Course Description  
Exploration of ethical issues in the field of computing. Skills needed to identify and analyze various ethical concerns. 
Standard ethical concepts and theories, methods of ethical analysis. Strong emphasis on practical application of the 
ethical process. 

Course Overview  
Social and Ethical Issues in Computer Science studies ethical decision making in the complex world of information 
technology. The course begins with a survey of general ethical principles and decision making processes, examining 
effective tools and guidelines to resolve complex dilemmas. The remainder of the course explores information 
technology-specific ethical issues. Included will be discussions on professionalism involving business relationships, 
codes of ethics, accountability and licensure; intellectual property including patents copyrights, and trade secrets; 
online behavior including SPAM, hacking, and social engineering; and privacy issues such as data mining, surveillance, 
and transaction generated information. 

In addition to the ethical component of the course, CSCI215E fulfills a lower division writing requirement. Assignments 
focus on basic grammar, sentence structure, mechanics capitalization and punctuation), paragraph structure, topic 
sentences, thesis statements, and introductory and closing paragraphs. 

This course explores ethical issues in the field of computing. Students will develop the skills needed to identify and 
analyze various ethical concerns. We will cover standard ethical concepts and theories, as well as standard methods of 
ethical analysis. I place a strong emphasis on practical application of the ethical process. 

This means that once you’ve learned the basics of ethical analysis, you’ll apply that information to different scenarios. 
It’s important to keep in mind that the field of ethics considers many different viewpoints. A good ethicist will fairly 
evaluate positions that may, on a personal level, be far outside his or her comfort zone. I expect you to become good 
thecists! Your ethical analysis work will usually be in the form of an essay, so you’ll practice your writing skills at the 
same time that you practice your ethics skills. Initial writing assignments will work on grammar, punctuation, and 
sentence structure. In short order, we’ll move to topic sentences and paragraph structure, then expand to a full essay 
with introduction, body text, closing, and thesis statements. Once we reach that point in the assignments, you’ll 
continue using that format for the remainder of the semester. 

This course requires reading, writing, reflection, and critical thinking! Each week expect to read around 50 pages and 
write at least one page.
Learner Outcomes

- Explain the positive impact of computers on society;
- Explain the potential negative impact of computers on society;
- Explain legal issues related to computing;
- Describe professionalism and code of ethics;
- Discuss post-9/11 legislation as it relates to computing including the USA Patriot Act
- Identify and describe common ethical concepts and theories.
- Analyze ethical dilemmas and articulate a clear, descriptive account prior to forming a normative course of action.
- Demonstrate one or more processes of philosophical analysis.
- Identify common ethical issues facing professionals in the field of information technology.
- Apply ethical concepts and an analytical process to common dilemmas found in the information technology field.
- Demonstrate writing competency in the following areas: development of idea, organization, appropriate voice, proper mechanics, and relevance to assignment

General Education
CSCI 215E is a designated lower division writing course. It also fulfills the Ethical and Human Values Perspective 5 General Education Graduation Requirement as defined in The University of Montana Catalog.

Textbook

Reading
This course contains a significant volume of reading. Students are expected to complete a weekly reading assignment. Reading will be assessed through classroom participation, writing assignments, and the final exam.

Assessment
Grades will be weighted and graded as follows:

<table>
<thead>
<tr>
<th>Assessment Area Weighting:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Participation</td>
<td>20%</td>
</tr>
<tr>
<td>Weekly Reflection Paper (10)</td>
<td>30%</td>
</tr>
<tr>
<td>Analysis Paper (2)</td>
<td>30%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>20%</td>
</tr>
</tbody>
</table>

<table>

</thead>
<tbody>
<tr>
<td></td>
<td>80-89%</td>
<td>B</td>
</tr>
<tr>
<td></td>
<td>70-79%</td>
<td>C</td>
</tr>
<tr>
<td></td>
<td>60-69%</td>
<td>D</td>
</tr>
</tbody>
</table>
Academic Conduct
All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by The University. All students need to be familiar with the Student Conduct Code. The Code is available for review online at:
http://www.umt.edu/vpsa/policies/student_conduct.php

Using the Web to research materials and concepts is an integral part of learning in the twenty-first century. Studying with other students is a productive method of learning. A certain amount of collaborating on concepts with other students and using resources found on the Internet in an assignment is recommended. Copy and paste is not acceptable. It is expected that each student will input his/her assignment into the computer, and each student must be able to explain any assignment turned in.

The subject of plagiarism is discussed in Appendix A of the Quinn textbook (p. 491). Please be sure to review this section of the textbook prior to submitting any assignments for the course.

Writing Requirements
Students are expected to demonstrate writing competency in the following areas: development of idea, organization, appropriate voice, proper mechanics, and relevance to assignment. Writing will be assessed using reflection papers and analysis papers.

All writings are to be submitted in hard copy format and should be completed using a word processor. Papers must be double-spaced, contain a page number in the upper right-hand corner, and use the APA style for citations and references. Cover page (see Appendix B) and a References page are required. No running headers. Use twelve (12) point Times New Roman or Arial font style. Examples of general APA format can be found at the Purdue Online Writing Lab https://owl.english.purdue.edu/owl/resource/560/01/. The Mansfield Library provides an APA Citation Style Guide: http://libguides.lib.umt.edu/content.php?pid=3183&sid=17365.

In most cases, a third person narrative voice should be used in all writings. Prior to final submission, all papers are required to complete the following process: final review by author, revision, peer review, revision and final submission.

An example cover page is found in the syllabus appendices. All writing assignments are due at the start of class.

Reflection Papers
This course requires students to write a weekly reflection paper based upon a topic covered in readings from the Quinn textbook and discussion topics developed in the classroom. Ten (10) reflections papers are required. No title page is needed for reflection papers, rather “Your Name” and “Reflection Paper #xx” should be included on separate lines, single-spaced, in the upper right header of the document. Be sure to include references where needed.

Unless otherwise instructed, please write using third person voice. The expected length of a reflection paper is 300-400 words (approximately 1 page double-spaced). Citing reference using APA citation style is required. Consider a format similar to a newspaper editorial. Reflection papers are assessed as follows:

Superior (++) indicates the submission meets the minimum length, contains limited grammar/spelling/mechanical errors, and uses strong logic. 5 points

Acceptable (+) indicates the submission meets the minimum length, but needs improvement in the areas of grammar/spelling/mechanical errors or logic. 4 points

Unacceptable (0) indicates either a missing submission or a submission which is unacceptable due to limited length, excessive grammar/spelling/mechanical errors, or extremely poor logic. 0 points
**Analysis Papers**
Analysis Papers provide students the opportunity to examine an ethical dilemma in greater depth. Topics for Analysis Papers will be based upon readings from the in the Submissions are 1200-1500 words in length. A minimum of two analysis papers are required each semester. Citing reference using APA citation style is required. Use third person voice. Title page, Reference page, and APA citation style are required. Please do not use a running header.

Appendix B of the syllabus provides an assessment rubric which further describes requirements for analysis papers. Appendix C provides an example of the required title page. Appendix D provides a copy of the Program-level Writing Assessment Holistic Rubric for UM. All manuscripts must demonstrate writing competency at the proficient or advanced level. Papers not meeting this criteria are required to be rewritten.

**Dropping and Adding Courses or Changing Sections, Grading or Credit Status**
University Policy for dropping courses or requesting grading/credit status changes can be found in the catalog: [http://www.umt.edu/registrar/students/dropadd.php](http://www.umt.edu/registrar/students/dropadd.php). Students should become familiar with all academic policies found in the catalog.

**Disability Accommodations:**
Eligible students with disabilities will receive appropriate accommodations in this course when requested in a timely way. Please contact me if you will be requesting an accommodation. Please be prepared to provide a letter from your DSS Coordinator. For more information, visit the Disability Services website at [http://www.umt.edu/dss](http://www.umt.edu/dss) or call/text 406.243.2243.

Good luck this semester and I hope you enjoy the course!

**Topic Outline (subject to revision)**

1. Catalyst for Change
2. Introduction to Ethics
3. Networked Communications
4. Intellectual Property
5. Privacy I: Information Privacy
6. Privacy II: Government
7. Security
8. Reliability
9. Professional Ethics
10. Work and Wealth
