the city usually bring out three or four dogs a week, Mr. Norris said. The number has recently decreased from as many as seven dogs in one day. These dogs are kept for 96 hours and, if not claimed are either disposed of or kept to sell.

Many persons come out to buy pets, especially on the weekends.

The Norrises give away or sell five or six dogs a week. Most of the dogs that are brought out by the city dogcatchers are reclaimed, Mr. Norris said.

The dogs usually get used to it and like it at the shelter, Mr. Norris commented.

"We like our job because we love animals," the Norrises say, "and we are looking forward to

the time when we move out of here into a new shelter."

Because a courageous group of women took it upon themselves to do their community a service, homeless dogs and cats have a decent place to live with proper food and care. And thanks to these women, improvements are still being made, and a brand-new shelter is a bright possibility.

## WHAT'S HAPPENED TO FALCON

**EVERYTHING!  
 AND YET...**

Early this year we put a 164-hp V-8 in a new kind of Falcon called the Sprint, and entered the stiffest winter road test we could find . . . the 2,500-mile Monte Carlo Rallye. We didn't know what would happen . . . but happen it did.

First, no one dreamed all the Rallye cars would have to experience the worst winter in decades. Snow, below zero temperatures, and the most demanding terrain in Europe took their toll. Two thirds of the 296 cars that started, failed to reach Monaco.

A lot of experts told us that the Falcon V-8's, untried as they were, could not hope to finish the Rallye with the best of weather. But not only did two Falcon Sprints finish, they placed first and second in their class. **But there were more surprises (for**

everyone) in store. Against all competition, regardless of class, the lead Sprint went on to take first in the final six performance legs.

We honestly didn't know the Falcon Sprint would do this well. But it showed us a Falcon with our new 164-hp V-8 is a car that can perform with the best of them. So a lot has happened to Falcon, and yet . . .

A six-cylinder Falcon has just finished the Mobil Economy Run and finished first in its class. It had to take a lot of punishment, too . . . 2,500 miles from Los Angeles to Detroit over mountains, deserts, and long stretches of superhighways. But the nickel-nursing ways of the all-time Economy Champ took all comers in its class.

So you see something has happened to the Falcon. It can be what you want it to be . . . a V-8 that travels in the same circle as Europe's performance kings . . . or a Six that can travel cross-country on a budget. *There's something to put into your compact.*

# Morrison Pitches Tips To 11-2 Win Over Mines

Don Morrison pitched his seventh complete game of the season yesterday and led the Grizzlies to a 11-2 win over the Montana School of Mines Orediggers.

Only one game was played instead of two as scheduled.

Morrison, who now has a record of 4-5, pitched his usual steady game, striking out eight while allowing only two runs on six hits and two walks.

Although Morrison's overall record isn't too impressive, his earned run average is the best on the team. Many of his losses can be attributed to poor fielding or hitting by the rest of the club.

The Grizzlies gained a two-run lead early in the game when Bill Irwin drove a long triple to left field in the second inning. Joe Krajaic followed with a walk, and with men on first and third, Tom Croci hit a triple to deep left-center, allowing Irwin and Krajaic to score.

With the Tips leading 3-0 in the top of the fourth, the Orediggers rallied for their only scores of the afternoon. After Morrison had struck out the first man to face him, Jerry Leveque reached first on an error and advanced to third when Jim Furaus doubled. Both runners scored on Frank Quilici's long double to center. Morrison then settled down and finished the game without allowing a Mines' runner to go farther than second.

Dan Sullivan, who is currently the hottest hitter on the team, extended the Grizzly lead to 5-3 in the fifth inning when he hit a long home run over the left field wall, scoring Mike Cyrus who had doubled.

Sullivan, who had three hits in four trips to the plate in yesterday's game, has raised his average from .263 to over .350 in the last three games. He also accounted for three of the Tip runs against the School of Mines yesterday.

Seven of the Grizzlies eleven hits in yesterday's game were for extra bases, including one home run, two triples and four doubles.

A standout for the Orediggers was Wally Businius, who had two hits in three times at bat, including a double.

Don Poole, the Orediggers' ace pitcher, who two weeks ago allowed the Grizzlies only five hits while striking out 12, did not appear to be in top form in yesterday's game. He allowed three

DON MORRISON

runs, three hits, three walks and hit two batters before he was lifted in the third inning with the bases loaded.

The Tips will meet the Carroll College Saints in Helena Tuesday. It will be the second meeting for the two schools this season. The Grizzlies took both ends of a doubleheader in their first encounter.

## Austrian Student Tops WRA Tennis

Barbel Matz, Alice Bilile and Luckii Ludwig were the champions in the WRA tennis tournament Saturday.

Miss Matz, foreign student from Austria, defeated Pat Clark 6-0 and 6-2 for the singles championship.

Miss Bilile and Miss Ludwig defeated Colleen McCarthy and Penny Torgenrud 6-0 and 6-1 in the doubles championship.

## Bowling Entries Due Tomorrow

Entries in the men's division of the Student Union Bowling Tournament have been numerous, but little response has been received from the women kegglers, according to Jerry Van Sichel, Student Union program director.

The tournament, open to all students including varsity bowlers, is Friday and Saturday at the University Lanes. Those interested in participating are requested to sign at the Lodge desk or the University Lanes by tomorrow.

All participants will have to bowl three lines between 5 p.m. and 10 p.m. Friday. Handicaps will be determined from these scores. The men's handicap will be two-thirds of the difference between their average and 180 and the women's will be two-thirds of the difference between their average and 160.

After Friday's competition half the field will be eliminated and the top half, not to exceed 24, will engage in head-to-head double elimination competition.

Trophies will be awarded to winners in both divisions and for the highest single game in each division.

# Coed Reporter Discovers Fun In Grizzlies' 'Exciting' Baseball

By JANET TRASK

With the "hum-babe-hum" of the outfield, the "stee-ri-ke" of the umpire, and the orange-sleeved Miners up to bat, I entered rickety Campbell Stadium yesterday, late of course.

The dust was whipping around the infield with force and dark thunder clouds were threatening. It seemed the game might either be "winded" or rained-out.

Only nine girls were in the "crowd." Probably most of the coeds who are at all sports-minded are too busy watching Clover Bowl action to attend any Grizzly games.

It's more fun to watch the "un-noticed" actions of the players than the sport itself. Tom Croci, for example, spent more time swishing the sand around the home base than actually batting. But he eventually did get to first base.

Croci added a little life to the game, which was obviously a Grizzly victory from the beginning. While he was supposed to be on first base, he was sneaking to second. The Miner pitcher saw him and the ball then was tossed between the two basemen. While Croci was distracting these players, the Grizzly on third attempted to creep to home base. The Miners

finally picked off the latter but Croci got to third.

Actually, it's a very exciting sport, which more students, even girls, would recognize if they would take the time to visit the Grizzlies in action.

## Phi Delt's Second In Fraternity Ball

Phi Delta Theta bunched 11 runs into two big innings and defeated SX 12-4 yesterday in the playoff for a spot in the intra-mural softball tournament.

The Phi Delt's pushed one run over in the first inning, and then scored five times in the second on two hits, two walks, two errors and a wild pitch. They added six in the fourth on four hits, two walks, and an error.

SX scored once in the first, twice in the third, and once in the fourth. They managed four hits off winning pitcher Ed Jordan, but two of them were bases empty home runs by Dick Hughes and losing pitcher Doug Midgett. Terry Dillon hit two two-run homers for PDT.

In today's opening round of the softball tourney Turner Hall and the Boomers, first and second in the B league, play on Field 1 at 4 p.m. and PDT, second in the Fraternity League, and Full House, tied for first in the A league, clash on Field 2 at 4 p.m.
